PROFESSIONAL SUMMARY:

Results-driven Business Analyst with over 6+ years of progressive experience across Capital Markets, Asset Management, Custodial Services, and global financial services domains. Adept at leading cross-functional teams, managing end-to-end project lifecycles, and delivering scalable, data-driven solutions aligned with business goals. Demonstrated ability to work with global stakeholders, gather complex business requirements, and translate them into detailed functional specifications. Strong understanding of investment banking functions Front, Middle, and Back Office paired with expertise in data analytics, SQL, and business process optimization. Recognized for excellent communication, stakeholder management, and leadership in high-impact projects.

- Skilled in gathering and documenting business and functional requirements, transforming them into actionable insights and strategic solutions that align with business objectives.
- Expertise in performing data analysis using SQL, Power BI, Tableau, and Excel, generating meaningful reports and dashboards to support executive decision-making.
- Strong proficiency in Microsoft Dynamics CRM, Salesforce, and ERP systems (SAP, Oracle), optimizing customer relationship management, reporting, and workflow automation.
- Extensive experience in the full Software Development Life Cycle (SDLC), from requirements gathering to system implementation, testing, and post-deployment support.
- Proven ability to conduct GAP Analysis, identify process inefficiencies, and recommend data-driven solutions that drive business transformation and operational improvements.
- Expertise in cloud technologies (AWS, Azure) with hands-on experience in cloud-based data storage, migration, and system optimization.
- Deep understanding of Agile methodologies (Scrum, Kanban) and Waterfall approaches, with expertise in facilitating sprint planning, backlog refinement, and stakeholder meetings.
- Proficient in using business intelligence tools such as Power BI, Tableau, and Google Data Studio for building interactive dashboards, visualizing trends, and tracking KPIs.
- Strong presentation and data storytelling skills, effectively translating complex datasets into meaningful insights for executive leadership and key stakeholders.
- Experienced in managing UAT, test planning, and quality assurance, ensuring that business applications meet functional and performance expectations.
- Strong ability to lead cross-functional teams, mentor junior analysts, and drive continuous improvement initiatives in business operations.
- Adept at managing multiple projects simultaneously, balancing stakeholder priorities, and ensuring timely delivery of data-driven solutions.

TECHNICAL SKILLS:

Testing & Quality Assurance	UAT, Test Planning, Test Case Creation, Defect Tracking, Regression Testing
Cloud & Infrastructure	AWS (EC2, S3, RDS), Azure (Fundamentals), Cloud Data Migration
Programming & Scripting	Python (Pandas, NumPy), R (Basic Data Analysis), Excel VBA

PROFESSIONAL EXPERIENCE:

Role: Senior Business Analyst
CGS INC, New York

March2023-Till date

Responsibilities:

- Leading initiatives in Capital Markets and Asset Management systems modernization for an investment banking client.
- Defined and documented business and functional requirements to support trading, custodial operations, and post-trade settlements.
- Designed Power BI dashboards with real-time data feeds, helping traders and operations teams monitor asset positions and trade anomalies.
- Extracted and analyzed large datasets using SQL for reconciliations and performance metrics reporting.
- Collaborated with market data teams and custodians to improve data accuracy and settlement timelines.
- Conducted workshops with Front, Middle, and Back Office stakeholders to gather process flows and create traceable user stories.

- Acted as the functional lead on multiple high-visibility releases, ensuring compliance with financial regulations.
- Managed cross-functional Agile teams and drove sprint ceremonies, backlog refinement, and UAT activities.
- Worked closely with Data Engineering teams to enhance cloud-based analytics infrastructure on AWS.
- Provided leadership to junior analysts and testers, supporting documentation, training, and knowledge transfers.

Business Analyst/Data Analyst
Visa Austin, TX

Nov. 2020 – Dec. 2022

Responsibilities:

- Supported Investment Operations and Fund Reporting for a leading Asset Management client.
- Developed Power BI and SQL-based reports on fund performance, NAV, asset allocation, and market exposure.
- Gathered requirements from portfolio managers and translated them into BRDs and FSDs.
- Created detailed process flows using Visio and Lucid chart for reconciliations and investor reporting processes.
- Ensured alignment of deliverables with SEC regulations and investment compliance protocols.
- Led UAT, created test scenarios, and validated performance of trading support applications.
- Automated periodic compliance and audit reports using SQL and advanced Excel macros.

Junior Business Analyst/Assistant Team Leader
NI Source, Ohio

OCT 2018 - Aug 2020

Responsibilities:

- Analyzed business operations in the SAP financial module for a global finance firm.
- Spearheaded reporting automation using Business Objects and Excel VBA, reducing manual efforts by 40%.
- Documented and streamlined front-to-back workflows across asset servicing and custodial functions.
- Created SLA dashboards for trade settlement timelines, improving visibility and accountability.
- Coordinated global release cycles, aligning development and QA efforts under tight deadlines.
