PROFESSIONAL SUMMARY

Data Analyst/Scientist with 3+ years of experience translating complex business problems into actionable insights using Python, SQL, Power BI, and cloud technologies. Proven track record in building predictive models, automating ETL pipelines with Azure and AWS, and developing dynamic BI dashboards that improve decision-making across healthcare and consulting domains. AWS Certified (SAA 2024) with a passion for GenAI, cloud analytics, and driving measurable business outcomes through data.

TECHNICAL SKILLS

Languages — Python, R, SQL, Java

Data Visualization — Power BI (DAX), Tableau, ggplot2, Seaborn

Statistical & ML Libraries — Scikit-learn, NumPy, Pandas, Statsmodels, SAS, RStudio

Cloud & Big Data — AWS (S3, Glue), Azure (Data Factory, Synapse), Databricks (basic)

ETL & Workflow Tools — Talend Open Studio, Azure Data Factory

Databases — MySQL, PostgreSQL, Oracle, SQL Server

DevOps & Tools — Git, GitHub, JIRA, Jupyter, VS Code, Linux

Techniques — Regression, Classification, Predictive Modeling, Exploratory Data Analysis (EDA), NLP (Beginner), Cross-Validation

Professional Experience

Data Analyst, Tempus

Nov 2023 – Present | USA

- Designed and deployed machine learning models using Scikit-learn to identify high-risk patient profiles, enabling earlier clinical intervention and influencing treatment plans for 2,000+ patients/month.
- Developed and maintained ETL pipelines using Azure Data Factory, automating ingestion and transformation of large healthcare datasets (~15M+ records/month), reducing analyst workload by over 50 hours/month.
- Built real-time dashboards in Power BI and Tableau to track operational KPIs and patient care metrics, actively used by 7+ clinical and operations teams to monitor trends and inform decisions.
- Performed hyperparameter tuning and k-fold cross-validation, improving model performance and ensuring generalizability across patient cohorts.
- Collaborated cross-functionally with data engineers, physicians, and business stakeholders to scope and deliver analytics solutions that directly supported clinical workflows in 5+ departments.
- Led weekly QA checks on data pipelines and dashboards, ensuring data integrity and full HIPAA compliance across all reporting environments.
- Participated in Agile ceremonies (stand-ups, sprint planning, retrospectives) to align analytics deliverables with product timelines and clinical priorities.

Data Analyst, Deloitte

Aug 2021 – Apr 2023 | Hyderabad, India

- Automated 30+ recurring compliance and audit reports using Python and Tableau, saving the firm 120+ analyst hours per month and improving SLA adherence by 10%.
- Analyzed 2.5 million+ customer transaction records using SQL and Python (pandas, NumPy), uncovering behavioral trends that helped retain \$3.2M in annual revenue for a retail client.
- Developed predictive models (logistic regression, decision trees) to score customer and vendor risk, contributing to a \$1.1M fraud detection initiative across three client portfolios.
- Optimized data ingestion pipelines from SQL Server and Oracle sources, improving data load speeds and warehouse query performance for analysts across client accounts.
- Built and deployed interactive dashboards tracking KPIs like CLTV, campaign ROI, and churn; dashboards were used by 20+ business stakeholders in weekly decision meetings.
- Integrated data pipelines using AWS S3 and Glue, enabling scalable reporting and reducing dashboard refresh time from 10 minutes to under 2 minutes.
- Conducted stakeholder workshops to gather reporting requirements, ensuring solutions aligned with business needs and compliance policies.
- Actively contributed to Agile project planning and delivery across 6+ client engagements, collaborating with senior consultants and developers to deliver data products on schedule.

EDUCATION

Master of Science in Information Technology, <i>University of Cincinnati OH</i>	Aug 2023 – Dec 2024
Bachelor of Technology in Information Technology, <i>Vidya Jyothi Institute of Technology</i>	May 2019 – May 2023

PROJECTS

Healthcare Claims Reporting & Predictive Analysis, <i>Technologies: Python, SQL, Power BI</i> • Built end-to-end data pipeline to clean and analyze claims data. • Created Power BI dashboards tracking patient admissions, claim rejections, and processing times. • Developed basic predictive models for claims approval probability to enhance processing efficiency.	Jan 2023 – Mar 2023
Football Match Data Analysis, <i>Technologies: R, ggplot2</i> • Conducted EDA on match outcomes, scoring patterns, and win ratios. • Visualized player performance metrics using R's ggplot2 to uncover key factors influencing game outcomes.	Sep 2023 – Nov 2023

CERTIFICATIONS

• AWS Solutions Architect – Associate, 2024	• Machine Learning with AI using Python – Microsoft Partnered, 2021	• LinkedIn Learning – Explore a Career in Front-End Web Development, 2024
