EDUCATION

Master of Science in Information Systems and Technologies
University of North Texas

August 2023 – May 2025

Bachelor of Engineering in Computer Science and Engineering
G.V.P College of Engineering for Women, Visakhapatnam

June 2019 – April 2023

TECHNICAL SKILLS

- **Programming Languages:** C, Python, R
- **Databases:** SQL, MySQL, SQL Server, PostgreSQL
- **Data Visualization Tools:** Tableau, Power BI, Matplotlib, Seaborn, Excel
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-Learn
- **Statistical Techniques:** Hypothesis Testing, Regression Analysis, Time Series Analysis, Clustering, Classification
- **ETL & Data Processing:** Data Cleaning, Data Wrangling
- **Big Data Technologies:** Hadoop, Spark
- **Operating Systems & Version Control & CI/CD :** Windows, Git, GitHub

PROJECTS

Sales Performance Dashboard

November 2023 – August 2024

- Designed and deployed a Power BI dashboard to visualize revenue trends, sales growth, and regional performance, improving reporting accessibility for stakeholders by 70%.
- Extracted and aggregated over 500,000 sales records using advanced SQL queries, achieving a 35% reduction in data retrieval time and supporting near real-time analytics.
- Implemented DAX measures for year-over-year and month-over-month growth, increasing forecasting accuracy by 40% across 8 product categories.
- Mapped and analyzed over 20 KPIs across 5 sales regions and 10+ product lines, enabling data-driven decisions in strategic planning and resource allocation.
- Automated Excel data pipelines to reduce manual effort, cutting reporting turnaround time by 50% and decreasing human error in sales summaries.
- Consolidated data from 3 CRM and 2 ERP systems into a centralized model, reducing reconciliation time by 60% and improving cross-departmental visibility.

Telco Customer Churn Prediction & BI Dashboard

June 2025 – August 2025

- Cleaned and transformed telecom customer dataset of 7,043 records using SQL and Python (Pandas, NumPy), handling missing values, categorical encoding, and outlier detection.
- Performed exploratory data analysis (EDA) to uncover key churn drivers, including contract type, monthly charges, and tenure, improving stakeholder understanding of risk factors by 40%.
- Engineered features and built predictive models using Logistic Regression, Random Forest, and XGBoost, achieving 85% accuracy and 82% precision in identifying at-risk customers.
- Automated model training and scoring pipeline, generating predictions for the entire customer base and flagging at-risk customers with a threshold-based classification system.
- Designed an interactive Power BI dashboard to visualize churn KPIs, demographic breakdowns, and customer risk segments, increasing leadership visibility into churn trends by 60%.
- Delivered an end-to-end churn analysis solution, integrating data processing, machine learning, and BI storytelling to support targeted retention strategies and reduce revenue loss.

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – June 2025
- Certified in Microsoft Power BI Data Analyst – Coursera.
- Microsoft Certified: Fabric Data Engineer Associate

- PCAP: Programming Essentials in Python, Cisco Networking Academy & Python Institute – June 2021
