DATA SCIENCE ENGINEERING SUMMARY

Data-driven professional pursuing a **Master's in Data Science Engineering** with 3+ years of hands-on experience in **Python, SQL, Power BI, and data analytics**. Skilled in designing dashboards, performing data modeling, and transforming raw data into actionable insights. Strong foundation in **electronics & communications engineering**, experience collaborating in both customer-facing and technical roles. Recognized for analytical problem-solving, attention to detail, and ability to translate requirements into impactful solutions.

CORE SKILLS

Business Intelligence & Visualization:	Power BI, Tableau, DAX, Power Query, Grafana (familiarity)
Programming & Analytics:	Python, SQL, Pandas, NumPy, Scikit-learn, MS Excel
Data Modeling & Transformation:	ETL, relational databases, Access reports, forms & queries
Statistical & Predictive Modeling:	Regression, clustering, forecasting, hypothesis testing
Collaboration & Communication:	Agile teamwork, stakeholder engagement, technical documentation

RELEVANT PROJECT EXPERIENCE

- Python Developer Intern** – *Venom Technology, India* | Mar 2022 – Apr 2023
- Developed Python scripts and SQL queries to automate workflows, reducing manual reporting efforts.
 - Designed, deployed **custom dashboards in Power BI and Tableau** to visualize KPIs and sales metrics.
 - Conducted **data preprocessing and modeling** for large datasets, ensuring accuracy and integrity.
 - Delivered **customer segmentation project (K-Means clustering)** supporting targeted marketing campaigns.
 - Built **sales forecasting model** using regression techniques, improving decision-making for inventory/ operations.
- Front Desk Manager** – *IHG Hotels & Resorts, Virginia Beach, VA* | Jul 2023 – Present
- Created, maintained **reporting dashboards in Excel & Access** to monitor satisfaction & operational KPIs.
 - Streamlined processes by educating on digital adoption tools, improving efficiency and reducing wait times.
 - Leveraged data-driven insights to support process optimization and enhance customer service experience.
- Mathematics and Science Tutor** – *Self-Employed, India* | Jun 2016 – Feb 2022
- Provided individualized instruction in mathematics, statistics, and scientific problem-solving.
 - Designed **data-driven learning materials**, strengthening communication and analytical skills.

EDUCATION

- Master of Science in Data Science Engineering** – Grand Canyon University, Phoenix, AZ (*Expected Apr 2026*)
- Advanced Probability and Statistics
 - Predictive Modeling
- Bachelor of Engineering in Electronics & Communications** – MBICT, Gujarat Technological University, India

CERTIFICATIONS (*planned or in-progress*)

Microsoft Certified: Power BI Data Analyst (Preferred for role)
SQL Certification (e.g., Azure Database Administrator Associate)
Certified Analytics Professional (CAP)
