

PROFESSIONAL SUMMARY

Dedicated and detail-oriented Data Analyst with **2+ years of hands-on experience in SQL, ETL workflows, and data visualization**. Proven ability to analyze large datasets, automate reporting, and build interactive dashboards using **Tableau** and **BI tools**. Strong foundation in **data modeling, statistics, and analytics**, with experience supporting business decision-making through actionable insights. Adept at collaborating in Agile environments and delivering data-driven solutions across enterprise and academic projects.

TECHNICAL SKILLS

- **Programming & Querying:** SQL, Python, HTML, SSMS, Java, MySQL, Snowflake
- **Data Visualization:** Tableau, Looker Studio, PowerBI
- **Data Engineering:** ETL, Informatica PowerCenter, SSIS, SSAS, SSRS
- **Analytics & Statistics:** Data Analysis, Data Modeling, SPSS, Rapidminer
- **Databases & Cloud:** SQL Server, GCP BigQuery, AWS IAM, Lambda, SSM, Cloudwatch, EventBridge
- **Tools & Platforms:** MS Excel, Linux, VMware ESXi, Uxtweak, Loop11, Windows OS,

PROFESSIONAL EXPERIENCE

Infosys - Mysore, India

Apr 2022 – Dec 2023

Data Analyst

- Designed and implemented **ETL workflows** using Informatica PowerCenter, SSIS, and SQL Server to integrate data from multiple sources.
- Developed and maintained **10+ Tableau dashboards** to visualize KPIs and automate reporting, reducing manual effort by **40%**.
- Optimized **SQL queries and SSRS reports**, improving execution performance by **30%**.
- Built **SSAS analytical models** to support multidimensional analysis and faster business decision-making.
- Performed **data validation** and quality checks to ensure accuracy and consistency across reporting systems.
- Collaborated with cross-functional stakeholders in **Agile environments** to translate business requirements into analytical solutions.

Environment: SQL, Tableau, ETL, Informatica PowerCenter, SSIS, SSAS, SSRS, SQL Server

Hewlett Packard Enterprise - India

Sep 2021 – Apr 2022

Technical Solution Consultant

- Supported enterprise systems across **Windows, Linux, and VMware ESXi** environments to ensure system availability and reliability.
- Managed and resolved support cases using **Salesforce (SFDC)** while maintaining SLA compliance.
- Developed **shell automation scripts** that reduced manual diagnostics by **25%**.
- Diagnosed and resolved storage performance issues, hardware faults, and virtualization-related errors, coordinating with engineering teams to accelerate escalations.
- Conducted **root cause analysis (RCA)** and documented resolutions to improve operational efficiency.

Environment: Linux, Windows, VMware ESXi, Shell Scripting, Salesforce

Machine Learning Intern

- Built a **speech-recognition prototype** using Python and machine learning algorithms.
- Performed data preprocessing, feature extraction, and visualization using Pandas, NumPy, and Matplotlib.
- Assisted in training and evaluating ML models to improve prediction accuracy.

Environment: Python, Pandas, NumPy, Matplotlib, Scikit-learn

EDUCATION

University of North Texas - Denton, TX

Jan 2024 – Dec 2025

Master of Science in Data Science

Relevant Coursework:

Data Analytics, Data Visualization, Machine Learning, Statistics, Data Modeling, Big Data, NLP, Data Storytelling

Vidyavardhaka College of Engineering – Mysore, India

Aug 2017 – July 2021

Bachelor of Engineering in Information Science & Engineering

ACADEMIC PROJECTS

Self -Healing EC2 Host using RAG and AWS SSM

Aug 2025 - Dec 2025

- Designed an automated self-healing EC2 framework using **AWS CloudWatch**, **EventBridge**, **Lambda**, and **Systems Manager (SSM)** to detect and remediate infrastructure issues without manual intervention.
- Implemented a **Retrieval-Augmented Generation (RAG)** service using **SentenceTransformers** and **ChromaDB** to semantically retrieve runbook-based remediation commands from CloudWatch alerts.
- Built and deployed a **FastAPI**-based RAG backend on EC2, enabling real-time anomaly interpretation and response.
- Automated remediation execution via **SSM RunCommand**, reducing **Mean Time to Recovery (MTTR)** by up to 80% compared to manual processes.
- Secured the automation pipeline using **IAM** least-privilege roles, and validated system reliability through CloudWatch dashboards, Lambda logs, and SSM command history.

NYC Real Estate Investment

Jan 2025 - May 2025

- Analyzed 33,000+ property records using Python and Pandas; built price prediction models with **Random Forest** and **XGBoost**.
- Visualized insights using **Seaborn** and **Matplotlib** to identify high-growth investment zones.

Tableau Dashboard & Storytelling |

Aug 2024 - Dec 2024

- Created interactive dashboards with charts, maps, and tables to support data-driven decisions.

E-commerce Shopping System

Aug 2024 - Dec 2024

- Developed **MySQL** based e-commerce platform with secure payment processing and optimized database design.

CERTIFICATIONS

Tableau Certified Data Analyst (Prep) | Databricks Fundamentals | AWS Databases & Migration | Introduction to Generative AI
