

ANUJA VISHVAS

Data Analyst

PROFESSIONAL SUMMARY

Data Analyst with over 8 years of experience in leveraging advanced analytics and ETL solutions to enhance fraud detection, compliance, and operational efficiency. Proficient in AWS, Tableau, and Snowflake, with a strong focus on data governance and automation. Demonstrates a visionary approach to integrating innovative technologies and predictive modeling to drive strategic decision-making and optimize business processes.

EMPLOYMENT HISTORY

DATA ANALYST

Fifth Third Bank

May 2023 - Present
Evansville, IN

- Analyzed large-scale financial datasets for fraud detection and compliance using PySpark, SQL, and Snowflake
- Built and optimized ETL pipelines with Apache Airflow, dbt, and Azure Data Factory, automating data ingestion and transformation workflows
- Designed interactive executive dashboards in Tableau, enabling senior leadership to monitor fraud patterns, KPIs, and regional performance trends
- Developed scalable SQL queries and stored procedures for financial reporting across PostgreSQL and SQL Server
- Governed data using Microsoft Purview for lineage tracking, classification, and regulatory compliance
- Contributed to A/B testing and propensity modeling using Scikit-learn and SciPy for fraud segmentation and alert tuning
- Collaborated with security teams to integrate analytics into threat detection and incident response processes
- Utilized SAS to analyze financial transaction data, modify existing code, and create new programs for fraud detection and reporting automation
- Managed CI/CD processes using GitHub, Jenkins, and Terraform to support data pipeline deployments
- Participated in Agile ceremonies with a two-week sprint cycle, maintaining documentation and progress tracking in Jira and Confluence

DATA ANALYST

Chevron Corporation

Mar 2021 - Apr 2023
Richmond, VA

- Analyzed operational and incident data using Python, SQL, and Google BigQuery to drive decision-making and improve incident response
- Designed and optimized data warehouses and ETL pipelines using BigQuery and PostgreSQL, streamlining data availability for reporting teams
- Developed dynamic dashboards and reports using Looker, enabling real-time tracking of performance metrics and incident impact across departments
- Built and deployed predictive models to forecast operational trends and customer behavior using Python (Scikit-learn, XGBoost)
- Automated repetitive reporting tasks using SQL scripts and Google Cloud Functions, improving data accuracy and reducing manual effort
- Conducted data cleansing and anomaly detection to ensure high-quality datasets for analytics and reporting
- Led User Acceptance Testing (UAT) and data quality checks, ensuring accuracy of analytics output in a regulated environment
- Collaborated with business analysts and stakeholders in Agile sprints to define KPIs, reporting needs, and cloud-based data solutions

DATA ANALYST

Kubota

Dec 2019 - Feb 2021
Grapevine, TX

- Developed interactive dashboards using Amazon QuickSight to support operational reporting and executive decision-making
- Built automated ETL pipelines using Apache Airflow, dbt, and AWS Glue, improving data processing efficiency across large datasets
- Performed data extraction, transformation, and validation using SQL (PostgreSQL, Snowflake) and Python (Pandas, NumPy)

- Developed machine learning models in AWS SageMaker using Scikit-learn and XGBoost to forecast sales and detect anomalies in equipment usage
- Conducted A/B testing and statistical analysis using Python (SciPy, Statsmodels) to optimize marketing campaigns and product strategy
- Improved self-service analytics capabilities by creating curated datasets and reusable metrics within Amazon QuickSight
- Automated recurring reports and scripts, reducing manual effort and ensuring consistency in metrics delivery
- Monitored key performance metrics using AWS CloudWatch and collaborated with business teams in an Agile environment to deliver timely insights

DATA ANALYST

LatentView Analytics

Dec 2018

Pune, India

- Performed data quality analysis and cleansing using SQL (PostgreSQL, Snowflake) and Python (Pandas, NumPy) to ensure consistency and accuracy
- Designed functional data interface flows and documented transformation logic for CRM and ERP integrations across AWS-based data lakes
- Built source-to-target mapping documents and developed ETL testing scripts to validate data transformations and lineage
- Created process flow diagrams using Lucidchart and Microsoft Visio to align data integration steps with business workflows
- Defined key identifiers and transformation rules for sales and service data, supporting cloud migration initiatives using AWS Redshift
- Developed reusable SQL queries for validation, aggregation, and duplicate checks as part of QA for ETL pipelines
- Managed metadata models using ER/Studio and Collibra, ensuring adherence to data governance policies
- Authored Functional Requirement Documents (FRDs) to support technical development and stakeholder alignment
- Generated dashboards using Amazon QuickSight and Tableau, presenting data insights for reporting teams

DATA ANALYST INTERN

Kellton Tech Solutions Ltd.

Feb 2017 - Nov 2018

Pune, India

- Assisted in gathering, cleaning, and validating large datasets using SQL, Excel, and Python to support business reporting
- Created ad-hoc reports and dashboards using Tableau to visualize trends and support internal decision-making
- Performed data profiling and basic analysis to identify missing values, duplicates, and inconsistencies
- Supported ETL processes by writing and testing SQL queries for data extraction and transformation
- Collaborated with senior analysts to document data workflows and business logic for analytics reports
- Created pivot tables, charts, and basic visualizations in Excel to summarize performance metrics
- Contributed to data reconciliation efforts and resolved data quality issues during system updates

EDUCATION

BACHELOR'S OF COMPUTER APPLICATION

SNDT Women's College

Jun 2015 - May 2018

SKILLS

Python, SQL, PySpark, R, Java, Scala, Snowflake, PostgreSQL, MySQL, Tableau, AWS, Azure, Apache Airflow, dbt, Git, Jenkins, Terraform, JIRA, Hadoop, Spark, Power BI, Looker, ETL, Data Analysis, Machine Learning, Data Visualization, Data Governance, Agile.
