

ANSHUL DAVE

Arlington, VA | +1 (240) 784 3575 | anshul@mywebemails.com | [LinkedIn](#)

PROFILE

Seasoned BI engineer with over 3 years of experience in designing, implementing, and managing robust data pipelines and scalable systems. Expertise in Python, R, and SQL, with proficiency in AWS and Azure cloud platforms for efficient data processing and high-performing infrastructure. Strong communicator with excellent team collaboration and project management skills.

SKILLS

Programming Languages: Python, SQL, R, NoSQL, Shell

Frameworks & Tools: NumPy, Pandas, Matplotlib, Flask, Django, Git, GitHub, Docker, CI/CD, Statistics, HTML, CSS, Agile, SAS, Hadoop, Hive, PySpark, ggplot2, Snowflake, Spark, Kafka, HDFS, AWS, Microsoft Azure

Data Analysis/ ETL Tools: Power BI, Tableau, Sterling Integrator, Data Bricks, MS Excel, Google Analytics, Machine Learning, Data Modeling, Data Mapping, Data Mining, ETL Pipeline, Apache Superset

Databases: MS-SQL, MySQL, Redshift, Snowflake, Big Query, PostgreSQL, MongoDB, SparkSQL, Cosmos DB

PROFESSIONAL EXPERIENCE

Affordable Homes & Communities

Remote, USA

Data Engineer

Sept 2024 - Present

- Designed and implemented **ETL pipeline** to integrate data from property management SFTP servers into **Azure Synapse**, enabling real-time dashboards and advanced analytics for tracking financial and operational **KPIs** across estate portfolios
- Analyzed and optimized real estate operations by gathering business requirements, mapping workflows, and designing dynamic dashboards in **Tableau** to monitor **metrics** improving operational efficiency and data driven decision-making across portfolios

IQVIA

New Jersey, USA

Data Engineer

Feb 2024 – Aug 2024

- Designed scalable ETL pipelines using **Databricks** and Airflow to collect, process, and ensure the quality of large-scale healthcare **data** from over 1500 sources, achieving a 90% data accuracy rate and improving **data reliability** for analytics
- Executed data warehousing solutions using **AWS Redshift** and **S3** to store and manage data, supporting a broad range of use cases in analytics, real-world evidence, clinical trials, and MIPS reporting, enabling a 30% reduction in data retrieval time
- Utilized **Power BI** to create over 50 interactive dashboards and reports, leveraging analytics to improve patient outcomes and enhance care quality, increasing compliance with healthcare standards and regulations (HIPAA, GDPR) by 25%

Center for Substance Abuse Research, UMD

Maryland, USA

Data Engineer – Part time

June 2023 – Dec 2023

- Designed data models using **SQL** and **NoSQL** databases to support complex business needs, ensuring **data integrity** across the organization's data ecosystem. Utilized Hadoop, **Spark**, and Kafka, achieving a 95% data consistency rate
- Optimized MySQL scripts and **ETL** workflow, reducing error rate by 12% and increasing data accuracy by 20% through data validation, cleansing, and performance tuning of data systems, enhancing the reliability of automated dashboard
- Derived insights from **extensive datasets** (130,000+ observations) to inform evidence-based policymaking in the public health domain, ensuring compliance with HIPAA regulations, and streamlining the process of policy decision-making

Vexma Technologies

Vadodara, India

Data Analyst

Jan 2020 - Aug 2022

- Collaborated with **cross-functional** teams of production, marketing, sales, and accounting to gather requirements and translate them into robust data solutions, improving interdepartmental collaboration and data utilization by 35%
- Led the migration of legacy data systems to a modern cloud-based data warehousing solution (**Snowflake**), improving data accessibility and reliability, and reducing operational costs by 20%
- Designed and implemented scalable data models and **ETL** processes to support production, inventory, and quality control analytics, resulting in an 18% increase in reporting efficiency
- Developed interactive dashboards in Power BI to visualize key customer metrics and segmentation results, enabling the marketing team to make data-driven decisions and increasing user engagement with dashboards by 40%
- Implemented **statistical models** and machine learning algorithms using **Python** (pandas, NumPy, SciPy) to predict customer behavior and preferences, resulting in a 20% increase in customer retention rates
- Conducted **ad-hoc analyses** and prepared detailed reports to provide insights into customer trends and behaviors, supporting strategic planning and decision-making, and reducing report preparation time by 25%

EDUCATION

Master of Science, *University of Maryland*
Information Systems

08/2022 – 12/2023 | Maryland, USA

Bachelor of Technology, *Nirma University*
Electrical Engineering

07/2016 – 05/2020 | Ahmedabad, India
