SUMMARY

- Data Analyst with 4+ years of experience in healthcare and IT, specializing in data automation, predictive analytics, and reporting. Skilled in Python, SQL, SAS, and Tableau to drive insights, optimize workflows, and enhance decision-making. Proven track record of cutting reporting time by 40%, boosting data accuracy by 30%, and improving operational efficiency through automation. Passionate about transforming raw data into actionable intelligence to solve business challenges.

EDUCATION

University of Cincinnati, Carl H. Lindner College of Business

Master of Science in Information Systems

Cincinnati, Ohio

August 2022 – April 2024

Relevant Coursework: System Analysis and Design, Data Modeling, Enterprise Resource Planning, Project Management, Data Wrangling, Data visualization, Data mining

GPA: 3.94

SKILLS

Programming: Python, SQL, R, SAS

Data Visualization: Tableau, Power BI, Advanced Excel, Grafana

Business Intelligence Tools: SAP Cloud Analytics, S/4 HANA, Salesforce, Visio, Lucid chart

Data Analysis: Data Cleaning, Data Modeling, Data Transformation, Data Wrangling, Statistical Analysis

Additional Skills: Jira, Agile, A/B Testing, MySQL, ELK

EXPERIENCE

UnitedHealth Group

United States

Data Analyst

January 2024 – Current

UnitedHealth Group is a Fortune 500 healthcare company with over 400,000 employees, serving 50 million members globally, and generating approximately \$390 billion in annual revenue.

- Analyzed healthcare claims using SAS and SQL, uncovering insights that reduced claim processing time by 15% and improved patient care.
- Developed predictive models to identify high-risk patients, decreasing readmission costs by 10% and enhancing care management.
- Built automated Tableau and Power BI dashboards, cutting report turnaround time by 30% and enabling faster data-driven decisions.
- Optimized data pipelines and reporting frameworks, increasing data accuracy by 25% and ensuring compliance with healthcare regulations.

Skills: Python, SQL, Data Pipelines, Power BI, Tableau, KPIs, Advanced Excel, SAS

Space Infolab

India

Data Analyst

January 2020 – June 2022

Space Infolab is a data solutions provider specializing in advanced analytics and software solutions, with clients across India.

- Implemented customer segmentation using Python and R, driving a 20% increase in marketing effectiveness.
- Optimized product features through A/B testing, boosting user engagement by 12%.
- Automated SQL data extraction, saving 5+ hours weekly and reducing errors by 18%.
- Built predictive sales models, improving revenue forecasting accuracy by 25%.

Data Analyst Intern

October 2019 – December 2020

- Designed interactive dashboards in Power BI and Tableau, cutting reporting time by 40%.
- Enhanced database performance, reducing query execution time by 20% for faster insights.
- Automated data cleaning with Python, increasing data accuracy by 30% and streamlining workflows.

Skills: Python, SQL, R, A/B Testing, Power BI, Tableau, Business Intelligence
