SUMMARY

Data Analyst with an M.S. in Computer Science Data Analytics concentration), experienced in SQL, Python, R, and BI tools Power BI, Tableau, Looker) for transforming large datasets into actionable insights. Skilled at building ETL pipelines, dashboards, and KPI reporting, and to support business decisions. Proven success in finance and healthcare environments, uncovering trends, optimizing workflows, and communicating insights to stakeholders through clear visualizations and data storytelling.

EXPERIENCE

Equity Research Data Analyst 09/2024 - Present
Biondo Investment Advisors, LLC Sparta, NJ

- Deliver data-driven insights that shape \$1.2B portfolio decisions by designing pipelines, dashboards, and automated reporting solutions across financial markets.
- Developed SQL and Python pipelines to clean, transform, and analyze structured/unstructured datasets, reducing manual reporting effort by 40%.
 - Created interactive dashboards in Power BI/Excel to monitor biotech and tech sector KPIs, streamlining decision support for \$1.2B AUM.
 - Conducted exploratory data analysis and built performance tracking reports to identify key market trends.
 - Collaborated with cross-functional teams to ensure data integrity, governance, and timely distribution of investment insights.
 - Standardized workflows and documentation, improving reproducibility of analysis and research outputs.
 - Implemented data validation and quality checks across financial and alternative datasets, reducing reporting errors by 25%.
 - Tested and optimized SQL queries and Python scripts to improve pipeline efficiency, cutting average runtime for recurring reports by 30%.

Equity Research Data Analyst - Internship 09/2023 - 09/2024
Biondo Investment Advisors, LLC Sparta, NJ

- Gained hands-on experience applying analytics to financial data, supporting dashboards, workflows, and reporting processes.
- Pulled, cleaned, and analyzed financial and market data across multiple sectors to support equity research.
 - Built and maintained Excel-based dashboards and reports to track company and industry KPIs.
 - Assisted with weekly reporting processes, updating Power BI dashboards and preparing Excel summaries.
 - Applied SQL and Python basics to extract and transform datasets, enabling faster report turnaround.
 - Supported financial modeling by preparing data inputs and verifying outputs.
 - Conducted QA checks on datasets to ensure accuracy and consistency across recurring reports.
 - Partnered with senior analysts to automate recurring tasks and improve workflow efficiency.

ANALYTICAL ACHIEVEMENTS

- Dashboard Design**
Designed automated dashboards (Excel, Power BI) to monitor biotech/tech KPIs and improve reporting efficiency by 40%.
- Data Cleaning & EDA**
Cleaned, structured, and analyzed large marketing datasets to uncover consumer trends, improving campaign alignment by 25%.
- Statistical Modeling:**
Applied statistical modeling and sensitivity analysis to investment forecasts, strengthening evidence-based decisions.
- Pipeline Automation**
Built Python and API-driven pipelines to automate recurring data pulls.
- Visualization & Reporting**
Delivered polished presentations and visualizations for senior analysts and stakeholders.

CORE SKILLS

SQL • Excel • Python • Power BI • Tableau •
Looker • Data Cleaning & Transformation •
KPI Dashboarding & Reporting •
Statistical Analysis & Visualization •
Communication & Stakeholder Management •
Hypothesis Testing • Regression Analysis •
A/B Testing • Financial Analysis •
Operations Analytics • Leadership

EXPERIENCE

Marketing Data Analyst Assistant

06/2020 - 09/2023

Creative Brainworks, LLC

Sparta, NJ

Supported marketing and sales strategy through data cleaning, dashboards, and KPI reporting.

- Built dashboards and reporting workflows (Excel, Power BI) to track campaign KPIs.
- Uncovered key market trends and consumer behavior patterns through data cleaning, exploratory analysis, and visualization, leading to effective sales strategies.
- Improved market alignment by 25% and decision-making by 20% by translating data insights into targeted production and sales strategies.
- Managed data points monthly with Excel, supporting tactical decision-making with advanced reporting techniques.
- Generated monthly analytical reports that shaped production and sales strategies.
- Collaborated with management to implement data-driven production and sales initiatives.

Laboratory Data Analyst

02/2023 - 09/2023

Atlantic Health System

Morris Plains, NJ

Cleaned, validated, and analyzed clinical datasets to support physician diagnosis and ensure compliance.

- Performed data analysis in Excel to generate accurate laboratory datasets supporting anomaly detection and diagnosis.
- Developed structured reporting workflows for anomaly detection and diagnosis.
- Cleaned, validated, and analyzed clinical datasets to ensure accuracy in reporting.
- Supported quarterly analysis for 500+ patient datasets with consistent accuracy.
- Maintained 100% compliance in reporting with rigorous quality control methods.
- Collaborated with clinicians to ensure data aligned with treatment requirements.
- Operated advanced biomedical instrumentation and computer systems to conduct testing on blood and body fluids.

Data Research Analyst

05/2020 - 06/2022

Align Wellness Center

Sparta, NJ

Used statistical analysis to track mental health outcomes and deliver actionable insights for research initiatives.

- Collected, organized, and compiled quantitative data on student mental health progress to support longitudinal tracking and research initiatives.
- Improved program effectiveness by ~15% by leading statistical analysis and identifying key trends and correlations.
- Created data visualizations and dashboards in Excel to present complex findings in a clear, accessible format for academic and administrative stakeholders.
- Prepared research reports, translating results into insights on wellness strategies and student support programs.

Laboratory Data Analyst

08/2018 - 01/2022

University of Miami

Coral Gables, FL

Combined lab testing with developing structured data workflows for research projects to improve reproducibility and efficiency.

- Assisted students with data analysis, technical troubleshooting, and lab software/tools, strengthening their ability to complete research projects accurately.
- Maintained laboratory equipment, compliance protocols, and digital records, ensuring reliable data quality and smooth operation of research workflows.
- Improved data efficiency by ~30% by developing structured data workflows and digital documentation systems.
- Assisted students with data analysis and technical troubleshooting, enhancing research project accuracy.
- Developed structured data workflows and digital documentation used in research projects, improving data reliability.

Emergency Medical Technician

05/2016 - 12/2022

Sparta Ambulance Squad

Sparta, NJ

Volunteer emergency medical technician (EMT)

- Responding to emergency calls
- Performing medical services
- Transporting patients to medical facilities
- Volunteered at least one evening a week when available
