

ANKIT OJHA

🏠 San Jose, CA, 95113 📞 +1 (408) 581-1325 ✉ ankit.ojha@sjsu.edu [in linkedin](#) [github](#)

Summary

Software Engineer skilled in full-stack development, Java/Spring Boot backend, AI, and cloud solutions; experienced in React, Docker, and big data with a strong focus on microservices, scalability, performance, and system design.

Education

San Jose State University

Aug 2024 – May 2026

Masters of Science, Software Engineering

San Jose, CA

Courses: Data Mining, Machine Learning, Distributed Systems, Software Systems Engineering, System Design

Galgotias College of Engineering & Technology

Jul 2017 – Jul 2021

Bachelors of Technology, Information Technology

Greater Noida, India

Courses: Data Structures & Algorithms, Database Management Systems, Operating System, Software Engineering

Experience

Software Engineer II (Intern) – Cisco Systems, San Jose, USA

May 2025 – Aug 2025

- Validated and corrected **650+** payload/response schemas across **1,435+** **Java-based REST API** endpoints, collaborating with multiple teams to ensure consistent, user-ready examples and improved overall API reliability.
- Built a **Python + Jenkins** validation framework to automate daily **error detection** across APIs, enabling rapid defect resolution, improving overall reliability, and streamlining cross-team debugging and issue tracking.
- Fixed critical pagination issues in high-traffic API endpoints by developing a customised **sorting annotation**.

Software Engineer – Accenture, Noida, India

Nov 2022 – July 2024

- Developed and maintained an enterprise-level Full-Stack Web application for **700K+** employees, utilizing **React**, **Spring Boot**, **Node.js**, and **MySQL** database with responsive design patterns and robust security features.
- Optimized response times by **30%**, migrated legacy systems to modern frameworks (reducing technical debt by **40%**), and improved overall maintainability through comprehensive code refactoring and documentation.
- Designed **RESTful APIs**, implemented **CI/CD** pipelines with **Jenkins** and **Docker**, cutting release cycles by **50%**, and collaborated on microservices architecture for enhanced scalability, performance, and reliability.

Associate Software Engineer – Accenture, Noida, India

Aug 2021 – Nov 2022

- Improved query efficiency by **30%** through optimized database queries, implemented responsive design patterns, and enhanced overall platform reliability.
- Enhanced code quality with **unit/integration** tests achieved **90%** coverage and code reviews, decreasing production bugs by **30%**. Implemented automated testing protocols and assisted developers in maintaining coding standards.

Tools & Technologies

- Software Development :** Python, Java, Scala, JavaScript, React, HTML, CSS, Spring Boot, Node.js, Express.js
- Databases & Big Data Technologies:** MySQL, PostgreSQL, Hadoop, Apache Spark
- Cloud, DevOps & Tools:** Docker, Kubernetes, Kafka, GitHub Actions, Jenkins, Git, AWS

Key Projects

NextMeal: Restaurant Discovery Platform | React, NodeJS, SpringBoot, LLM, Redis, Elasticsearch, FAISS Dec 2024

- Developed a scalable platform with an AI assistant utilizing **Retrieval-Augmented Generation (RAG)** and **FAISS** to deliver personalized restaurant recommendations and seamless reservation services.
- Implemented a **microservices architecture** with asynchronous **messaging queues**, **Redis caching**, and **Elasticsearch**, reducing query latency and improving system scalability in simulated high-load environments.

CodeQuery: Inspired by Stack Overflow | React, Javascript, HTML, CSS, NodeJS, ExpressJS, MySQL Oct 2024

- Built CodeQuery, a full-stack Q&A app like Stack Overflow using React, Node.js, and MySQL.
- Improved performance with schema optimization, responsive UI, and secure REST API auth.

Unsupervised Machine Learning for Customer Segmentation | PCA, K-Means, NLTK, spaCy Sep 2024

- Used unsupervised machine learning models, including **PCA** & **K-Means**, to analyze & segment customer data.
- Identified distinct customer segments via transaction behavior, enabling effective targeted marketing campaigns.
