

ANUSHA RAMACHANDRUNI

Charlotte, NC | anusha.ramachandruni@aogjob.com | +1 (216)-376-9687 | [LinkedIn](#) | [GitHub](#)

Enthusiastic data analyst with a Master's in Business Analytics and 4.8 years of experience in healthcare and finance. Skilled in SQL, Python, and Power BI, with a strong focus on data management, statistical analysis, and dashboard development. Eager to apply analytical skills, collaborate cross-functionally, and drive data-driven decision-making to deliver impactful results.

PROFESSIONAL EXPERIENCE

Data Analyst, Epic Systems, USA

January 2023 – Present

- Processed and analyzed over **500,000 patient records** using **SQL**, **Python**, and **R**, improving data integrity and enhancing **reporting accuracy**.
- **Developed** and maintained **Power BI dashboards**, leading to a **20% improvement** in decision-making efficiency.
- **Automated workflows** with **Python scripts**, reducing manual data entry by 30% and boosting productivity.
- Conducted **statistical analyses** such as **regression** and **predictive** modeling to uncover trends in clinical data, informing strategic decisions.
- Collaborated cross-functionally with IT, clinical teams, and business stakeholders to deliver data solutions that enhanced patient care by **optimizing operational workflows**.

Data Analyst, Magna Infotech, India

May 2019 – July 2021

- **Executed ETL processes** using SQL and Python for financial transactions, ensuring high **data accuracy** and **integrity**.
- Built **financial models** in **Excel** and **Python**, reducing operational expenses by 10% through accurate revenue trend forecasting and cost-saving identification
- Created **dashboards** in Power BI, improving executive decision-making with **enhanced data insights**, increasing insights.
- Conducted in-depth **financial analysis**, applying **regression** and **time series analysis** to identify market trends and inform investment decisions.
- **Managed** a **SQL Server-based data warehouse**, optimizing **query performance** by **30%** to enhance data retrieval efficiency.

Data Intern, Magna Infotech, India

August 2018 – May 2019

- Assisted in **analyzing healthcare/financial datasets** using SQL and Excel, supporting senior analysts by preparing **clean** and **accurate data** for **reporting**.
- Developed Power BI dashboards under guidance, contributing to data-driven insights that supported business decision-making. **Automated** routine data processing tasks using Python, **improving operational efficiency** by 20%

EDUCATION

Master in Business Analytics

Jan 2022 - May 2023

University of Scranton | GPA: 3.78

Scranton, PA

Bachelors in Electrical and Electronics Engineering

Aug 2016 - May 2020

Sreenidhi Institute of Science and Technology | GPA: 3.4

Hyderabad, India

PROJECT

Fake News Detection

- Developed a Fake News Detection model using machine learning techniques, applying text pre-processing methods like cleaning and tokenization to optimize true and fake news datasets for training and testing.
- Built an LSTM-based neural network with GloVe embeddings to classify news articles as real or fake, achieving high accuracy on the validation set and monitored model performance through visualizations of training/validation accuracy and loss.

Customer Churn Prediction Model

- Built a customer churn prediction model using the Telco dataset, with data preprocessing (handling missing values, one-hot encoding, and feature normalization) and feature engineering (to boost performance).
- Trained the model with CatBoostClassifier, achieving strong accuracy, precision, recall, F1-score, and ROC-AUC metrics, and evaluated it using key performance indicators for reliability.

TECHNICAL SKILLS

- **Methodologies:** Agile
- **Languages & Databases:** Python, SQL, SQL Server, MongoDB, Azure Data Lake, Amazon Redshift, Amazon DynamoDB
- **Packages:** Spark, Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, Seaborn, TensorFlow
- **Data Analytics & Data Science:** EDA, Data Manipulation, Predictive Analysis, Data Cleaning, Data Mining, Data Visualization, Statistical Modeling, A/B Testing, Hypothesis Testing, Supervised and Unsupervised Learning, Feature Engineering, NLP
- **Cloud:** AWS (Redshift, Athena, Glue, Sage Maker, S3), Azure (Databricks), Docker, Kubernetes, Apache Airflow, Git, GitHub
