SUMMARY

- Data Analyst with 4 years of experience in healthcare and finance, specializing in leveraging machine learning, data visualization, and cloud technologies to drive operational improvements and enhance decision-making.
- Skilled in building machine learning models using TensorFlow and Scikit-learn, applying algorithms like Random Forest and SVM to predict outcomes and reduce errors, leading to a measurable decrease in claim rejections and fraud.
- Proficient in data manipulation and analysis using Python, Pandas, and NumPy, optimizing data processing workflows.
- Experienced in designing interactive dashboards using Power BI and Tableau, visualizing key metrics, and improving decision-making efficiency.
- Expertise in cloud technologies, with experience managing large-scale datasets using Snowflake and Azure, reducing data retrieval times, and improving data accessibility.
- Strong project management skills, utilizing Agile methodologies, Jira, and cross-functional collaboration to ensure timely project delivery, optimize workflows, and align data strategies with business objectives.

SKILLS

Methodologies:	SDLC, Agile (Scrum), Waterfall
Programming Languages:	Python, SQL, R, C & C++.
Packages:	NumPy, Pandas, Matplotlib, TensorFlow, Seaborn, Scikit-learn, SciPy
Visualization tools:	Tableau, Power BI, MS Excel/Advanced Excel (Pivot Tables, VLOOKUP), QlikView.
Cloud Technology:	Azure Cloud, AWS, Snowflake.
Database:	MySQL, PostgreSQL, MongoDB, Oracle, T-SQL.
Tracking Tools/Version Control Tool:	Jira, Microsoft Visio, GitHub, SVN.
Big Data Technologies:	Hadoop Ecosystem (Hive, Pig), Apache Spark.
IDEs:	Visual Studio Code, PyCharm, Jupiter Notebook, IntelliJ.
Other Skills:	Google Analytics, Power Query, Alteryx, SAS, SAP, SSIS, SSRS, Machine Learning Algorithms, Probability distributions, Confidence Intervals, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Confluence, Apache Kafka, Trifacta.
Operating System:	Windows, Linux, Mac OS
Certifications:	R Certification (Data Camp), Python (Data Camp), Advanced SQL (Udemy).

EXPERIENCE

Data Analyst | Cigna, TX, USA

Jan 2024 – Current

- Designed and implemented ETL/ELT processes to extract, transform, and load data from 10+ diverse sources into Snowflake, enabling comprehensive analysis of patient outcomes and scalable data storage for ongoing research.

- Created interactive Power BI visualizations to present insights on chronic disease trends and patient outcomes, increasing data-driven decision-making among healthcare providers by 25%.
- Collaborated with cross-functional teams in an Agile environment to gather requirements and iteratively develop data solutions that aligned with clinical goals, improving chronic disease management strategies by 30%.
- Applied hypothesis testing to validate findings in chronic disease management, generating actionable insights that enhanced clinical strategies and improved treatment effectiveness by 15%.
- Developed machine learning algorithms using Scikit-learn and SciPy to predict patient outcomes and identify risk factors in chronic diseases, reducing hospital readmission rates by 20%.
- Designed and maintained efficient data pipelines using Hadoop and Spark, ensuring streamlined data processing for chronic disease analysis and improving processing times by 40%.
- Cleaned and wrangled large datasets (over 100,000 records) using Python techniques, ensuring high data quality and integrity crucial for accurate healthcare reporting.
- Utilized ServiceNow to track project progress, manage documentation, and improve team communication, reducing project delays by 30% through enhanced collaboration.
- Conducted statistical modeling to identify trends and correlations in chronic disease data, supporting healthcare providers in making informed treatment decisions and improving patient outcomes by 25%.
- Led training sessions for over 50 healthcare staff members on interpreting data visualizations and utilizing analytics tools, empowering teams to apply insights for improved patient care.
- Developed custom Python scripts for automating data extraction, transformation, and analysis tasks, enhancing data processing efficiency and reducing manual intervention in chronic disease-related analytics projects.

Data Analyst | Infosys, India

Jun 2020 – Nov 2022

- Developed a machine learning model to forecast product demand based on historical sales data, seasonality, and market trends, optimizing inventory levels and reducing stockouts by 15%.
- Utilized Pandas and NumPy for data cleaning, transformation, and aggregation of historical sales data, improving data accuracy by 95%, which was essential for effective demand analysis.
- Conducted thorough exploratory data analysis (EDA) using Matplotlib and Seaborn to visualize sales trends, seasonality, and correlations, identifying key patterns that enhanced forecasting precision by 20%.
- Applied statistical methods from SciPy, including ANOVA, to validate hypotheses about factors influencing product demand, providing a 98% confidence level in statistical conclusions.
- Developed and fine-tuned TensorFlow models on Azure to forecast future product demand, leading to enhanced operational efficiency and a 15% reduction in inventory holding costs.
- Coordinated User Acceptance Testing (UAT) for the forecasting model to ensure alignment with business requirements, boosting user confidence by 30% for smoother adoption.
- Utilized SQL for data aggregation and manipulation, supporting statistical analysis and decision-making, which increased forecasting model reliability and improved prediction confidence by 55%.
- Integrated machine learning models into automated data pipelines on Azure, reducing manual effort by 60%, improving scalability and efficiency in demand forecasting processes.
- Implemented optimization algorithms from Scikit-learn and SciPy to refine forecasting accuracy, resulting in a 10% reduction in forecasting errors by addressing demand signal adjustments.
- Managed 50+ project tasks and tracked progress using Jira, ensuring 100% on-time delivery and alignment across cross-functional teams.

EDUCATION

Master of Science in Business Analytics: University of north Texas, Denton, Texas, USA

Bachelor of Commerce in Computer Application: Jahnvi Degree College, Hyderabad, India
