SUMMARY

Results-driven Business Analyst with around 4 years of experience specializing in **data analytics, financial analysis, and process optimization** across the **insurance** and **finance** industries. Expert in **automating workflows, fraud detection, advanced risk modeling, and strategic financial reporting** using **Python, SQL, Tableau, and Power BI**. Proven record for driving **operational efficiency** improvements, strengthening **underwriting risk management**, and delivering data-driven insights supporting executive decision-making. Adept at leading cross-functional teams and aligning business strategies with regulatory standards. Passionate about transforming complex data into actionable insights that deliver measurable value in **dynamic, high-growth environments**.

SKILLS & EXPERTISE

- Languages & Operating System & Methodologies:** Python, SQL, R, Windows, Linux and Mac OS, Agile, Scrum, Waterfall, SDLC
- Project Management & Tools:** MS Project, MS SharePoint, MS Visio, Jira, Confluence, Smartsheet, Lucidchart
- Data Analytics & Visualization:** Excel (Advanced Formulas, VBA, Pivot Tables), Tableau, Power BI, Figma, Roadmap
- Business Analysis:** Business Requirements Gathering, Use Cases, User Stories, Requirements Traceability Matrix (RTM), Data Modeling, Business Intelligence, FRD, BRD, SRS, Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
- Tools, Testing & Data Integration:** SAP, Oracle, UAT (User Acceptance Testing), Test Cases, JAD (Joint Application Development)
- Finance:** Financial Reporting, Regulatory Compliance, Investment Analysis, Cost/Benefit Analysis, Risk Analysis, Valuation Models
- Insurance:** Claims Analysis & Management, Policyholder Analytics, Risk Assessment, Fraud Detection, Underwriting Analysis
- Capital Markets:** Portfolio Management, Asset Allocation, Trading Systems, Regulatory Compliance
- Soft Skills:** Project Management | Product Management | Stakeholder Management | Problem-Solving | Critical Thinking | Communication & Presentation | Leadership | Decision-Making | Documentation

WORK EXPERIENCE

- AIG, USA | Business Analyst**

Jan 2024 – Current
- Automated Claims Data Analysis:** Pioneered the development of an automated claims analysis system utilizing Python, cutting manual processing time by 40% leading to data precision, enhancing **operational efficiency** and speeding up claims resolution.
 - Fraud Detection & Advanced Risk Modeling:** Engineered a sophisticated fraud detection model leveraging SQL and Python, identifying 20% more fraudulent claims by analyzing historical data patterns, anomaly detection, and predictive modeling techniques, improving **underwriting risk management** and reducing losses due to fraudulent claims.
 - Financial Analytics Dashboard for Strategic Insights:** Designed a robust Tableau dashboard & PowerPoint, seamlessly integrating policyholder growth trends, claims ratios, and risk indicators, which became a critical tool for senior management in shaping data-driven strategic decisions directly influencing **investment strategies** and improving financial forecasting.
 - VBA-Powered Claims Processing Automation:** Developed a VBA-based financial modeling tool, automating claims cost forecasting and reducing processing errors by 30%, thereby enhancing reporting accuracy and operational efficiency across departments, **improving budgeting** and **cost control** in claims management.
 - Cross-Functional Collaboration & Agile Data Governance:** Spearheaded cross-functional collaboration between underwriters, actuaries, and IT teams to refine data governance frameworks and ensure alignment with regulatory reporting standards, boosting compliance and reporting consistency.

- 7FinCorp Group, India | Business Analyst**

Feb 2020 - Jul 2022
- PowerBI Dashboards for Financial Insights:** Designed and launched PowerBI dashboards to track KPIs such as **revenue growth, claims ratios, and customer churn**. Enabled a **15% increase in client retention** and contributed to a **12% quarterly revenue growth**.
 - ETL Process Automation:** Automated ETL workflows using SQL, cutting manual data processing time by **28%** and improving **data accuracy**, supporting timely **risk reporting** and **regulatory compliance**.
 - KPI Reporting Optimization:** Revamped KPI reports for senior stakeholders, reducing report generation time by **20%** and improving data reliability by **15%**, enabling faster decision-making for **investment strategies**, financial and operational analysis efficiency.
 - JAD Sessions for System Alignment:** Led **8+ JAD sessions** with cross-functional teams to align business and technical requirements for a **claims management system**, reducing system downtime by **25%** and improving processing accuracy by **20%**.
 - Documentation:** Developed Business Requirement Documentation(**BRD**) and Functional Requirement Documentation (**FRD**) for a **fraud detection system**, ensuring a **30% improvement** in fraud detection efficiency and reducing **fraudulent claims by 25%**.

EDUCATION

Zicklin School of Business, Baruch College, City University of New York (CUNY), New York, USA
Master of Science in Business Analytics, Specialization: Data Analytics
Coursework: Managerial Statistics| Database Management | Decision Models| Web Analytics | AWS Cloud Services| Data Mining |Software Analysis| Big Data |Systems Analysis and Design| Business Capstone Project | International Marketing | Financial Accounts

ACADEMIC PROJECTS

- Netflix Movie Recommender System Project | Project (Python, Pandas, NLTK, Scikit-Learn) Jan 2023**

 - Engineered a Netflix movie recommender system by implementing text mining and NLP techniques for accurate genre matching and personalized recommendations.
 - Optimized the algorithm’s performance to deliver efficient user-friendly results, demonstrating adaptability to user preferences.
- Efficient Market Hypothesis Testing Using ARIMA and VAR Model | Project (Python, Statsmodels) May 2024**

 - Applied ARIMA and VAR models to test the Market Hypothesis, achieving robust model fit with minimal autocorrelation.
 - Conducted in-depth analysis of financial time series data, identifying correlations and potential arbitrage opportunities.
 - Utilized data warehouse technologies to consolidate and analyze diverse data sources.
