SUMMARY

- **Business Analyst with around 6 years of experience** in driving business strategy, process optimization, and data-driven decision-making.
 - Expert in the Software Development Life Cycle (SDLC) and methodologies like Waterfall and Agile/Scrum.
 - Experience in analyzing and documenting Business Requirements Documents (BRD), Functional Requirements Documents (FRD), Use Cases, and Requirements Traceability Matrix (RTM).
 - Skilled in identifying growth opportunities, streamlining operations, and delivering actionable insights to senior management.
 - Strong track record of leading cross-functional teams, collaborating with key stakeholders, and successfully managing projects to completion.
 - Adept at transforming complex business needs into simple, effective solutions that contribute to organizational success.
 - Experience in designing and deploying data visualizations using Tableau and Power BI.
 - Knowledge of applying business analysis tools like GAP Analysis, SWOT Analyst, Cost-Benefit Analysis, and Risk Analysis.
 - Proficient in writing user stories, acceptance criteria, use cases, and functional requirement documents, creating UML-based diagrams, wireframes, and business process flow diagrams using MS Visio.
-

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall

Languages: SQL, Python

Documentation: FRD, BRD, SRS

Project Management Tools: MS Project, MS SharePoint, Microsoft Office Suite (Excel, PowerPoint, Word)

Visualization Tools / Other Tools: Tableau, Power BI, Figma, Roadmap

Analysis Skills: Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis

Tracking / Software / Other Skills: Jira, MS Visio, JAD, Rational ClearQuest, RTM, UAT, Lucid chart, ETL Process, ELT Process, ERP Systems, Test Outlines & Test Cases, Use Cases & Use Case Mapping, Business Requirements, MS Access, Confluence, Smartsheet, Data modeling, Google Analytics, ServiceNow, business management, SaaS, prototypes, Salesforce, Business Intelligence, Data Analytics, Erwin, Alteryx

Soft Skills: Time management, Leadership and Management, Project Management, Product Management, Problem-Solving, Negotiation, decision-making, Documentation and Presentation, Customer Relationship Management (CRM), Verbal Communication, Critical thinking, Data Interpretation, Logical reasoning, Creative thinking, Adaptability, Collaboration, Analytical reasoning

Operating System: Windows, Linux

EXPERIENCE

Morgan Stanley, USA | Business Analyst

March 2024 - Present

- Led the development and execution of business strategies, contributing to a 15% increase in revenue and market share growth.
- Managed end-to-end development of KPI dashboards using Tableau and Power BI, ensuring real-time tracking of business performance.
- Collaborated with leadership to align business strategies with long-term organizational goals, ensuring sustainability and growth.
- Conducted financial modeling and forecasting to support budget planning and resource allocation, improving accuracy by 12%.
- Led efforts to enhance cross-functional collaboration, reducing project turnaround times by 15% through process improvements.
- Developed a data-driven approach to risk management, reducing operational risks & improving decision-making across the organization.
- Implemented an Agile storyboard framework to manage backlog items, ensuring alignment with business needs and enabling effective resource allocation, resulting in a 25% increase in team productivity.
- Designed and implemented tailored software solutions using tools like SharePoint & VBA scripting for MS Office applications.
- Conducted comprehensive SWOT and Gap analysis to identify functional requirements for new product features, resulting in a 25% increase in user engagement and a 15% boost in customer satisfaction.
- Gathered requirements through integrated JAD sessions, workshops, and several brainstorming sessions with SMEs.
- Spearheaded the implementation of a robust defect tracking system using Jira, leading to enhanced collaboration and improved quality control in subsequent iterations of the application development process; reduced bug fix turnaround time by 30%.
- Directed comprehensive market research and competitive analysis, identifying emerging trends and crafting strategies to capitalize on new business opportunities.
- Designed and implemented process improvement initiatives that resulted in a 10% reduction in operational costs and enhanced efficiency across departments.

Veritas Technologies, India | Business Analyst

March 2020 - June 2022

- Created detailed project artifacts, including stakeholder analysis, Business Requirement Documents (BRD), Functional Requirement Documents (FRD), Test Cases, and Test Plans, ensuring thorough project documentation.
- Gathered and documented detailed business requirements through stakeholder interviews, process mapping, and workflow analysis.
- Collaborated with development teams to create functional specifications, ensuring alignment with business objectives and IT capabilities.
- Managed the implementation of software solutions that improved operational efficiency and reduced manual workflows by 25%.
- Developed and maintained user training materials and documentation, ensuring seamless adoption of new systems.
- Conducted post-implementation reviews to assess the effectiveness of system deployments, identifying areas for further optimization.
- Produced monthly business performance reports, providing senior management with actionable insights to guide decision-making.
- Assisted in the development of budgets, forecasts, and financial models, contributing to accurate financial planning.
- Performed impact analysis and document analysis on existing systems and documents to define business rules for the new solution.

- Created and architect ETL maps and workflow which are reusable, scalable and optimized for high performance
- Translate BI requirements into analytic BI subject areas
- Capacity planning and management by calculating the space required for the table and projecting the data. Extensively queried the Oracle database to insert/update/delete the records in the table.
- Developed and reviewed various technical design documents for the project by working with business and stake holders and subject matter expert.
- Participated in the architect design, review meetings for the projects to understand the business processes and data flows

DMI Financial, India | Business Analyst

Jan 2018 - Feb 2020

- Assisted in gathering business requirements and performing data analysis for various system upgrades and enhancements.
- Coordinated the testing of new systems, ensuring functionality aligned with business needs and user requirements.
- Developed reports and dashboards to track key performance indicators, enabling teams to monitor progress and performance.
- Assisted in process mapping and identifying inefficiencies, contributing to process improvements that led to a 10% increase in operational efficiency.
- Supported project management teams in tracking project timelines, and deliverables, ensuring timely completion of key initiatives.
- Contributed to internal communications by providing detailed project status updates and preparing presentations for senior leadership.
- Developed and executed SQL queries to map and integrate data into a centralized system, resulting in a 40% reduction in data integration errors and streamlining data analysis processes for the team.
- Integrated data collection processes with MS Excel and Power BI, amplifying data accuracy and collection efficiency by 20%.
- Spearheaded Cost-benefit analysis to evaluate investment opportunities and identified areas for cost optimization, resulting in a 30% reduction in operational expenses while maintaining service quality.
- Worked with soft skills like Time management, Leadership and Management, Problem-solving, communication, and Data Warehouse.
- Refined and input business requirements in the HP Quality Center for traceability to test requirements.
- Involved and interacted with various business user groups for gathering requirements for CRM implementation.
- Maintained clear and up-to-date requirements traceability matrices (RTMs) using tools like MS Excel or Smartsheet to track requirements throughout the development lifecycle. (RTM, Microsoft Access, Smartsheet).
- Developed UML diagrams, use cases, and system process flows to improve hospital supply chain efficiency.

EDUCATION

Master in Information Technology Management | Campbellsville University, KY, USA

Bachelor of Pharmacy | Jawaharlal Nehru Technological University, Hyderabad, India
