800 W Renner Road, Apt 914, Richardson TX, 75080

EDUCATION

University of Texas at Dallas

Master of Science in Computer Science — GPA: 3.92/4

Aug 2023 – Present

Richardson, Texas

Indian Institute of Information Technology

Bachelor of Technology in Information Technology — GPA: 8.3/10

Aug 2017 – Apr 2021

Gandhinagar, India

EXPERIENCE

Tenet Healthcare

Data Engineering Intern

May 2024 – Dec 2024

Dallas, Texas

- Worked on migration of data pipelines from in-house system to Google cloud by converting 20+ stored procedures from SQL Server to BigQuery.
- Backtracked data lineage reporting tables and achieved 95% data accuracy after migration.
- Developed innovative solutions to address differences between SQL Server and BigQuery, including managing primary key constraints and enabling concurrent execution of stored procedures using shared local table names.
- Developed a Python script to resolve inconsistencies in ingestion data, ensuring seamless and accurate data integration into target tables.

S&P Global

Software Engineer

July 2021 – Apr 2023

Noida, India

- Contributed to the architecture and development of an inbuilt real-time market data processing system, ensuring accurate stock market data delivery on client websites like CNN Money and Financial Times, directly impacting millions of global users and investors.
- Corrected over 90,000 stock timezones by designing a data pipeline using stored procedures and daily DAG, filtering inaccurate records from millions and updating them with accurate exchange and time where it was traded.
- Debugged and resolved 100+ data-related bugs by identifying root causes and implementing fixes in a C++-based QuoteServer and SQL databases, ensuring accurate and reliable market data delivery.
- Developed a Python automation script to compare data feeds from multiple vendors, achieving 95% accuracy and reducing comparison time by 90%.

ZS Associates

Decision Analyst Intern

May 2021 – Jul 2021

Pune, India

- Developed and optimized SQL queries for complex data analysis, including patient segmentation, monthly usage tracking, and persistency calculations, improving data accuracy and insight generation.
- Created and delivered interactive Tableau dashboards to visualize healthcare data trends, enabling informed decision-making for clients.

PROJECTS

Distributed Real-Time Retail Analytics Pipeline

Kafka, Airflow, AWS S3, ClickHouse

Jan 2024 – Mar 2024

- Built a distributed real-time retail analytics pipeline using Kafka, Airflow, S3, and ClickHouse for scalable, low-latency event processing.
- Orchestrated data movement and transformation via Airflow DAGs, ensuring fault-tolerant and recoverable task execution.
- Achieved horizontal scalability and high throughput by decoupling producers and consumers using Kafka's pub-sub architecture.

TECHNICAL SKILLS

Languages: Python, C++, HTML/CSS, SQL

Cloud Platforms: AWS (S3, Athena, Glue, EC2, Lambda), GCP (BigQuery)

Big Data and Analytics: Apache Spark, Hadoop, Kafka, Snowflake, Airflow

Databases: Cassandra, MongoDB

Containerization and Orchestration: Docker, Kubernetes
