Summary — Results-driven Data Analyst with 4+ years of experience in Capital markets, Financial analytics, Process validation, and Business needs analysis, with proven expertise in ETL workflows, data manipulation and engineering using SQL and Python. Ability to translate cCustomer/Stakeholder requirements into actionable project plans. Dedicated and hard-working with a passion for Big Data, ML.

Skills

Programming: Python, SQL, Pandas, Numpy, Postgres, tableplus

Financial Tools: Quantitative Analysis, Risk Management, Technical Analysis, Reuters, Refinitiv Eikon, Bloomberg Terminal

Data Visualization: Power BI, matplotlib, plotly, Retool

Miscellaneous: Excel, Critical Thinking, Problem Solving, Google Sheets/Docs/Slides

Working Experience

Forta

Jan 2025 – Present

Data Engineer

- Developed and maintained custom data visualizations using **Retool**, enabling business teams to interact with complex datasets through user-friendly interfaces and real-time insights.
- Wrote optimized SQL queries in **Postgres** to extract, manipulate, and analyze large datasets, ensuring high performance and accuracy of data operations.
- Leveraged basic **JavaScript** to integrate SQL queries seamlessly within Retool, automating workflows and ensuring smooth data visualization and reporting.
- Troubleshoot and resolved data discrepancies by identifying underlying issues in SQL queries, optimizing query performance to reduce data processing time.
- Assisted in the integration of various data sources, improving the reliability and consistency of business-critical data used for reporting and decision-making.

Futures First Info Services Pvt. Ltd - Kolkata

Jul 2019 – Dec 2024

Financial Analyst

- Specialized in developing and executing quantitative trading strategies across US and Eurozone (European) fixed income markets, particularly focusing on Forward Rate Agreements.
- Developed an in-house application *Insight*, a SQL-driven tool integrating Python (NumPy and Pandas) for data visualization and real-time reporting.
- Combined multiple data sources (SQL databases, APIs like Reuters Eikon) to create unified datasets, enabling seamless analysis for trading desk operations.
- Delivered insightful visualizations and dashboards for key stakeholders, emphasizing trends and data-driven strategies.
- Identified and monitored key market trends and developments to assess their impact on business performance.

Education

Indian Institute of Technology (ISM) Dhanbad

Jul 2015 – Jul 2019

Bachelor of Technology in Electronics and Communication Engg

CGPA: 8.51

Certifications

- SQL for Data Science, University of California Davis (Coursera)
- Machine Learning, Stanford University (Coursera)
- Programming for Everybody (Python), University of Michigan (Coursera)
- Intro to Descriptive Statistics (Udacity)
- Deep Learning, Andrew Ng (Coursera)

Accomplishments

- Improved data processing efficiency by 15% through automated ETL pipelines.
- Deployed the in-house *Insight* application resulting in a 30% improvement in prediction and outcomes in US Markets along with faster data-driven trading decisions.
- Integrated disparate datasets from SQL databases and APIs, building consolidated platforms for seamless analysis and reporting.
