

Ankit Ankit

M: 914-760-1785 • Email: ankitydv@gmail.com • LinkedIn: [linkedin.com/in/ankitx](https://www.linkedin.com/in/ankitx)

SKILLS

- **Programming Languages:** Python, MySQL, JavaScript
- **OS and Architectures:** Linux, MacOS, Windows
- **Web Development:** React, Redux, Restful APIs
- **Tools and Frameworks:** GIT, Postman, Docker, CI/CD pipelines, Kubernetes
- **Cloud Platforms:** AWS
- **Other:** Data Structures & Algorithms, Unit/Functional Testing, Networking Basics
- **Soft Skills:** Quick learner, strong communication, and effective teamwork

WORK EXPERIENCE

Software Engineer Intern – Hikewise

Jan 2023 – May 2023

- Designed and implemented interactive learning platforms and student management systems, improving user engagement by 40%.
- Conducted end-to-end testing and debugging, ensuring by automating software test protocol.
- Enhanced development processes by Identifying & Eliminating redundant API calls.

Software Engineer Intern – BarRaiser

Jul 2022 – Dec 2022

- Developed scalable and robust solutions for the BarRaiser interview practice platform.
- Introduced new features. Added new features to a webpage, improving user experience and enhancing web page functionality.
- Speeding up delivery and improving user experience and functionality using Agile methodologies.

PROJECTS

Real-time Data Processing System

- Python, C++, Docker, AWS EC2
- Developed a high-performance backend system for processing and analyzing real-time data streams.
- Integrated **Kafka** for real time data process, optimized with **Java** for speed & security. Deployed the solution on **AWS EC2** for scalable cloud architecture.

Order Management System

- Python, PostgreSQL, Docker
- Built a backend system for handling customer orders using Java, Spring Boot, and Microservices.
- Optimized MySQL queries to reduce response time and utilized Postman for API testing and validation.

Scalable Notification Service

- Python, SQL,
- Created a scalable notification service using SQL to store user data and notifications. Deployed on Kubernetes clusters using AWS EC2, ensuring auto-scaling based on user demand.

Note taking Web App

- SQL, RESTful APIs
- Developed a feature-rich Android note-taking app using **Java** with offline access, cloud sync, and multimedia support.
- Implemented advanced search and filter features and used **Git** for version control and collaboration.

EDUCATION

Master of Science, Computer Science

Sep 2023 - Dec 2024

Montclair State University

Relevant Coursework: Software Engineering, Computer Algorithms, Robotics

Bachelor of Technology, Electronics & Communication

Aug 2018 - Dec 2022

Noida Institute of Engineering & Technology

Relevant Coursework: Python, C, Data Structures & Algorithms, Cybersecurity

CERTIFICATIONS

- Cyber Security Essentials - Cisco
- Step into Robotics - GUVI
- Data Analytics - KPMG
