PROFESSIONAL SUMMARY

Backend Software Engineer with 3+ years of experience building and supporting Java-based backend systems for capital markets and cloud-hosted platforms. Hands-on in Java, Spring Boot, microservices, SQL, and RESTful APIs, with experience in data pipelines, migrations, and production troubleshooting. Deployed services on AWS using Docker and Kubernetes.

CORE SKILLS

Backend & Databases	Java, Spring Boot, Hibernate, JPA, RESTful APIs MySQL, PostgreSQL, MongoDB.
Tools & Build Systems	Git, Postman, Maven, Gradle, Jenkins, Docker.
Cloud & DevOps	AWS (EC2, S3, Lambda, RDS, IAM, Cloud Watch), Kubernetes, CI/CD pipelines.
Testing & Quality	JUnit, Mockito, Postman.
Frontend	HTML5, CSS3, React.js.

EXPERIENCE

Software Engineer Broadridge Financial Solutions	Mar 2022 - Dec 2023 <i>Hyderabad, India</i>
--	--

- Reduced client onboarding time by 30% by engineering automated ETL pipelines by using Java, Python to migrate 5M+ multi-asset trade records from legacy mainframes into the GPTM Data Fabric.
- Achieved 99.9% data migration accuracy (zero critical reconciliation breaks during cutover) by building SQL validation scripts and reconciliation frameworks aligned to T+2 settlement requirements..
- Scaled GPTM Data Fabric by integrating MarkLogic and Semaphore, harmonizing millions of daily trade records across Equities, Fixed Income, and FX to reduce data silos and improve settlement readiness.

Backend Developer Crio.Do	Sept 2021 - Feb 2022 <i>Hyderabad, India</i>
-------------------------------------	---

- Built a Java-based portfolio analysis application (QMoney) using modular OOP design and REST integrations, improving portfolio return analysis speed by 30% for stock advisors.
- Integrated Tiingo stock REST APIs, parsed JSON using Jackson and calculated annualized returns using purchase dates and holding periods.

Software Engineer Aegis Consulting Services	May 2021 - Aug 2021 <i>Hyderabad, India</i>
---	--

- Increased system capacity by 50% and reduced API response time by 30% by developing Java Spring Boot backend APIs with async processing and optimized SQL queries for OLMS.

Software Trainee Adjoint Technologies	Jan 2020 - Dec 2020 <i>Hyderabad, India</i>
---	--

- Modernized a retail supply-chain platform UI using React + Redux, improving usability for warehouse operations and large dataset visualization

PROJECTS

Clustering Predictive Model for Heart Disease

- Built a web app + API for real-time risk scoring, trained Logistic Regression model achieving 85% accuracy.

IoT-Based Vehicle Security Tracking System (GSM/GPS-enabled)

- Built a tracking system that sends automated SMS alerts with live geolocation.

EDUCATION

Master of Computer Science, Auburn University - Montgomery

Jan 2024 - May 2025
