

Professional Summary

Results-driven Data Analyst and Data Engineer with 5+ years of experience delivering high-impact data solutions across insurance and enterprise environments. Proven track record of building scalable ETL pipelines, audit-ready reports, and decision-driving dashboards using SQL, Power BI, Snowflake, and Informatica Cloud. Known for reducing data discrepancies by 25%, leading cross-functional collaborations, and enabling data-driven decisions that improved business efficiency and regulatory compliance.

Work History

Mar 2020 - Mar 2025 Data Analyst/Data Engineer
Farmers Insurance Group, Woodland Hills, CA

- Partnered with business analysts, architects, and stakeholders to translate business needs into scalable data pipelines and reporting solutions.
- Designed and deployed optimized data models in Snowflake and PostgreSQL, improving performance and supporting operational analytics.
- Built and maintained ETL/ELT pipelines using Informatica Cloud and SQL, implementing rigorous validation, audit checks, and reconciliation controls.
- Developed dynamic Power BI dashboards with Power Query to deliver self-service insights and support regulatory and performance reporting.
- Automated data cleaning and prep using Excel, CSV, and cloud-source integrations, reducing manual effort and error-prone workflows.
- Created audit-ready deliverables through detailed documentation, data lineage tracking, and compliance-aligned reporting standards.
- Reduced report discrepancies by 25% through proactive data quality checks and root-cause resolution of inconsistencies.
- Cut reporting turnaround time by 40% by developing reusable SQL templates and scalable dashboards used across business units.
- Collaborated across IT, Product, Finance, and Underwriting teams to define metrics and ensure alignment with business goals and compliance policies.
- Enabled successful migration of Salesforce data to AWS S3 and Snowflake by resolving mapping discrepancies and aligning metrics, improving system-wide reporting accuracy by 20%.
- Analyzed both structured and unstructured datasets to provide targeted insights for leadership and operational decision-making.

Informatica PowerCenter (10.x),
Informatica Cloud
Data Transformation
Data Quality & Governance

Databases:

Snowflake, SQL Server, Oracle,
PostgreSQL, DB2

Programming:

SQL, Stored Procedures, Unix
Shell Scripting

Reporting & Visualization:

Power BI, Excel, Data Storytelling

Cloud Platforms:

AWS (S3, EC2, Glue), Git/GitHub,
Linux, CI/CD

Job Scheduling:

Autosys, IWS

Education

Sep 2009 to May 2013
Bachelor of Technology -
Information Technology
Sri Ramakrishna Engineering
College, India

Certification:

PCEP – Certified Entry-Level
Python Programmer
