

Anshu Pulipati

Data Analyst

anshu@careeremail.net | (856) 526-0878 | USA | [LinkedIn](#)

Summary

Data Analyst with 2+ years of experience in analyzing, transforming, and visualizing data to support business decision-making across IT consulting and enterprise domains. Skilled in SQL, Python, Power BI, Tableau, Excel, Snowflake, and Apache Spark, with experience in building ETL pipelines, statistical models, and interactive dashboards. Proven ability to translate raw data into actionable insights, automate reporting workflows, and optimize data systems on AWS and Azure. Strong expertise in data modeling, forecasting, and KPI development, delivering measurable improvements in reporting efficiency, cost savings, and compliance with HIPAA, GDPR, and SOX

Technical Skills

- **Languages & DA Tools:** Python (Pandas, NumPy, Seaborn, Matplotlib), R, SQL, Excel (Pivot Tables, VLOOKUP, Macros)
- **Visualization Tools:** Tableau, Power BI, Looker
- **Databases:** MySQL, SQL Server, MongoDB, Cassandra, Postgresql
- **Cloud Technology:** AWS (S3, EC2, IAM, RDS, Lambda), Azure, Snowflake
- **Big Data:** Spark, ETL, Data Cleaning, Data Wrangling, Airflow, Alteryx
- **Machine Learning:** Regression, Classification, Clustering
- **Project Management:** Jira, ServiceNow
- **IDEs:** Visual Studio Code, Jupyter Notebook, RStudio, PyCharm
- **Tools:** Git, GitHub, Microsoft Office Suite (PowerPoint, Excel, Word), Power Pivot, Power Query, A/B Testing
- **Soft Skills:** Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Story Telling

Professional Experience

Data Analyst, HCL, USA

09/2024 – Present

- Designed and developed dashboards in Tableau and Power BI to track operations, sales, and finance KPIs with advanced drill-downs and scorecards, reducing manual reporting cycles by 40% and improving executive decision-making speed by 30%.
- Performed comprehensive data profiling, cleansing, and validation using SQL, Python (Pandas), and Excel Power Query, addressing duplicates, missing values, and schema mismatches that improved accuracy of critical business reports by 20%.
- Authored and optimized complex SQL queries, stored procedures, and joins across Oracle and SQL Server databases to generate ad-hoc and recurring reports, cutting query runtime by 25% and enabling faster delivery of compliance and financial reporting.
- Built end-to-end data integration workflows using Python scripts to integrate multi-source customer and finance datasets into Snowflake, reducing reporting latency by 35% and establishing a unified data warehouse for analytics.
- Partnered with business stakeholders to define KPIs, reporting metrics, and dashboard wireframes, translating them into analytical models that improved visibility into operational efficiency and increased reporting adoption across business teams.
- Conducted trend and forecasting analysis in R and Python (time series, regression models) to predict customer churn and sales growth patterns, improving forecasting accuracy by 15% and supporting proactive business planning.
- Automated recurring monthly and weekly reports with Python scripting and Excel VBA, standardizing reporting templates and saving the analytics team over 20 hours per month in manual effort.
- Documented data dictionaries, KPI definitions, data workflows, and reporting standards, which improved knowledge sharing, accelerated onboarding for new analysts by 25%, and ensured alignment across cross-functional teams.

Data Analyst, TCS, India

01/2022 – 07/2023 | Chennai, India

- Extracted, transformed, and loaded datasets from ERP, CRM, and marketing platforms into Snowflake and SQL Server using ETL tools, ensuring data consistency, integrity, and readiness for advanced analytics and reporting.
- Developed Excel models and Tableau dashboards to monitor operational KPIs, project costs, and resource utilization, improving project delivery efficiency by 15% through more informed and effective allocation decisions.
- Performed exploratory data analysis (EDA) in Python to identify operational inefficiencies and revenue leakage, delivering actionable insights that enabled a \$1.2M revenue recovery for a key client.
- Integrated cloud-based data warehouses including AWS Redshift to scale enterprise reporting capabilities, reducing data refresh times from several hours to just minutes and enabling faster decision-making.
- Collaborated with stakeholders to translate complex business requirements into efficient SQL-based solutions, ensuring analytics outputs directly supported strategic objectives and informed high-impact decisions.
- Automated data validation processes using Python scripts and SQL triggers, enhancing monthly report accuracy and eliminating recurring data quality issues across critical business datasets.
- Designed KPI scorecards that aggregated data from multiple business units, improving transparency and providing leadership teams with clear visibility into performance metrics for informed decision-making.
- Standardized reporting templates for client deliverables, reducing manual formatting time by over 20 hours each month and enhancing consistency, accuracy, and overall client satisfaction.
- Collaborated with data engineers to refine data models and schemas, optimizing query performance and significantly improving dashboard load times for a seamless end-user experience.

Education

Master of Science (M.S.) in Computer Science

Rowan University

Bachelor of Engineering (B.E) in Computer Science & Engineering

Sathyabama Institute of Science and Technology

08/2023 – 05/2025

Glassboro, New Jersey, USA

06/2019 – 05/2023

Chennai, Tamil Nadu, India
