Summary	Results-driven Data Analyst with expertise in SQL, Tableau, Excel, and Python, delivering actionable insights that drive strategic decision-making. Proven track record of streamlining reporting processes, optimizing data pipelines, and enhancing data accuracy. Adept at translating complex datasets into clear, business-ready recommendations that support growth and risk management.		
Work Experience	Infosys	April 2022 - December 2023	
	Data Analyst	Mysore, Karnataka	
	- Implemented ETL workflows using Informatica Powercenter and SSIS, integrating multi-source datasets and improving reporting accuracy. - Built 10+ interactive Tableau dashboards tracking KPIs, reducing reporting time. - Optimized SQL queries and SSRS reports, cutting average query runtime.		
	Hewlett Packard Enterprise	September 2021 - April 2022	
	Technical Solution Consultant		
	- Delivered critical technical support for enterprise storage systems, resolving complex issues across Windows, VMware, and Linux to reduce downtime and enhance client satisfaction. - Developed and deployed Python and shell automation tools, streamlining troubleshooting processes and reducing manual effort. - Diagnosed and resolved high-impact storage faults while collaborating with cross-functional teams to accelerate escalations and improve product reliability.		
	AIRobosoft	May 2021 - June 2021	
	Machine Learning Intern		
	- Designed a prototype speech recognition tool using Python and ML libraries for real-time applications. - Streamlined model experimentation, reducing development time. - Enhanced ML pipeline efficiency, supporting faster business automation deployment.		
	Education	University of North Texas	January 2024 - Expected December 2025
	Data Science	Master's	
	Data Analytics, Data Visualization, Machine Learning, Data Modeling, Cybersecurity, Statistics, Natural Language Processing (NLP), Data Storytelling, Big Data.		
	Vidyavardhaka College of Engineering	Bachelor's	
	Information Science and Engineering		
Projects	NYC Real Estate Investment	January - May 2025	
	- Analyzed 33,000+ property records using Python and Pandas; built price prediction models with Random Forest and XGBoost. - Visualized insights using Seaborn and Matplotlib to identify high-growth investment zones.		
	Tableau Dashboard & Storytelling	August - December 2024	
	Created interactive dashboards with charts, maps, and tables to support data-driven decisions.		
	E-commerce Shopping System	August - December 2024	
	Developed MySQL-based e-commerce platform with secure payment processing and optimized database design.		
Skills	SQL	Python	Tableau
	Rapidminer	Data Modeling	Data Analysis
	Data Manipulation	LookerStudio	GCP Bigquery
	Informatica Powercentre	Machine Learning	UX Testing Tools (Loop11, UXTweaks)
	Data Storytelling	Business Intelligence	SQL Server - SSIS, SSAS, SSMS, SSRS
	Excel	Data Visualisation	Spark, Hadoop
Certifications	Introdution to Generative AI	May 2025	
	Tableau Certified Data Analyst Cert Prep	May 2025	
	AWS - Storage, Databases and Migration Services AWS	August 2022	
Publications	Contact Tracing of the Covid Patient to Overcome Manual Surveillance IJRAR	June 2021
