CAREER SUMMARY

- Strategic Business Analyst with a focus on supply chain performance, logistics efficiency, and process improvement across enterprise operations.
- Strong expertise in requirements gathering, stakeholder communication, data interpretation, and business intelligence tools like Power BI and Tableau.
- Proficient in bridging the gap between business and technical teams to deliver cost-saving and scalable solutions.
- Familiar with Agile and Scrum methodologies and experienced in driving cross-functional initiatives with measurable ROI.
- Recognized for being detail-oriented, solution-focused, and effective in multi-tasking across global teams.

EDUCATION

Webster University | *Master of Arts-Information Technology Management*

AUGUST 2023 - MARCH 2025

Universal College of Engineering and Technology | *Bachelors in Computer Science*

JULY 2019 - MAY 2023

EXPERIENCE

Business Analyst | *ShrinQ Consulting Group*

JULY 2024 - Present

- Led business analysis efforts for a logistics digitization project with potential cost savings of \$1.2M annually.
- Gathered, documented, and validated business and technical requirements for supply chain analytics platform.
- Worked with cross-functional teams to implement KPI dashboards that improved demand forecasting accuracy by 19%.
- Used SQL to extract operational data and validate reporting outputs.
- Conducted workshops and stakeholder interviews to align on project objectives and milestones.

Business Analyst Intern | *Oracle*

JANUARY 2022 - MAY 2023

- Created functional specifications for a purchase order reconciliation tool, reducing discrepancies by 30%.
- Assisted in defining product backlogs and prioritized user stories for the BI development team.
- Built process flow diagrams using Visio to map out end-to-end logistics workflows.
- Partnered with QA team to perform UAT for procurement module changes.

Business Analyst Intern | *Tech Mahindra*

August 2021 - DECEMBER 2021

- Conducted gap analysis for the transportation tracking module in a third-party logistics project.
- Documented BRDs and helped design a cost tracking dashboard using Power BI.
- Facilitated sprint reviews and created sprint summaries for stakeholders.

PROJECTS

Logistics Image Intelligence using NLP & Deep Learning | *Python, SQL, Flask, TensorFlow, Keras, Pandas, Matplotlib*

- Developed a dynamic multi-label image classification tool for analyzing over 4,000 satellite logistics images, integrating NLP techniques to label inventory and terrain types.
- Improved model accuracy through iterative architecture tuning and hyperparameter optimization, increasing prediction reliability for logistics routing.
- Created visualizations to assess preprocessing quality, enabling better data cleaning workflows and improved downstream analytics.

Customer Churn Analysis and Retention Strategy Development | *Python, SQL, Tableau, Power BI, SWOT Analysis*

- Conducted customer behavior segmentation and churn factor analysis, using advanced SQL and Python to uncover key dropout triggers.
- Built interactive BI dashboards to present churn patterns and simulate retention strategies, cutting churn by 20% and increasing LTV by 18%.
- Led cross-functional meetings to align marketing, sales, and customer service teams with findings, ensuring a data-driven retention roadmap.

Sales & Marketing Performance Dashboard for Executive Decision-Making | *Salesforce CRM, Tableau CRM, Python, scikit-learn, Excel*

- Designed an enterprise dashboard integrating sales and marketing KPIs from Salesforce and custom Excel data feeds, reducing reporting cycles by 30%.
- Created tailored metrics including CAC, ROI, and lead conversion rates for executive visibility, improving campaign ROI tracking and stakeholder engagement.
- Enhanced stakeholder decision-making by 40% through improved accessibility and real-time analytics visualization.

TECHNICAL SKILLS

- **Tools:** JIRA, Confluence, MS Visio, Tableau, Power BI, Excel (Pivot Tables, VLOOKUP), SQL
- **Languages:** Python, SQL, Java
- **BA Techniques:** SWOT, Gap Analysis, BRD, FRD, User Stories, Process Mapping
- **Cloud & DBs:** AWS, GCP, Oracle DB, MySQL
- **Soft Skills:** Communication, Stakeholder Management, Team Leadership, Organization, Decision-Making
