

Anudeep Kaja

Java Full Stack Developer

Email: anudeepkaja865@gmail.com

LinkedIn: <https://www.linkedin.com/in/kaja-anudeep/>

Ph#: 863-784-1315

Professional Summary:

- Having around **6 years** of experience in Platform (Web & Client-Server) application development and design using Object-Oriented Programming, Core **Java**, **J2EE** Technologies.
- Strong experience in designing, developing, and implementing several **J2EE** frameworks like **Struts, Spring, Hibernate, and EJB**. Expertise in working with **Redux** architecture and complex object-oriented concepts to improve website performance.
- Developed **Spark** applications using **Scala and Java** and implemented **Apache Spark** data processing projects to handle data from various **RDBMS** and streaming sources.
- Skilled in selecting the appropriate **AWS** services based on compute, data, and security requirements, and integrating AWS with other application infrastructures.
- Extensive knowledge of database transaction management and integrating **JDBC and Hibernate with Spring Boot** for database-related changes.
- Experienced with **Continuous Integration (CI)** tools such as **Jenkins, Hudson, Travis, and Bamboo**, and **Continuous Deployment (CD)** tools like **Electric Cloud and Nolio**.
- Expertise in integrating and deploying applications using **Apache Camel, Apache CXF, Apache Kafka, ActiveMQ, Service-Mix, and JBoss Fuse Enterprise Service Bus (ESB)**.
- Well-versed in build tools such as **Gradle, Maven, and Ant**.
- Hands-on experience with version control tools like **Git, GitHub, SVN, and CVS**, and extensive use of **IDEs** like **Eclipse, NetBeans, and IntelliJ IDEA** for **Java/J2EE** application development.
- Experienced in producing and consuming web services using technologies such as **RESTful (JAX-RS), SOA (JAX-WS), JAX-RPC, and JAXR (Java API for XML Registries)**.
- Expertise in developing lightweight business components and integrated applications using the **Spring framework**, including **Spring Web MVC**. Skilled in database management using **NoSQL (MongoDB)** and relational databases (**PostgreSQL, Oracle, MySQL**).
- Extensive experience in developing **Selenium and JUnit** test scripts using Java in Eclipse IDE.
- Strong experience with **Agile (SCRUM)** and **Waterfall SDLC** methodologies.
- Proficient in using **Kubernetes** for horizontal scaling and load balancing of applications.
- Designed front-end screens using **Angular, HTML, CSS, JavaScript, Redux, React, jQuery, Bootstrap, and Spring Boot**.
- Good understanding of microservices architecture and SOA, with expertise in applying **Spring Cloud-Netflix OSS** for microservices deployment and configuration with **Hystrix, Zuul** (gateway for routing), and **Eureka** (for routing stability).
- Experience in using web/application servers like **WebLogic, JBoss, GlassFish, and Tomcat**.

Technical Skills:

Java/J2EE Technologies	Java 8, Servlets, JSP, JSTL, JDBC, JSF, JavaBeans, MVC, RMI, ANT, MAVEN, XML, DOM, JNDI, JUNIT, Web services, Multithreading
Web Technologies	HTML, JavaScript, JQuery, CSS, AJAX, DOJO, XML, React.JS, REDUX, React Hooks, Bootstrap, Typescript, ES6, Angular, Web Services (SOAP, REST, WSDL)
Frameworks	Hibernate, JPA, JSF, Spring (IOC, AOP, MVC, Boot, ORM, Dependency Injection)
IDE's	Eclipse, NetBeans

Web/Application Servers	Web Logic, Apache Tomcat, JBOSS
Web Service Technologies	SOAP, REST
Version Control Tools	GIT, CVS, SVN
Database Environments	Oracle, SQL Server, MySQL
Cloud & CI/CD	AWS, Azure, Jenkins, Docker, Terraform
Testing Tools	Junit, Mockito, Jest
Operating Systems	Windows, LINUX, Mac OS.

Work Experience

Client: Advent Health, Altamonte Springs, Florida, USA

Role: Java Full Stack Developer

July 2024 – Present

Description: At Advent Health, technology plays a vital role in delivering whole-person care. As a Java Full Stack Developer, you contribute to building and maintaining innovative, scalable healthcare applications using Java, Spring Boot, and modern JavaScript frameworks.

Responsibilities:

- Utilized **AWS Lambda** to optimize Backend processes and improve application performance.
- Implemented **AJAX** calls from the backend without page refresh using **jQuery**, **AJAX**, **Spring MVC**, and **Hibernate**.
- Migrated complex **MapReduce** programs into **Apache Spark RDD** transformations.
- Strong development skills in designing and developing **Microservices** along with **Spring Boot** and Coherence cache implementation.
- Implemented **REST** Web services to retrieve data from the client side.
- Worked in integrating **JMS** with **SPRING BOOT** by providing an instance that is embedded with **Active MQ**.
- To meet scale and availability requirements, we selected **Apache Cassandra** for **Cassandra's master** less architecture, ability to scale horizontally easily and quickly to meet their growing data store needs.
- Experience in handling messaging services using **Apache Kafka** implemented **Micro services** architecture to make application smaller and independent **REST** web services using **Jersey** with the enabled **OAuth**.
- Used **Node.js** to run **Grunt** tasks and build properly the project (compile, minify, concat etc.) and Implement modules into to integrate with designs and requirements. Used **Grunts**, **BowerJS**, **Express** from **Node.js**.
- Worked on **Jenkins** for the Continuous integration and Continuous Deployment (**CI/CD**).
- Extensive expertise in the **Spring** Framework, with a focus on developing cloud-native software solutions and leveraging its core features for scalable and robust applications. Created **UNIX shell scripts** to run the Informatica workflows and control the **ETL flow**.
- Developed **DAO layer** exposing access to **MongoDB database** and found issues in original **MongoDB Java** driver, reported them to the community, and got them fixed with the next releases.
- Expertise in **Apache Kafka** message implementations and their integrations with the systems.
- Used **Java Servlets**, **JSPs**, **AJAX**, **XML**, **HTML**, and **CSS** for developing the Web component of the application.
- Involved in various phases of **SDLC** as requirement gathering, modelling, analysis, architecture design, and development, and the project was developed using **Agile** Methodologies.
- Developed new user-facing features using **React**.
- Extensively involved in developing and writing **Maven** build scripts for automated build and deployment processes.
- Implemented **Spark** using **Scala** and **Spark SQL** for faster testing and processing of data.
- Developed the application under **J2EE Architecture** using **Spring**, **Struts**, **Hibernate**, **Servlets**, **Web logic** and **JSP**.
- Used various **jQuery** and **Bootstrap** plug-ins like date picker, **Bootstrap** selectors.
- Deployed our application on Pivotal Cloud Foundry (**PCF**), which is used to reduce the development overhead by providing a ready-to-use platform.
- Developed **REST APIs** using **Java 8**, **Play** framework, and **Akka**.

- Converted a monolithic app to a **Microservices** architecture using **Spring Boot**, using the 12-factor app methodology. Deployed, scaled, configured, and wrote a manifest file for various **Microservices** in **PCF**.
- Extensive expertise in **Kubernetes**, orchestrating containerized applications for efficient deployment, scaling, and management. Worked on **Oracle 9i**, **MySQL**.

Technologies Used: AJAX, Apache Cassandra, Apache Kafka, Apache Spark, AWS, AWS Lambda, Cassandra, CI/CD, Hibernate, Java, Java 8, Jenkins, jQuery, Kafka, Kubernetes, Microservices, MVC, MySQL, Node.js, OAuth, Oracle, Oracle 9i, PCF, React, Spark, Spring, Spring Boot, Spring MVC, SQL

Client: Payless - Miami, Florida, USA

May 2023- June 2024

Role: Senior Software Engineer

Description: At Payless, the Senior Software Engineer role plays a pivotal part in advancing the company's digital transformation and global e-commerce initiatives.

Responsibilities:

- Experience in setting up **RBAC** roles (OOB) and Custom **RBAC** roles to Subscription level, or Resource Manager Level to manage **Azure** Resources.
- Good experience in implementing **Spark** Streaming project, preferably using **Scala**, and **Spark SQL**.
- Designed and developed **Microservices** with **Spring Boot** 2.0 and **Spring REST**.
- Experience with high-speed messaging frameworks and streaming (**Kafka**, **Akka**, **reactive**).
- Manage and fix bugs with the **Jira** bug tracking application.
- Developing **Spring Boot** microservice architecture applications and deploying them to **AWS EC2** instances using **CI/CD Jenkins** Pipeline.
- Developed and maintained responsive web applications using **React.js**, delivering high-quality code that met project requirements and deadlines.
- Developed strategies for internal security for the projects using **Spring Security** and **Spring Boot**.
- Developed User Interface using **HTML**, **Bootstrap**, **CSS**, **JavaScript**, and **AngularJS**.
- Configured **JMS** server setup, **DB** connection setup & deployed returned items in **WebSphere Server**.
- Used **Docker** Container to address every application across the hybrid cloud and **Docker** for better collaboration and innovation.
- Utilized **Python** for scripting automated tasks, improving system monitoring and data extraction efficiency by 25%.
- Designed and developed **RESTful** microservices using **Spring Boot**.

Technologies Used: Angular, AngularJS, AWS, Azure, Bootstrap, CI/CD, CSS, Docker, EC2, HTML, Java, JavaScript, Jenkins, Jira, JMS, Kafka, Microservices, React, RESTful, Scala, Spark, Spark SQL, Spring, Spring Boot, Spring Security, SQL

Client: (Cognizant) Manulife - Bangalore, India

Oct 2021- Dec 2022

Role: Software Engineer

Description: At Manulife, I contributed as a Software Engineer, actively involved in developing and enhancing enterprise-grade Web Applications using Java and Spring Boot frameworks.

Responsibilities:

- Good Knowledge in developing **Express**, working with **Microservices** backend with **RESTful**, **GraphQL**, **gRPC**, etc. types of services.
- Created various **MongoDB** collections and wrote services to store and retrieve user data for the application on devices and used **Mongoose API** to access the **MongoDB** from **Node.js**.
- Used **IntelliJ IDEA IDE** tool for application development.
- Used **Spring Frameworks IOC Dependency** Injection to inject Service Object using Service Locator Design Pattern into **Action Classes**.
- Developed **Mockito** and **JUnit** test cases to improve code coverage.
- Built applications using **React** with **ES6** which allowed us to render pages on both the client and server using the same codebase, developed web and mobile applications using **ES6** features and frameworks such as **React**, **React Native** and **Redux**.
- Developed **JASPER** report to show the result after validations are performed on the test cases, and maintaining data accuracy.
- Used **jQuery** to build accordion-style content, drag and drop functionality, calendar, pop-up, and modal windows.

- Creating **SQL** stored procedures in **IBM DB2**.
- Create a new **Java** application to extract, transform, and load (**ETL**) **JSON** file data into legacy and new **SQL Server** tables.
- Developed code with **Java SDK** to connect with **AWS** Services. Worked with **S3** for storing and retrieving data stored in the **S3 buckets**, **AWS SQS** for bulk email processing, Data backup and archiving on **AWS** using **S3** and **Glacier**, and **Dynamo DB** to store the data for metrics and backend reports.
- Used **microservices** to communicate using synchronous protocols **HTTP** and **REST**.

Technologies Used: AWS, DB2, IntelliJ, Java, Java 8, jQuery, JSON, JUnit, Microservices, MongoDB, Mongoose API, Node.js, PCF, React, Redux, RESTful, S3, Spring, SQL, SQL Server

Client: Wells Fargo, Bangalore, India

Mar 2019-Sep 2021

Role: Java Developer

Description: At Wells Fargo, I worked as a Java Developer, contributing to the design, development, and maintenance of enterprise-level banking and financial applications.

Responsibilities:

- Developed persistence Layer using **Hibernate** to persist the data and to manage the data.
- Building cloud **Microservices** and implemented back-end using **Spring Boot**. And Authored application using **Spring Cloud** services (**Spring** version of **Netflix OSS-Eureka** that helps in routing, **Circuit Breaker** and **Ribbon** for client-side load balancing).
- Modified existing **Shell scripts** in **Unix** to call daily sub routines.
- Analyzed the **Cassandra/SQL scripts** and designed the solution to implement using **Scala**.
- Use **Git** for version control and participate in agile development methodologies such as **Scrum** or **Kanban**.
- Implemented configured **Jira** issue tracking software with **Agile** plug-in across all the company functions.
- Developed the **REST Microservices** using **Java JDK 1.8**, **Scala**, on **IntelliJ** platform by gathering the knowledge of previous phase resources and integration with **Oracle**.
- Have experienced developing web applications using **Bootstrap**, **Code Mirror**, **Brackets**, and **Ember.js**.
- Developed the application using **Spring Web MVC** and other components of the **Spring Framework**, the controller being **Spring** Core Dispatcher Servlet, also implemented Dependency Injection using the **Spring** framework.
- Unit testing through **JUnit** & Integration testing in staging environment
- Engaged in various phases of Software Development Life Cycle (**SDLC**) of the application, like Requirement gathering, Design, Analysis and code development.
- Worked in integrating **JMS** with **SPRING BOOT** by providing an instance that is embedded with **Active MQ**.
- Developed automation of Validation service to provide the **JASPER** report based on bean validations, **Spring** validations on test cases.
- Design and implement the application using the **ReactJS** framework with **HTML5**, **CSS3** and **TypeScript**.
- Worked on creating, retrieving, updating, and deleting documents in **MongoDB**.
- Extensively worked on developing UI components using **JavaScript** and **JSON** to interact with **RESTful** web services.

Technologies Used: Agile, Bootstrap, Cassandra, core Java, CSS3, Ember.js, Git, Hibernate, HTML5, IntelliJ, Java, JavaScript, Jira, JMS, JSON, JUnit, Microservices, MongoDB, MVC, Oracle, React, RESTful, S3, Scala, SDLC, Spring, Spring Boot, Spring Cloud, SQL

Education

- Masters in computer science from Florida Atlantic University, USA
- Bachelors in Electronics and Communication Engineering from CMR College of Engineering and Technology, India.
