WORK HISTORY

Appian IT Developer at Serco NA

May 2021 - August 2021 (0.5 Year)

- Worked as an Appian Developer with Serco's Centers for Medicare Medicaid Services (CMS) Appian development team. Participated in the entire software development life cycle of iterations to the CMS Task Inconsistency Processing System (TIPS) including Sprint planning, design review, deployment demo, and retrospective meetings and led the team's Daily Scrum meetings. Worked with CMS Appian development team's project manager to create a test taking software, the Appian Learning Management System (ALMS), for the CMS Appian team. Implemented the project's data structure and migrated data from excel spreadsheets and PDF surveys. Integrated database with Appian system and developed an interface for taking tests.

Scrum Master Business Analyst Project Manager at Fannie Mae

July 2022 - Present (3.5 Years)

- Scrum master, business analyst, project manager, lead QA tester, and application security analyst with four years of experience supporting two teams of software developers in maintaining and enhancing a web application and security scan APIs. Experience in leading Agile teams using Scrum and Kanban methodologies and scaled Agile teams using SAFe. Experience in translating business requirements from stakeholders into technical acceptance criteria to be implemented by developers as well as testing and verifying the implementation of these acceptance criteria. Experience in scheduling and leading sprint ceremonies across the software development lifecycle.
