203 - 410-7340 | cherukuriankitha@gmail.com |

<https://www.linkedin.com/in/cherukuri-ankitha-034991213/>

Ambitious Information Science student with expertise in data analysis, system design, and process improvement. Skilled in Python, C++, Power BI, and Tableau, focused on creating impactful, tech-driven solutions to enhance business performance and streamline operations.

---

## PROJECTS

### AI Powered Diabetics prediction System

Jan 2025 - May 2025

- Built a data science pipeline for diabetes prediction using Python, Pandas, Scikit-learn, and SHAP with 85% accuracy.
- Applied Random Forest and Logistic Regression models.
- Performed data cleaning, feature engineering, model tuning, and interpretability analysis.
- Developed a Flask web app and Power BI dashboard to deliver real-time predictions and insights for healthcare professionals.

### Sales Performance Analysis (Power BI)

Dec 2024 - Jan 2025

- Developed Power BI dashboards to analyze sales trends, KPIs, and revenue forecasts.
- Integrated multiple data sources for accurate reporting and insights.
- Provided actionable recommendations based on data analysis to improve sales performance.

### Hospital Management System (C++)

Jan 2024 - May 2024

- Developed and implemented a C++ based hospital management system to assist doctors and nurses in managing patient records and operations.
  - Designed functionalities for patient registration, appointment scheduling, follow-up tracking, and history management (illnesses, medications, and visit records).
- 

## INTERNSHIP

### Manufacturing Process Design Intern

Jan 2022 - May 2022

- Designed and simulated washing machine manufacturing processes at National Institute of Technology Kurukshetra, Siemens Centre of Excellence to optimize production efficiency.
  - Analyzed assembly line workflows and resource allocation, using simulation tools to identify and resolve bottlenecks.
- 

## EDUCATION

### Master of Science in Information Science

University of New Haven ,New Haven

Aug 2023 - May 2025

### Bachelor of Science in Production and Industrial Engineering

National Institute of Technology(Kurukshetra),India.

Aug 2019 - June 2023

## SKILLS

- Languages:- Python, c, c++.
- Data Visualization and Analytics:- Tableau, Power BI.
- Data Science & Analytics :- Rstudio
- Tools:- Figma, MS Office Suite (Word, Excel, and PowerPoint),
- Soft Skills:- Great written and verbal communication, Entrepreneurial spirit, Leadership experience
