Professional Summary

Detail-oriented and results-driven Data Analyst with 4+ years of experience delivering actionable insights through advanced analytics, data visualization, and automation. Proven expertise in transforming large-scale raw data into compelling dashboards and reports that guide strategic decisions. Skilled in SQL, Python, Power BI, Tableau, and Excel, with a deep understanding of statistical methods, business intelligence, and predictive modeling. Proficient in using cloud platforms like AWS, Azure, and GCP for scalable data processing. Adept at collaborating with cross-functional teams, including stakeholders, engineers, and executives, to gather requirements, build data pipelines, and deliver impactful business outcomes. Experienced in working with structured and unstructured data, data cleaning, and anomaly detection. Passionate about leveraging data to solve complex business problems in fast-paced, data-driven environments. Currently pursuing a Master's in Data Analytics Engineering at George Mason University (May 2025). Committed to continuous learning and staying ahead of analytics trends.

Technical Skills

- **Languages & Libraries:** SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), R (basic), DAX, Excel VBA
 - **Visualization Tools:** Power BI, Tableau, Looker, Google Data Studio, Excel (PivotTables, Macros)
 - **Databases:** MySQL, PostgreSQL, Snowflake, SQL Server, BigQuery, MongoDB
 - **Cloud & Big Data:** AWS (Redshift, S3, Athena), Azure (Data Factory, Synapse), GCP (BigQuery, Cloud Functions)
 - **ETL & Data Pipelines:** SSIS, Alteryx, Airflow, dbt (basic), Talend, Informatica
 - **Data Processing:** Apache Spark (PySpark), Hadoop, Kafka (basic), Azure Databricks
 - **Machine Learning:** Scikit-learn, Linear Regression, Classification, Clustering (basic)
 - **Data Governance:** HIPAA, GDPR, PII Masking, Data Quality Audits, Metadata Management
 - **Reporting & Automation:** Python Automation Scripts, Excel VBA, Power Query, Report Scheduler
 - **Project & Workflow Tools:** Jira, Confluence, Git, Notion, Slack, Trello, Agile/Scrum
 - **Others:** Swagger, Postman, REST APIs, JSON, XML, Business Requirements Gathering
-

Professional Experience

Jackson Financial, USA

Data Analyst

Jan 2025 – Present

- Developed Power BI dashboards and SQL reports to monitor financial KPIs, customer churn, and policy retention metrics.
- Automated recurring ETL processes using Python and Azure Data Factory, improving data refresh cycles by 40%.
- Partnered with business teams to translate objectives into measurable data strategies and implemented BI solutions.
- Created dynamic Tableau visualizations highlighting operational inefficiencies, leading to 15% cost reduction.
- Cleaned and transformed large datasets from Snowflake and AWS S3 to support quarterly forecasting models.
- Conducted root cause analysis and identified data discrepancies, improving data quality across departments.
- Built predictive models using regression analysis to forecast customer behavior and optimize marketing spend.
- Streamlined SQL workflows and optimized complex queries, reducing load time by 30%.
- Integrated financial, CRM, and customer service data to provide a unified analytical view across business units.
- Designed executive dashboards used by senior leadership to track YOY trends and OKRs.
- Conducted AB testing and statistical evaluations to measure campaign effectiveness.
- Trained interns and junior analysts on SQL best practices and data visualization principles.
- Maintained documentation of KPIs, data dictionaries, and standard operating procedures.

KPIT Solutions, India

Data Analyst

Feb 2020 – Jul 2023

- Led data analytics projects for global clients by extracting insights from complex datasets using SQL and Python.
 - Built dashboards using Tableau and Power BI to visualize supply chain performance and reduce inventory waste.
 - Collaborated with cross-functional teams to gather business requirements and convert them into technical specs.
 - Designed automated data pipelines using Alteryx and SSIS for real-time and batch processing.
 - Conducted anomaly detection and flagged operational risks using Python-based models.
 - Delivered reports and insights to senior managers on a weekly basis, improving decision-making speed.
 - Performed root cause analysis and data audits, improving reporting accuracy by 25%.
 - Used regression and clustering techniques to segment customers and personalize product recommendations.
 - Created and maintained large SQL databases to support daily operations and ad hoc analysis.
 - Developed macros and Excel automation tools, saving 100+ hours/month in manual reporting tasks.
 - Ensured all analytics operations complied with client-specific data privacy and security guidelines.
 - Participated in Agile sprints, presented work in daily standups, and collaborated via Jira and Confluence.
 - Wrote clean, scalable queries and maintained data transformation logic for ETL documentation.
-

Education

Master's in Data Analytics Engineering

George Mason University, Fairfax, VA

May 2025

Certifications

Google Data Analytics Professional Certificate – Coursera (In Progress)

Covered: Data Wrangling, Data Visualization (Tableau), Data-Driven Decision Making, SQL, Case-Based Projects
