## Summary

Business Analyst with experience translating data into strategy across analytics, product, and operations. Skilled in requirements gathering, KPI development, and process optimization using SQL, Python, Tableau, and Agile methods. Known for improving efficiency and driving measurable results through structured problem-solving, cross-functional alignment, and data storytelling.

## Education

DePaul University, Chicago IL

September 2023 – June 2025

Master of Science, Business Analytics | GPA : 3.96 / 4

Mumbai University, Mumbai India

May 2018 - March 2021

Bachelor's in Management Studies (Marketing Major) | GPA : 7.49/10

## Core Skills

- **Business Analysis:** Requirements Elicitation, Stakeholder Analysis, Business Process Modeling, Gap Analysis, KPI Design, Solution Assessment
- **Data & Analytics:** SQL, Python (pandas, scikit-learn), Tableau, Power BI, Looker, AWS (S3, Glue, QuickSight), Excel (Advanced), A/B Testing
- **Methodologies:** Agile/Scrum, Waterfall, Business Process Re-engineering (BPR), Design Thinking
- **Tools:** Jira, Confluence, Visio, Lucidchart, Miro, Alteryx, R, SAS
- **Soft Skills:** Stakeholder Communication, Data Storytelling, Collaboration, Adaptability, Presentation

## Work Experience

Business Analyst

April 2021 - May 2023

Mohan Footwear

Mumbai, India

- **Drove 72% of company revenue growth** by partnering with sales, logistics, and procurement to design a global export strategy, defining KPIs and dashboards that guided decision-making across 3 markets.
- **Increased warehouse productivity by 15%** by building real-time Tableau dashboards and automating inventory tracking, reducing delays in fulfillment cycles.
- **Boosted quarterly sales by 18% and cut stockouts by 30%** through data-driven pricing and demand analysis using Python and SQL.
- **Optimized working capital** by creating predictive reorder and forecasting models with Python and Excel, leveraging prompt-engineering automation to refine data pipelines.

Business Analyst Intern

September 2021 - March 2022

Disprz

Mumbai, India

- **Reduced manual reporting time by 80%** by automating product KPI dashboards and onboarding metrics in Tableau and Python.
- **Improved customer satisfaction by 20%** after leading a root-cause analysis of onboarding delays, mapping processes in Lucidchart, and implementing streamlined workflows.
- **Converted data insights into actionable PRDs and feature updates** by collaborating with engineering and product teams under Agile sprints using Jira.
- **Enhanced vendor evaluation and selection efficiency by 15%** through standardized KPI frameworks that directly contributed to a 30% revenue increase from partnerships.

## Projects

Churn Prediction & Customer Segmentation Label Master Capstone Project

- Built predictive churn models in Python and SQL to identify high-value customer segments, generating retention recommendations worth **\$60M** in potential revenue impact.
- Designed interactive Tableau dashboards to visualize churn drivers and influence strategic marketing decisions.

AWS Analytics Pipeline

- Created a **serverless data pipeline (AWS S3, Glue, QuickSight)** to track streaming platform engagement metrics, delivering insights that guided content acquisition strategy and roadmap planning.

Citi Bike Optimization

- Developed regression and SQL-based demand forecasting models and **A/B tests** to optimize resource allocation, reducing idle inventory and improving utilization rates across NYC stations.

## Certifications

- IBM Generative AI – Prompt Engineering
- AWS Cloud Practitioner Essentials
- Salesforce Admin Beginner
- Data Science Bootcamp
