SKILLS

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL

Technologies & Tools: AWS, EC2, S3, Node.js, Express.js, React.js, HTML5, CSS3, Streamlit, Git

AI/ML & LLMs: Deep Learning, NLP, Retrieval-Augmented Generation (RAG), TensorFlow, Keras, PyTorch, Hugging Face, LangChain, LlamaIndex, ChromaDB, Llama 2, OpenAI (GPT), Google Gemini Pro

WORK EXPERIENCE

Puri Web Solution, Gorakhpur

Feb 2025 - Present

Software Engineer Intern

- Developed and deployed scalable full-stack applications using Node.js, Express.js, React.js, Redux, and Tailwind CSS, integrated with MySQL and MongoDB for efficient data management.
- Designed and optimized REST APIs and microservices, ensuring high availability and fault tolerance while handling large-scale distributed workloads on AWS (EC2, S3, EMR).
- Automated reporting and monitoring systems, cutting redundant executions and **reducing compute costs by 80%**, while implementing S3 lifecycle policies that **saved 50,000+ annually**.
- Streamlined deployment pipelines with Docker, Kubernetes, Git, and CI/CD workflows, enabling faster releases and reliable cloud deployments.

Tech Stack: React.js, Node.js, Express.js, MongoDB, MySQL, AWS (EC2, S3, EMR), Docker, Kubernetes, Git, CI/CD

Freelance Project – Swasth Mitra

Jan 2025 – Mar 2025

Full-Stack Developer

- Designed and built a MERN-stack healthcare platform enabling **geo-based emergency help**, doctor bookings, lab tests, and online medicine purchases.
- Implemented secure backend APIs featuring **JWT authentication and role-based access control**, supporting hospitals, doctors, patients, and Swasth Mitra agents.
- Deployed the platform on Hostinger VPS with AWS S3 integration; developed an admin panel managing hospitals, doctors, user data, and real-time dashboards.
- Integrated a **QR-based rewards system**: each Swasth Mitra received a unique QR code; purchases via QR scans generated redeemable coins for agents to cash out.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, QRCode, AWS S3, Hostinger VPS

EDUCATION

Madan Mohan Malaviya University Of Technology (MMMUT)

Nov 2022 - July 2026

B.Tech in Information Technology

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning

PROJECT WORK

Agro Manch

Tech Stack: React.js, Node.js, Express.js, MongoDB, ChakraUI, JWT, AWS EC2, AWS S3 | **Live**

- Designed a web app connecting farmers directly to consumers, **reducing middlemen and ensuring fair pricing**.
- Developed product listings with a **chat system for real-time communication** between buyers and sellers.
- Implemented **AI/ML-powered product recommendations**, market rate updates via API, and media upload features using AWS S3.
- Integrated government schemes, insurance options, and **geo-location-based functionality** to locate nearby agriculture stores and traders.

Inside Bharat TV News Portal

Tech Stack: React.js, Tailwind CSS, Node.js, MongoDB | **Live**

- Developed a fully functional news portal and admin dashboard for Inside Bharat TV, a YouTube channel with **164K+ subscribers**, enabling real-time publishing and management of articles.
- Built with React.js, Tailwind CSS, Node.js, and MongoDB, with **SEO optimization** and responsive UI to support high user engagement.
- Admin panel allows content updates, article publishing, and management directly from the dashboard.

AWARDS AND CERTIFICATES

- Codeforces Specialist** (Max Rating: 1434), **CodeChef 4 Star** (Max Rating: 1804), Solved 400+ problems on LeetCode, 5 Star on HackerRank
- Project shortlisted among **Top 400 teams in India** Regional Solution Challenge by Google Developer Student Club, Global Hackathon 2024 — 🏆
- 2nd Position** in Smart India Hackathon 2024 at MMMUT — 🏆
