PROFESSIONAL EXPERIENCE

UTEST, United States

Quality Assurance Analyst

January 2021 - Present

- Conducted software risk assessments using Python and SQL, identifying key system vulnerabilities and improving product stability. Documented testing procedures and created reusable test materials, improving testing efficiency by 15% through clear Excel templates.
- Collaborated with cross-functional teams to ensure full adherence to safety, quality, and compliance standards. Evaluated product function, performance, and design compliance across multiple releases, using Tableau to present quality and defect-trend insights.
- Performed usability testing on Windows, Android, and iOS devices, helping reduce post-release issues by 10%. Completed detailed documentation and discrepancy reports, improving issue-resolution speed by 20% through streamlined workflows.

USERTESTING, United States

User Experience Analyst

November 2020 - Present

- Completed 100+ usability tests across websites and mobile apps, improving overall product quality.
- Detected 50+ UI/UX defects per cycle, including layout, color, and interaction issues.
- Managed and analyzed test data using Excel and SQL, increasing reporting accuracy by 20%.
- Used Python to identify usability patterns and recurring user-experience issues.
- Tested a wide range of products, including retail apps, shopping apps, tax platforms, and surveys.
- Created Tableau dashboards to present defect trends and usability insights to product teams.
- Reduced developer rework by 15% through early defect detection and clear documentation.
- Provided actionable feedback that supported a global team of 200+ professionals, enhancing communication and product reliability.

HENRY COUNTY DISTRICT ATTORNEY'S OFFICE, McDonough, GA, United States

Victim Advocate/Data Process Analyst

July 2022 - September 2023

- Identified that much of the agency's victim and case information was scattered across multiple systems, leading to gaps in reporting, delays in victim communication, and challenges in tracking case outcomes. I took the initiative to improve how data was collected, managed, and utilized using Excel and SQL. Cleaned and organized information to ensure accuracy and consistency by 40%. I designed and maintained new databases using Excel, and SQL that streamlined the monitoring of case outcomes.
- Consolidated data from 4 different systems. I built Excel based dashboards and automated formulas that helped leadership track victim contact timelines, compensation progress, and case outcomes with greater clarity.
- My work with the Georgia Victims Compensation Program further reduced compensation processing delays by 30%, ensuring victims received timely updates and consistent support throughout their cases. Increased case tracking and victim communication efficiency by 45%, reducing delays and significantly enhancing overall victim satisfaction.
- I resolved issues for an average of 50-60 clients per day, ensuring timely and accurate support. These improvements positively impacted over 2,000 employees within the company and gave the agency greater visibility into case trends and resource needs, directly supporting more effective service delivery to clients.

PLAYTESTCLOUD, United States

Performance Analyst

January 2021- November 2021

- Conducted 100+ game tests across multiple genres, evaluating performance, usability, and gameplay mechanics.
 - Analyzed performance data on latency, connectivity, and frame rates using Excel and Tableau, improving QA efficiency.
 - Identified critical issues including lag spikes and frame drops, providing actionable recommendations that improved game stability.
 - Delivered usability insights that guided feature design and enhanced player experience before release.
 - Supported a global team of 100-150 testers per game, ensuring smooth coordination and effective QA operations.
 - Streamlined testing workflows and data reporting, reducing QA cycle times and enabling faster developer feedback.
-

EDUCATION

VEER NARMAD SOUTH GUJARAT UNIVERSITY , Gujarat-India- MSc Information Technology
