## EDUCATION

### Wayne State University

*Bachelor of Science in Computer Science, Minor in Business*

Detroit, MI

*Aug. 2016 – May 2020*

## EXPERIENCE

### General Motors

Warren, MI

*Big Data Engineer*

*Mar 2024 – Mar 2025*

- Designed and implemented scalable ETL data pipelines using Azure Data Factory (ADF) and Databricks to ingest, process, and stream real-time data from Azure Event Hubs to internal stakeholders
- Developed Delta Lake tables in Databricks to enable efficient data versioning and time travel for analytics
- Optimized Databricks clusters, workflows, and Azure Data Factory (ADF) pipelines, reducing cloud computing costs by 75% and improving pipeline performance and scalability
- Developed data quality-specific views and Power BI dashboards to proactively monitor pipeline health; integrated Prometheus and Grafana for real-time anomaly detection, ensuring issues are flagged and addressed before affecting downstream partner
- Provided 24/7 production support for data pipelines, serving as the primary escalation contact for downstream partners and quickly resolving data quality and availability issues to ensure uninterrupted delivery of critical datasets

*Software Engineer*

*Nov 2021 – Mar 2024*

- Built and maintained scalable data pipelines using Java, Kafka, Spark Streaming, and Spark Batch for seamless ingestion, processing, and delivery to Hadoop HDFS
- Leveraged Apache Knox and YARN to monitor and troubleshoot Spark jobs, enabling efficient resource utilization and proactive issue resolution in a distributed environment
- Developed RESTful APIs for real-time and batch ingestion from Kafka using Spark, ensuring consistent and reliable data pipelines
- Implemented Grafana and Prometheus for real-time proactive infrastructure monitoring and alerting, reducing support escalations by 60% and improving overall system reliability
- Deployed applications across two data centers, providing round-the-clock production support and resolving issues via ServiceNow tickets

*Technical Business Analyst*

*Nov 2020 – Nov 2021*

- Migrated legacy SAS processes to Python, cutting manual workload and improving maintainability
- Designed and executed targeted marketing campaigns using Adobe Campaign and SAS, leveraging Oracle databases to enhance customer engagement for GM Card and CRM/PDM initiatives
- Developed interactive data visualizations in Power BI to analyze GM Card database trends, enabling data-driven decision-making

### Wayne State University

Detroit, MI

*Information & Technology Intern*

*Aug 2018 – May 2020*

- Automated software deployment processes using PowerShell and managed 450+ endpoint devices via Active Directory and SCCM, improving system reliability and deployment efficiency
- Wrote and executed advanced SQL queries in Oracle to manage user access and security group organization
- Contributed to full-stack web application development with Laravel and PHP, including unit and feature testing
- Developed an augmented reality campus tour using Unity and C#, showcasing innovation with Microsoft HoloLens

## TECHNICAL SKILLS

**Languages & Frameworks:** Java, Python, C++, JavaScript, SQL, REST APIs, OOP, Spring Boot, Flask, Node.js, React, HTML/CSS, JUnit

**Backend & Development Tools:** Git, CI/CD, Docker, Jenkins, Kubernetes, Terraform, IntelliJ, Visual Studio, Agile/Scrum, Maven, GitHub Copilot, Azure DevOps

**Databases & Cloud:** PostgreSQL, MySQL, Cassandra, YugabyteDB, Azure, Azure SQL, YARN, Hadoop, Apache Spark

**Monitoring & Testing:** Prometheus, Grafana, Postman, PyTest, Selenium, Power BI

**Machine Learning & Data Science:** TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy, Anaconda
