Aldie, VA | 5716269595 | ankita17gaur@gmail.com | www.linkedin.com/in/ankitagaur17

Work Authorization: H4 Employment Authorization Document (EAD) Holder which allows me to legally work in the United States.

Professional Summary

Clinical Data Management professional with over 7 years of experience in managing diverse clinical trials across phases I to III. Expertise spans all trial stages including start-up, conduct, and close-out activities. Proficient in multiple EDC platforms, such as Medidata Rave, RaveX, Datalabs, and Clinbase.

Strong understanding of ICH /GCP guidelines, 21 CFR part 11 and FDA regulations. Additionally, my background includes project management experience, handling day-to-day operational aspects of programs and projects, including planning timelines, resourcing, and budgeting. Demonstrated excellence in communication and collaboration with cross-functional teams and stakeholders.

Skills & Abilities

- Guidelines for Good Clinical Practices and the Code of Federal Regulations/ICH Guidelines
- Expertise in clinical data management systems (CDMS) such as Medidata Rave, RaveX, Datalabs and Clinbase
- Discrepancy management
- Dictionary coding MEDRA and WHO Drug
- Utilized HP ALM (Application Lifecycle Management) and qTest tool for UAT (User Acceptance Testing)
- Laboratory data review and maintenance
- Data retrieval/Data Listings, Vendor Reconciliation & SAE Reconciliation
- Proficient in Microsoft word, Excel, PowerPoint and Project
- Quality Control (Q.C)
- Effective communication and collaboration abilities
- Leadership and team management skills
- Project management skills
- Training and mentoring

Experience

IQVIA, Senior Clinical Data coordinator
India, Mar 2021- Aug 2023

- Serves as the primary Data Management interface for internal project teams and external vendors, ensuring compliance with study protocols, GCP, ICH Guidelines, and company SOPs, resulting in a 15% increase in trial efficiency and a 98% adherence rate.
- Lead and managed end to end data management activities ensuring the adherence to the project timelines and quality standards.
- Reviewed and/or approved the study documents such as Data Management Plan, CRF design, Data Validation Specification, Protocol Deviation Specification, CRF Completion guidelines, Data cleaning plan, data transfer specifications (DTS/DTA), SAE Reconciliation plan and other study documents.
- Participated in all project aspects: defining requirements, scheduling, resource allocation (managed a team of 10), implementation, client engagement (handled 5 major clients), risk mitigation and budget estimation.
- Mentored and trained staff in clinical trial conduct, protocol requirements, communication, and management to ensure high standards of proficiency and precision.
- Delegated tasks to team members, ensuring effective distribution of responsibilities and optimal utilization of team members' skills and strengths.

- Orchestrated a quarterly cross-training program to upskill 10 clinical data analysts, resulting in a team performance hike of 30%.
- Managed clinical trials ensuring cross functional collaboration with programmers, medical coding team, Developers, safety team, statisticians, clinical operations staff, medical monitors, vendors and external laboratories to ensure that the project timelines and deliverable are met consistently.
- Reviewed all external data reconciliation trackers and provide resolution comments to the vendor.
- Executed UAT of data entry screens, listings, and edit checks using HPALM Tool by developing and executing comprehensive test scripts to validate data accuracy and functionality.
- Actively engaged in research debrief meetings, implemented data management learning, and contributed to actions to improve and maintain the quality and effectiveness of data management processes within the function.
- Formulated a robust data quality management plan and executed comprehensive quality control protocols, including crosschecks and validation scripts, resulting in a 30% improvement in data reliability, a 98% data integrity rate, and a 50% reduction in error rates across multiple studies.
- Proactively identified opportunities for process improvement and efficiency gains within the clinical data management department, leading to increased overall productivity.
- Reduced query resolution time significantly by proactively addressing potential issues during the CRF design phase.
- Ensured timely delivery of accurate clinical trial data by closely monitoring study progress and maintaining up-to-date documentation.
- Managed risks and mitigated potential issues through strategic planning, monitoring, and timely decision making.
- Prepared metrics, review & investigate the trend analysis of studies contributing to enhancement of trial.
- Proficient in filing study documents on the electronic Trial Master File (eTMF), ensuring systematic organization and compliance with regulatory standards and are audit ready.
- Contributed to DM outsourcing strategies and foster long-term relationships with partners to ensure data quality and efficiency through standardized processes.

*Parexel Internationals, Clinical Data Analyst
India, Sep 2017- Oct 2019*

- Developed precise build specifications and data validation specifications for effective database management
- Performed Data cleaning, Discrepancy management, back-end checks and Listings review, External Data reconciliation, SAE Reconciliation, Protocol deviation Review, BIOS log review and other database lock activities emphasizing precision to uphold accuracy and reliability.
- Documented and addressed any errors, omissions, or inconsistencies found during data review and worked with project team both internal and external to resolved issues as needed
- Implemented robust data validation checks that slashed error rates by 25%, significantly elevating data quality for clinical trials.
- Reviewed data to gain understanding and knowledge of the study to accurately assess study status and data quality
- Involved in developing test cases and performed User Acceptance Testing (UAT) for data entry screens and edit check programs.
- Performed data tracking and reviewing for in-house review through use or creation of CRF tracking sheets
- Performed in-house review of CRF for adherence to protocol requirements and project specific requirements
- Enhanced data accuracy by implementing rigorous validation processes and quality control measures.
- Collaborated with cross-functional teams to ensure timely delivery of accurate, high-quality project status reports.
- Represented DM effectively on all assigned studies and programs at relevant meetings.

- Served as DOC (Data Operations Coordinator) for multiple global studies
- Conducted thorough data reviews ensuring accuracy and compliance with protocols
- Performed monthly listings review and reconciliation tasks, documenting activities promptly
- Conducted basic quality control procedures ensuring accuracy, consistency, and regulatory adherence
- Utilized of different reports in RAVE EDC platform for efficient data monitoring and analysis
- Fostered strong communication within the CDM team, building positive working relationships
- Diligently addressed and resolved Data Management (DM) and system queries, conducted monthly data reviews encompassing both manual and SAS listings, managed page status changes following DM reviews, and ensured the secure locking of casebooks in compliance with regulatory standards
- Actively engaged in communication with key stakeholders, including Data operation Coordinator Control (DOC), Data Team Lead (DTL), and Managers, to discuss potential out-of-scope work, risks to deliverables, and concerns related to process efficiency and value addition
- Performed QC activities to uphold data quality standards

Therapeutic Area & Experiences

Infectious Disease vaccine, Hematology, Vaccine, Respiratory, Inflammation, Cardio renal, Oncology and Early Phase trials.

Education

- BANGALORE UNIVERSITY, INDIA, Jul 2014
Master of Science in Microbiology
- PANJAB UNIVERSITY, INDIA, Oct 2011
Bachelor of Science in Microbial and Food Technology

Awards & Achievements

- Awarded for significant contribution towards customer delivery.
- Acknowledged for effective leadership in managing cross-functional teams and fostering collaboration, leading to improved project outcomes.
- Successfully trained new team members, enabling them to quickly adapt to their roles and make significant contribution to project outcome
- Recognized for Excellence in Data Quality Improvement Initiatives. Received client satisfaction award for consistently exceeding client expectations, maintaining strong relationships, and delivering high-quality project deliverables.
