

Yaswanth Anumolu | Data Engineer

MA, USA | +1 (617) 652-0285 | yaswanthanumolu4@gmail.com | [LinkedIn](#)

SUMMARY

Data Engineer with near 4 years of experience designing, developing, and optimizing ETL/ELT pipelines, data models, and cloud-based data solutions. Skilled in Python, PySpark, SQL, Informatica, Azure (Data Factory, Databricks, Synapse Analytics, Data Lake), Snowflake, Power BI, and Tableau. Experienced in data ingestion, transformation, validation, quality frameworks, governance, predictive analytics, and interactive dashboards. Proven ability to deliver scalable, high-performance data solutions, improve data accuracy and efficiency, and translate complex datasets into actionable insights for stakeholders.

SKILLS

Data Engineering & ETL: ETL/ELT pipeline design and development, data ingestion, transformation, validation, workflow automation.
Big Data & Cloud Platforms: Azure (Data Factory, Databricks, Synapse Analytics, Data Lake), Snowflake, Databricks, AWS basics.
Programming & Scripting: Python, PySpark, SQL, Informatica, Excel (advanced), Power Query, data manipulation and preprocessing.
Data Modeling & Warehousing: Data modeling, schema design, data warehouse optimization, performance tuning for analytics, reporting.
Data Quality & Governance: Data validation, lineage tracking, quality frameworks, compliance, security, governance of sensitive datasets.
Analytics & Visualization: Power BI, Tableau, Excel dashboards, automated reporting, KPI development, trend analysis, predictive modeling, operational analytics.

EXPERIENCE

Data Engineer | M&T Bank | USA

Jul 2024 - Present

- Designed, built, and maintained scalable ETL/ELT pipelines across Azure, Snowflake, and Databricks, integrating structured and unstructured data from multiple banking systems.
- Automated data ingestion, transformation, and validation workflows using SQL, Python, and Informatica, improving timeliness, availability, and reducing manual effort.
- Enhanced and optimized data models to support regulatory reporting, risk management, compliance, and customer analytics, ensuring accuracy and performance for downstream applications.
- Implemented data quality frameworks, lineage tracking, and governance practices to improve trust, reliability, and integrity of mission-critical financial datasets.
- Partnered with business and cross-functional teams to translate requirements into technical solutions, deliver actionable insights, and support lending, credit, and customer engagement decisions.
- Developed interactive dashboards and analytical reports in Power BI and Excel, integrating legacy mainframe systems with cloud solutions to enable near real-time analytics and enterprise reporting.

Data Engineer | K.P.M.G | India

Jan 2022 - Aug 2023

- Designed, developed, and maintained ETL/ELT pipelines using Azure Data Factory, Databricks, and Synapse Analytics, integrating structured and unstructured data from multiple client systems.
- Automated data ingestion, transformation, and validation workflows with Python, PySpark, and SQL, reducing manual effort by 35% and improving data processing efficiency.
- Built and optimized data models and warehouses in Snowflake and Azure Data Lake, supporting client reporting, analytics, and regulatory compliance with high accuracy and reliability.
- Implemented data governance frameworks, lineage tracking, and quality checks, ensuring secure and compliant handling of sensitive client data.
- Partnered with business analysts, data scientists, and client stakeholders to translate requirements into scalable technical solutions, delivering actionable insights and supporting informed decision-making.
- Developed interactive dashboards and reports in Power BI, enabling clients to monitor operational metrics, forecast trends, and improve process efficiency across projects.

Data Analyst | Hexaware Technologies | India

Mar 2021 - Dec 2021

- Collected, cleaned, and validated large datasets from multiple sources, improving data accuracy and consistency by 20% and reducing downstream reporting errors.
- Built and maintained ETL pipelines to integrate structured and unstructured data into centralized repositories, accelerating data availability for analytics and reporting.
- Developed interactive dashboards and automated reports in Power BI and Tableau, reducing manual reporting effort by 30% and enabling leadership to monitor key metrics in real time.
- Applied statistical and predictive modeling techniques using Python and SQL to identify trends, forecast outcomes, and support data-driven business decisions.
- Collaborated with global teams and business stakeholders to translate complex datasets into actionable insights, enhancing operational efficiency and project delivery timelines.
- Supported data migration projects to cloud platforms, improving system scalability and reducing infrastructure costs for clients.

EDUCATION

Master's in Data Preprocessing and preprocessing technologies | Boston University

Dec 2024

Bachelor's in Electronics and communication engineering | Vellore Institute of technology

July 2022
