SUMMARY

Software Engineer with 3+ years of industry experience designing, building, and shipping high-quality web and backend systems. Strong hands-on experience with **Java, Spring Boot, Python, JavaScript, React, SQL**, and cloud-native architectures on **AWS**. Proven ability to deliver scalable, reliable software, collaborate across cross-functional teams, and apply **data analysis, metrics, and experimentation** to drive product and engineering decisions. Experienced in troubleshooting ambiguous problems, improving system performance, and delivering customer-focused solutions in fast-paced environments.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL, PL/SQL
- **Front-End Technologies:** React, HTML, CSS, JavaScript
- **Back-End & APIs:** Spring Boot, Spring MVC, Spring Data JPA, RESTful APIs, gRPC, Microservices Architecture
- **Event-Driven & Messaging:** Apache Kafka, Asynchronous Processing, Distributed Systems
- **Databases:** PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB, Redis
- **Cloud & DevOps:** AWS (EC2, ECS, S3, RDS, Aurora, IAM, CloudWatch, Route53), Docker, Kubernetes, CI/CD
- **Testing & Quality:** JUnit, Mockito, Integration Testing, Automated Testing, Performance Optimization
- **Security:** OAuth2, JWT, Role-Based Access Control (RBAC)
- **Data & Analytics:** Metrics Analysis, Log-Based Monitoring, Telemetry, Feature Impact Measurement
- **Ways of Working:** Agile/Scrum, Cross-Functional Collaboration, Problem Solving, Ownership Mentality

PROFESSIONAL EXPERIENCE

Citrix Systems, Inc.

August 2024 – Present

Software Development Engineer

New Jersey, USA

- Designed, developed, and shipped **production-grade Spring Boot microservices**, supporting internal and external user workflows with high availability and scalability.
- Built **event-driven systems using Apache Kafka**, enabling asynchronous processing and improved system throughput under peak traffic.
- Collaborated closely with **product managers, business stakeholders, and engineers** to translate ambiguous requirements into well-defined technical solutions.
- Applied **metrics, logs, and telemetry** to analyze system behavior, troubleshoot production issues, and guide performance optimizations.
- Implemented resiliency patterns such as **circuit breakers and fault isolation**, improving reliability during traffic spikes.
- Optimized queries and indexing across **MongoDB and relational databases**, reducing latency for user-facing APIs.
- Strengthened **CI/CD pipelines**, reducing deployment failures by 20% and accelerating feature delivery.
- Authored comprehensive **unit and integration tests**, ensuring high-quality releases in a fast-moving environment.

Wipro Limited

September 2021 – August 2023

Software Engineer – B1

Hyderabad, India

- Developed and maintained **distributed backend services** for enterprise banking platforms using **Java, Spring Boot, Kafka, and PostgreSQL**, supporting 5,000+ users.
- Modernized legacy monolithic applications into **cloud-ready microservices**, increasing throughput by 5× and improving transaction reliability.
- Delivered **real-time, event-driven services** that increased transactional activity by 40% and improved user engagement.
- Partnered with business and product teams to convert requirements into scalable, maintainable technical solutions.
- Integrated **CI/CD pipelines with Jenkins**, achieving high automated test coverage and improving release stability.
- Participated in **Agile/Scrum ceremonies**, code reviews, and sprint planning, contributing to on-time delivery of high-quality software.
- Implemented **OAuth2-based authentication** and AWS-hosted solutions to enhance security and performance.

HCL Tech

March 2021 – September 2021

Software Engineer – Intern

Hyderabad, India

- Contributed to a **full-stack web application** using **Java, Spring Boot, React, HTML, CSS, and AWS**, achieving 99.9% uptime.
- Built and enhanced **front-end components in React**, collaborating with backend teams to integrate REST APIs.
- Strengthened authentication and authorization using **OAuth2 and JWT**, improving overall application security.
- Implemented **real-time features using WebSockets**, supporting over 1,000 concurrent users.

PROJECTS

Java Spring Microservices Platform

Tech: Java, Spring Boot, Spring Cloud, Kafka, gRPC, REST APIs, PostgreSQL, Docker, Spring Security, JPA

- Designed and deployed **secure, scalable backend microservices** with synchronous and asynchronous communication patterns.
- Implemented **OAuth-based authentication**, SQL persistence, and containerized deployments to support cloud-native environments.

Machine Translation System using GRUs, LSTMs, and Transformer Architecture

Tools Used: Python, NLP, GRU, LSTM, Transformers MERN Stack, Tableau, Big Query, Excel.

- **Built and deployed a Transformer-based NMT system** trained on 50K+ sentence pairs, achieving **80% BLEU** with a MERN inference service delivering sub-second latency.

E-commerce Clothing Platform

Tools Used: Python, NLP, GRU, LSTM, Transformers MERN Stack, Tableau, Big Query, Excel.

- Built an **e-commerce platform** with Node.js, React, and MongoDB, featuring REST APIs, responsive UI, and secure **JWT-based authentication** with role-based access. Optimized MongoDB queries and indexing to handle **5K+ daily transactions**, improving performance and boosting engagement by **15%**.

EDUCATION

Master of Science in Information Technology

Montclair State University, NJ

Bachelor of Technology – Computer Science & Engineering

Vardhaman College of Engineering, India
