

ANUSHA DODDA

+1 425-246-1293

PROFESSIONAL SUMMARY

- 8+ years of IT experience and involved in different business intelligence and data warehouse projects and assisted organization to implement data analytical solutions using different databases, ETL and reporting tools.
- Involved in creation of data load and data export scripts using utilities such as SQL-Loader, BTEQ, MultiLoad, FastLoad, TPT and FastExport of Oracle and Teradata databases.
- Skilled in mapping documents driven ETL/ELT design, development and testing of data pipelines using AWS GLUE, Teradata and Informatica tools
- Experienced in manual and automated test strategies and its executions for validating functional, integrations and performance requirements
- Having around 2+ years of hands-on cloud environment work experience in AWS Redshift, GLUE and Data/Delta-lake implementations
- Strong analytical, problem-solving and decision-making capabilities
- 4+ years of HR experience.
- Excellent verbal, interpersonal and written communication skills

TECHNICAL SKILLS

Programming Languages	SQL, PLSQL, Shell Scripting
Hadoop Ecosystem	Hive, PySpark
Database	Teradata, Oracle, Redshift and SQL Server
Reporting Tools	SAP BOBJ and Power-BI
IDE & Tools	Putty, SQL Developer, TOAD and SQL Assistant
Source Control, Deployment	Git, Bitbucket, Bamboo
ETL/ELT Tools	Glue and Informatica
Cloud Environments	AWS
Process/Methodologies	Waterfall, Agile Methodology

EDUCATION AND CIRTIFICATIONS

- Master of Business Administration
- Graduation in B.Sc. (Math's, Computers & Statistics)
- Board of Intermediate Education, Andhra Pradesh
- AWS Solutions Architect Professional

PROFESSIONAL EXPERIENCE

Client	:	APTIV
Period	:	Jan 2021 – Nov 2023
Industry	:	Manufacturing
Project Names	:	EDS & EDW Projects
Project Type	:	Data Ingestion, Data Processing, Data Delivery
Environment	:	AWS Glue, Redshift, SQL Server and Power-Bi, PySpark, S3 and Shell Scripting
Project Overview	:	Contributed to enterprise data warehouse enhancements along with integration of new source systems data for power user BI analytics Involved in digitalization of existing process into AWS cloud systems to integrate new source systems into respective data/delta lake environments for descriptive analytics along with future predictive and prescriptive analytics
Role	:	Data Engineer and Data Analyst

Responsibilities:

- Involved in Power-Bi specific dashboard and reports preparation to provide data insights as per business reporting requirements.
- Development of AWS GLUE data pipelines of existing ETL/ELT legacy EDW processes into AWS cloud environment
- Mapping document related development and testing in accordance with CI & CD process adaptations
- ETL/ELT performance improvements and documenting the best coding standards.
- Managed and involved in agile methodology specific deliverables

Client : **MSA**
Period : Jan 2018 – Dec 2020
Industry : Retail
Project Names : POS Multitenant Data Lake
Project Type : Data Ingestion, Data Processing, Data Delivery
Environment : Teradata, Informatica, Oracle, Autosys and Shell Scripting

Project Overview :
Multitenant Data Lake Platform is a new initiative to implement and support MSA POS data ingestion & unifying the same for different client's reporting functionality with RIS data, which benefits MSA client's Business Analysts to make effective tactical/strategic decisions.

Role : Data Engineer

Responsibilities:

- Developed and enhanced data mapping document listed ETL/ELT design and development data pipelines.
- Involved in performance tuning like creating Partitions and applying data compression techniques for the huge volume of data tables
- Participated in coding to provide reusable based code wrapper modules for data ingestion and data ETL processes to handle multi source systems data for integrated data solution
- Managed and involved in agile methodology specific deliverables
- Improvised the execution timelines of ELT/ETL/Reporting specific queries to provide better value for the solution what has been offered to clients

Client : **MSA**
Period : April 2015 – Dec 2017
Industry : Retail
Project Name : APF
Project Type : Data Ingestion, Data Migration and Data Analytics
Environment : Teradata, Oracle, Autosys and Shell Scripting

Project Overview :
Analytics Platform project is a new initiative to support MSA legacy Retail Business Decision report system with Ad-hoc IBI/MM reporting functionality, which will leverage MSA client's Business Analysts to make effective tactical/strategic decisions.

Role : QA Analyst

Responsibilities:

- Involved in design and manage the execution of test plans to ensure a quality solution is delivered.
- Prepared the functional requirement specific test cases and published the test results to perform business required validations.
- Documenting and sharing QA team best practices/ insights from BI/DW analytics perspective
- Involved in agile methodology specific deliverables

Career History:

Company	Date	Position
Accion Labs, Hyderabad	Jan 2021 To Nov 2023	Data Engineer and Data Analyst
Inrhythm Solutions, Hyderabad	April 2015 To Dec 2020	Data Engineer and QA Analyst
HP, Bangalore	July 2007 to Dec 2008	HR Coordinator
Apex Technologies India Pvt Ltd, Hyderabad	April 2005 to June 2007	HR Executive
NCC, Hyderabad	April 2004 to Mar 2005	Management Trainee
