

ANULEKHA NIDADAVOLU

DATA ENGINEER

Email: anulekhanidadavolu06@gmail.com | Phone: (614) 740-0422 | LinkedIn: [linkedin.com/in/anulekha-nidadavolu-62b984353](https://www.linkedin.com/in/anulekha-nidadavolu-62b984353)

PROFESSIONAL SUMMARY

Experienced Data Engineer with 4+ years of expertise delivering scalable, cloud-native data solutions across Azure, AWS, and Google Cloud Platform (GCP). Skilled in designing data pipelines, data warehouses, and real-time streaming systems that power analytics and machine learning initiatives. Proven track record of building reliable, cost-efficient pipelines using Databricks, Apache Spark, Apache Airflow, and Apache Kafka, while ensuring compliance through robust data governance and security practices. Adept at collaborating with business and data science teams to transform raw data into actionable insights that improve decision-making, reduce costs, and enable predictive analytics.

TECHNICAL SKILLS

Programming & Data Processing Python (Pandas, NumPy, PySpark), SQL (T-SQL, PL/SQL, MySQL, PostgreSQL), Scala, Shell Scripting, Bash

Big Data & Streaming Technologies Apache Spark, Databricks (Delta Lake, Unity Catalog), Hadoop, Apache Hive, HBase, Apache Kafka, AWS Kinesis, GCP Pub/Sub, Real-time Data Processing

Cloud Platforms & Services

- Azure: Azure Data Factory (ADF), Azure Synapse Analytics, Azure Databricks, Azure SQL Database, Microsoft Purview, Microsoft Fabric
- AWS: AWS Glue, Amazon Redshift, Amazon S3, Amazon EMR, AWS Lambda, AWS Step Functions, Amazon Athena, Amazon QuickSight
- GCP: BigQuery, Dataflow, Cloud Composer, Cloud Storage, Cloud Run

ETL & Orchestration Tools Apache Airflow, Informatica PowerCenter, SQL Server Integration Services (SSIS), IBM DataStage, Azure Data Factory (ADF), AWS Glue, Google Cloud Composer

Data Modeling & Warehousing Star Schema, Snowflake Schema, Kimball Methodology, Inmon Methodology, Data Lakehouse Architecture (Bronze-Silver-Gold), Dimensional Modeling, Data Vault

DevOps & Infrastructure as Code Terraform, Jenkins, Azure DevOps, GitHub Actions, Docker, Kubernetes, CI/CD Pipelines, Version Control (Git)

Data Governance & Security Role-Based Access Control (RBAC), Data Encryption (at rest and in transit), Data Lineage (Apache Atlas, Microsoft Purview), GDPR Compliance, PCI DSS Compliance, HIPAA Compliance

Business Intelligence & Visualization Microsoft Power BI (DAX, Row-Level Security, KPIs), Tableau, Amazon QuickSight, SQL Server Reporting Services (SSRS)

PROFESSIONAL EXPERIENCE

Azure Data Engineer BNY Mellon | New York, NY | June 2024 – Present

- Architected and implemented data pipelines using Databricks and Azure Data Factory processing 5TB+ of daily data, reducing reporting delays by 30%
- Developed real-time fraud detection pipelines using Apache Spark and Apache Kafka, achieving sub-5-second insights delivery for security operations
- Established CI/CD automation framework using Azure DevOps and Terraform Infrastructure as Code, reducing deployment time by 55%
- Led cloud migration initiative modernizing legacy ETL processes to AWS Glue and Amazon EMR, resulting in 25% infrastructure cost reduction
- Implemented comprehensive data governance framework with RBAC, end-to-end encryption, and lineage tracking via Microsoft Purview to ensure GDPR, HIPAA, and PCI DSS compliance
- Designed and deployed Power BI dashboards featuring advanced KPIs and interactive drilldowns, supporting 200+ stakeholders across business units
- Collaborated with data science teams to provision curated feature datasets in Databricks Delta Lake, accelerating model training cycles by 30%
- Created detailed technical documentation including data flow diagrams, architecture blueprints, and pipeline specifications to ensure maintainability and knowledge transfer
- Optimized Spark jobs and query performance through partitioning strategies and caching mechanisms, improving overall pipeline efficiency by 40%

Data Engineer I Bing Software Solutions Private Limited | Hyderabad, India | January 2022 – November 2023

- Designed and delivered enterprise Power BI dashboards utilizing complex DAX calculations and optimized SQL queries, reducing refresh times by 50% for datasets exceeding 10 million records
- Integrated business intelligence solutions with Azure Synapse Analytics and Snowflake data warehouse, enabling real-time KPI monitoring across multiple business units
- Automated data refresh workflows and validation processes using Power BI Gateway and Python scripts, eliminating 50+ hours of manual work monthly
- Implemented row-level security (RLS) and data governance policies protecting sensitive financial data while maintaining dashboard accessibility
- Partnered with business stakeholders to define and implement 10+ critical KPIs and OKRs, aligning reporting initiatives with strategic business objectives

- Modernized legacy reporting infrastructure by migrating SQL-based reports to optimized DAX measures and tabular data models, improving performance and consistency
- Established standardized BI design templates and governance best practices, increasing report adoption rates by 35%
- Integrated Git version control and DevOps practices into BI development workflows, enhancing team collaboration and deployment efficiency
- Conducted training sessions for business users on Power BI best practices and self-service analytics capabilities

Associate Data Engineer Amigos Software Solutions | Hyderabad, India | May 2020 – December 2021

- Built and maintained ETL pipelines using Informatica PowerCenter, Hadoop, and Apache Hive processing 1TB+ of financial and insurance data daily
- Executed cloud migration project transitioning on-premises data workloads to AWS Glue, Amazon S3, and Amazon Redshift, achieving 20% reduction in compute costs
- Designed and deployed Apache Kafka and Apache Spark streaming pipelines handling 5+ million daily events with 99.9% reliability
- Implemented Delta Live Tables in Databricks enabling low-latency incremental data transformations for real-time analytics requirements
- Developed dimensional data models using Star Schema and Kimball methodology, improving query performance by 40%
- Automated data lineage tracking and audit processes using Apache Atlas, reducing audit preparation time by 70%
- Created custom Python and SQL transformation scripts optimizing data quality and pipeline efficiency
- Collaborated with QA and operations teams to establish automated data validation frameworks and monitoring dashboards, reducing data quality incidents by 45%
- Documented technical specifications and data dictionaries for all ETL processes ensuring knowledge continuity

EDUCATION

Master of Science in Computer Science Campbellsville University | Campbellsville, KY | Graduated: Aug 2025

Bachelor of Science in Computer Science (M.E.Cs) Nizam College | Hyderabad, India | Graduated: 2020
