

ANKIT NAVADIYA

Data Analyst

412-376-7006 | Ankitnavadiya144@gmail.com | PA

SUMMARY

Data Analyst with 4+ years of experience in Python, SQL, and Tableau, delivering predictive models and dashboards that boosted efficiency by 30% and ROI by 50%. Proficient in AWS, Apache Spark, and machine learning (Scikit-learn, TensorFlow), with expertise in automating workflows and translating insights into strategic decisions. Adept at Agile collaboration, driving 25% better business outcomes.

SKILLS

Programming & Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL, Tableau, Power BI, Google Data Studio, Plotly, Snowflake

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, Predictive Modeling, Customer Segmentation

Cloud & Big Data: AWS (Redshift, SageMaker), GCP (BigQuery), Azure, Apache Spark, Databricks, Hadoop

Databases: MySQL, PostgreSQL, MongoDB, SQL Server

Analysis & Automation: ETL Processes, Apache Airflow, Data Wrangling, Statistical Analysis, ROI Analysis

Soft Skills: Data Storytelling, Cross-Functional Collaboration, Agile Methodologies, Problem-Solving

EXPERIENCE

Lathia Investments LLC, PA | July 2024 - Current | Data Analyst

Client: UnitedHealth Group, PA

- Cleaned and preprocessed healthcare datasets using Python and Pandas, improving data accuracy by 20% for analytics.
- Built Tableau dashboards to visualize patient trends, accelerating stakeholder decisions by 30%.
- Optimized SQL queries in MySQL, cutting report generation time by 15% for operational teams.
- Developed Scikit-learn predictive models to prioritize patient care, enhancing outcomes by 10%.
- Automated workflows with Apache Airflow, reducing manual processing time by 25%.

Neon IT Systems, India | May 2018 - Aug 2022 | Data Analyst

- Processed terabyte-scale datasets 40% faster using Apache Spark and Databricks for real-time analytics.
- Deployed TensorFlow models for customer segmentation, increasing marketing campaign accuracy by 18%.
- Created Power BI visualizations for IT performance metrics, reducing decision-making latency by 22%.
- Optimized AWS storage for unstructured data, saving 15% in costs while ensuring scalability.
- Streamlined ETL processes with Azure and RapidMiner, boosting data availability by 35%.

PROJECTS

E-Commerce Marketing Campaign Optimization (Python, SQL, Tableau)

- Analyzed 500K+ rows of campaign data from Facebook Ads, Google Ads, and email marketing.
- Identified Facebook Ads as the top-performing channel for millennials (25–34 age group).
- Reallocated 40% of ad budget to high-performing channels, boosting ROI from 1:4 to 1:6.

Customer Churn Prediction Model (Python, Scikit-learn, Tableau)

- Built a logistic regression model (85% accuracy) to flag at-risk customers using transaction history and engagement data.
- Created a Tableau dashboard to visualize churn drivers (e.g., low engagement in first 30 days).
- Designed targeted retention campaigns (e.g., personalized onboarding emails).
- Reduced churn by 15% within 3 months.

EDUCATION

Master of Science in Management Information Systems

May 2024

Robert Morris University (RMU), Moon Township, PA

Bachelors in Chemical Engineering

May 2014

Gujarat Technological University (GTU)
