

ANUDEEP POLAGONI

DATA ANALYST

Email: anudeeppolagoni31@gmail.com Contact: 972-514-7566 [LinkedIn](#)

SUMMARY

Experienced Data Analyst with 5+ years of expertise in data extraction, analysis, and visualization to drive business decisions. Proficient in SQL, Python, Excel, Tableau, and Power BI. Strong in statistical modeling, predictive analytics, and building ETL pipelines. Adept in AWS for scalable data solutions and collaborating with data engineering teams for data architecture improvements. Skilled in optimizing workflows, automating processes, and communicating insights through data storytelling to stakeholders.

EXPERIENCE

Cisco Systems - TX, USA

Jan 2024 - Current

Data Analyst

- Spearheaded the automation of data integration using Talend in a large-scale retail data migration project, improving ETL performance by 40% while handling point-of-sale, inventory, and customer data.
- Developed Power BI dashboards to track financial KPIs across finance and supply chain teams, reducing report generation time from 4 hours to 30 minutes. The dashboards provided insights into revenue, costs, and supply chain bottlenecks.
- Built scalable ETL pipelines using Informatica for customer and sales data extraction, automating daily data loads and ensuring timely availability of information for executive reporting.
- Collaborated on a data migration project from Teradata to AWS Redshift, improving performance for complex financial and supply chain reporting queries by 25%.
- Automated data cleaning and transformation tasks with SQL and Python, reducing manual data wrangling efforts by 50%, focusing on customer interaction and sales trend data.
- Conducted time series forecasting with ARIMA models on seasonal sales trends, optimizing inventory management and reducing excess stock by 12%.
- Established data governance policies to handle customer data in compliance with GDPR and other regulations, ensuring the secure handling of sensitive financial and customer data.

CitiusTech - India

Mar 2020 – Aug 2022

Sr. Data Analyst

- Led the design and development of Tableau dashboards for sales and marketing data analysis, integrating regional and national data to help identify market trends. This improved decision-making for sales teams and marketing strategists by 35%.
- Engineered and optimized ETL pipelines using AWS Glue, automating data ingestion from CRM and sales systems, reducing manual data processing by 60%. The pipeline processed transactional and sales data from distributed systems.
- Created a centralized Snowflake data warehouse, consolidating data from multiple sources such as PostgreSQL, MySQL, and external marketing sources, enabling seamless reporting across departments.
- Developed Python-based predictive models to analyze customer behavior and segmentation, contributing to a 15% increase in targeted marketing strategies by leveraging sales, customer interaction, and demographic data.
- Implemented real-time data streaming with AWS Lambda to improve daily sales reporting by 30%, ensuring fresher data for operational teams.
- Enhanced data validation processes using Python and SQL, applying automated checks to ensure the accuracy of monthly sales and inventory reports, reducing errors by 20%.
- Supported the migration of historical datasets to AWS S3 for scalable storage, ensuring efficient data retention and accessibility for analytics purposes.

Mphasis - India

May 2018 - Feb 2020

Data Analyst

- Developed and maintain interactive dashboards and reports using Power BI and Tableau, leveraging DAX and Power Query to create dynamic visualizations for decision-makers.
- Analyzed large datasets using SQL and Python to uncover key insights and trends, supporting data-driven decision-making for various business units.
- Performed data mining techniques to identify patterns and correlations within customer, sales, and financial data, generating actionable insights for marketing and sales teams.
- Utilized advanced Excel functionalities, including Pivot Tables, VLOOKUP, and INDEX-MATCH, to manipulate and summarize data for ad-hoc analysis.
- Created KPI tracking systems that monitor business performance in real-time, ensuring accuracy and timely reporting of key metrics to stakeholders.
- Conducted data profiling and data cleansing activities to ensure data integrity and accuracy before analysis, improving the quality of reports and business insights.
- Implemented statistical models such as regression, clustering, and hypothesis testing to perform predictive and prescriptive analytics, supporting forecasting and business optimization.
- Performed ETL (Extract, Transform, Load) processes to prepare, transform, and load data from various sources into data warehouses, ensuring seamless integration and consistency.
- Collaborated with cross-functional teams to define data requirements and KPIs, ensuring alignment with business goals and objectives.

SKILLS

- Methodologies:** SDLC, Agile, Waterfall
- Languages:** Python, R, SQL, Shell Scripting
- Data Visualization:** Tableau, Power BI, Excel
- Statistical Analysis:** Regression, Clustering, A/B Testing, Time Series Analysis
- ETL and Data Pipeline:** Informatica, Talend, Apache Airflow, AWS Glue
- Cloud Platforms:** AWS (S3, Lambda, Glue), Snowflake
- Databases:** MySQL, PostgreSQL, SQL Server, Oracle
- Big Data:** Apache Kafka
- Other Skills:** Data Cleaning, Data Wrangling, Data Warehousing, Data Mining, Data Migration, Data Governance, Critical Thinking, Problem-Solving, Data Storytelling, A/B Testing, Data Normalization

EDUCATION

Master of Science in Information Systems and Technology

University of North Texas

Aug 2022 - May 2024

Bachelor of Technology in Petroleum Engineering

KL University, Andhra Pradesh, India

Jun 2015 - May 2019
