

ANMOL SINGHAL

anmolsinghal447@gmail.com | (303) 596-5436 | Open to Relocate | Denver, Colorado, 80203 | USA | [GitHub](#)

Professional Summary

- Software Engineer with hands-on experience in full-stack web development, delivering secure, scalable applications using Java, React.js, Spring Boot, Node.js, and MySQL/PostgreSQL.
- Developed and deployed a production-grade POS system handling 16K+ monthly transactions and real-time dashboards, reducing manual reporting time by 80%.
- Proficient in backend architecture, REST API development, database design, and ORM frameworks (Hibernate), with strong SQL and NoSQL expertise.
- Experienced in DevOps and testing, implementing CI/CD pipelines (Jenkins, Git), achieving 70% backend test coverage with Junit.
- Built responsive, component-based frontends with React.js, Bootstrap, and JavaScript, enabling real-time user interaction.
- Worked in Agile environments, managing sprints in Jira, conducting code reviews, and collaborating with cross-functional teams.
- Committed to learning, pursuing certifications in AWS, and full-stack development covering Node.js, Express.js, and MongoDB.

Education

Masters in computer science

Aug 2023 - May 2025

University of Colorado Denver, **GPA: 3.97/4**

Denver, USA

Courses: Fundamentals of Computer Science, Software Development, Data Science, Deep Learning, NLP & Gen AI

Bachelors in information technology

July 2018 - May 2021

University of Mumbai, **GPA: 3.89/4**

Mumbai, India

Work Experience

Software Developer – Milo's Market

Nov 2023 – Present

University of Colorado Denver | Java, React.js, Spring Boot, Hibernate, MySQL, Jenkins, Git

USA (On-site)

- **Accelerated feature release speed by 70%** by architecting and delivering a full-stack POS system (Java, React.js, MySQL), replacing the legacy Fusion platform and streamlining pantry operations.
- **Reduced manual reporting time by 80%** by developing real-time dashboards in React.js powered by Spring Boot APIs and MySQL.
- **Processed 16,000+ transactions/month** via secure REST endpoints (Spring Boot, JWT) with a React.js UI serving 1000+ users/week.
- **Improved data integrity and query performance** by designing a normalized MySQL schema and integrating Hibernate ORM.
- **Achieved 70% backend test coverage** by writing unit and integration tests with JUnit, reducing regression bugs and improving release stability, **automated testing and deployment via CI/CD pipelines (Jenkins, Git)** for zero-downtime delivery.
- **Secured the platform** by implementing firewalls, SSH and network hardening in collaboration with the College IT team.
- **Delivered full-stack ownership** as the sole developer, managing architecture, implementation, testing, DevOps, and support.

Software Engineer Intern

Jan 2025 – May 2025

Agilebeat Inc. | Swift, ARKit, Reality Kit & Composer, Xcode, Git, Jira

USA (Remote)

- **Managed the full development lifecycle by leading Agile sprints in Jira and maintaining the Git/GitHub codebase** with effective branching, pull requests, and code reviews, ensuring seamless collaboration and high-quality deliverables.
- **Built real-time multi-sensor fusion pipelines** in Swift using ARKit and RealityKit, enabling gaze-based interaction and accurate object/image tracking in immersive environments.

Data Engineer

July 2021 – Aug 2023

Deloitte | SQL, Java, Talend, Kafka, Informatica PowerCenter, REST APIs, ICEDQ, ALM, Jira

India (Hybrid)

- **Promoted to Data Engineer within 12 months** for driving SIT execution, automation, and **end-to-end ETL pipeline** ownership.
- **Orchestrated 10+ Java-Talend ETL pipelines** ingesting **70K+ weekly records** from **Reltio MDM via REST APIs and Kafka**, improving data ingestion performance and **reducing system load by 15%**.
- **Enhanced 10+ SQL-based Informatica PowerCenter workflows** integrating **SAP, and Concur datasets** across **50+ global markets**, improving **data consistency by 30%**.
- **Drove SIT and UAT testing efforts** for 20 major data integrations (6 complex), executing **300+ ALM test cases**, conducting **front-end UI testing for 2 market** launches, and ensuring **zero critical defects in production**.
- **Automated data quality checks** using ICEDQ and 25+ SQL scripts (joins, subqueries, aggregations), **cutting regression testing time by 20% per release**.

- **Collaborated with clients, BAs, and onshore teams** to gather requirements, plan test scenarios and secure signoffs and refined ETL workflows under **Waterfall (initial phase)** and **Agile (post-promotion with Jira)**.
- **Co-led event strategy team of 10** and execution for the Pfizer account, **organizing 7 large-scale events** across multiple locations for **500+ employees**, driving team cohesion, cross-functional engagement and facilitated monthly leadership calls with 50+ managers.

Certifications

AWS Fundamentals Specialization Coursera	in Progress
The Complete Full-Stack Web Development Bootcamp Udemy	Aug 2025
Topics: HTML5, CSS3, JavaScript (ES6), Node.js, Express.js, React.js, PostgreSQL, MongoDB, REST APIs, Git, Web3 & Blockchain Basics	

Projects

Full-Stack ToDo Web App | Node.js, Express.js, MongoDB, EJS, REST APIs, Git, Heroku

- Built a full-stack CRUD app with secure login using sessions and bcrypt, enabling users to manage tasks across sessions.
- Designed RESTful API routes for task management, integrated MongoDB for persistence, and deployed to Heroku.
- Implemented responsive UI with EJS templates and Bootstrap; added features like priority filters and completion tracking.

Railway Ticketing Web Application | HTML5, PHP, MySQL, JavaScript, jQuery, Ajax, Stripe, Bootstrap, CSS

- Developed Indian Railways ticket booking system, architecting a normalized 24-table relational database with 15K+ records 500 trains, incorporating cron jobs for automation and data integrity via foreign key constraints.
- Engineered a dynamic seat allocation algorithm simulating Railways logic using complex array manipulation and control flow structures to optimize seat assignment across coach classes and full route traversals, robustly handling edge cases.
- Built RESTful API backend in PHP with frontend (HTML, CSS, JavaScript, jQuery, Ajax) for ticket booking, cancellation, other feature, implemented payment gateway, and developed XML admin dashboard for real-time traffic, schedule.

Professor Student App System | Java, Firebase, Android Studio

- Designed and developed dual Android apps for professors and students using Java, implementing Firebase real-time Database and Authentication to manage login, in class attendance codes, and real-time communication.
- Engineered admin features with backend SQL queries for event-wise aggregation, capacity enforcement, and dashboards.

ERP Home Decor E-commerce Website | PHP, MySQL, JavaScript, HTML, CSS, Bootstrap, Stripe API

- Engineered a full-stack ERP Home Decor e-commerce platform, featuring dynamic product management and secure transaction processing. Developed a robust backend using PHP and MySQL with a normalized database schema.
- Built frontend using HTML, CSS, Bootstrap, and client-side JavaScript for interactive elements, including dynamic product loading and advanced filtering. Implemented a shopping cart with real-time updates and persistent session management.

Awards

Spot Award Deloitte Recognized for automating the testing suite.	May 2022
Applause Award Deloitte Recognized for ETL data pipelines development.	Jan 2023
Scholarship Award University of Colorado Denver Recognized for exceptional work at internship.	Feb 2025
Milo Student Employee Award University of Colorado Denver Recognized for application development.	May 2025

Skills

Languages: Java, JavaScript (ES6), Swift, SQL, PHP, HTML5, CSS3, Python, Bash	
Frontend: React.js, Bootstrap, EJS, jQuery, Ajax, CSS Media Queries, DOM Manipulation, ARKit, RealityKit	
Backend & APIs: Spring Boot, Node.js, Express.js, RESTful APIs, Firebase Realtime DB & Auth, JWT, bcrypt, Stripe API, OAuth2	
Database & Data Modeling: MySQL, PostgreSQL, MongoDB, Reltio MDM, Firebase, Hibernate ORM, Entity-Relationship Modeling, Data Normalization	
DevOps & Deployment: Git, GitHub, Jenkins, Heroku, Xcode, GitHub Pages, CI/CD Pipelines, ServiceNow, Jira, ALM	
Testing & QA: JUnit, ICEDQ, Regression Testing, UAT/SIT Execution, Integration Testing, Manual UI Testing	
Cloud & Tools: AWS (in progress), SAP, Concur, Postman, Unix Command Line, Firebase Console, ALM	
Software Development Practices: Agile (Scrum), Waterfall, Version Control (Git), Code Reviews, CI/CD, Event-driven Architecture, MVC Pattern, Secure Authentication, DSA, OOPS, Visual Studio code, Eclipse
