EDUCATION

PG – Pace University

Master's in Information Systems

Concentration: Database Management (GPA – 3.70)

May - 2024

UG – NIT Surathkal, Karnataka, India

Bachelor's in Mining Engineering

March - 2022

PROFESSIONAL EXPERIENCE

PAYTM

Bangalore, India

Business Analyst

Sep 2020 – Dec 2022

- Optimized data collection, cleaning, and ETL processes, achieving a remarkable 30% reduction in data processing time and bolstering overall data integrity.
- Generated root cause analysis reports, contributing to an impressive 32% increase in project success rates, showcasing a keen eye for problem-solving.
- Executed SQL data sets for dashboards and reports, enhancing efficient data visualization and analysis, leveraging expertise in database querying.
- Led functional testing, adeptly identifying defects and utilizing JIRA for collaborative issue tracking and resolution within cross-functional teams.
- Applied advanced analytical skills to comprehend complex data landscapes, aligning business processes with organizational objectives through actionable insights.
- Demonstrated proficiency in the utilization of advanced analytics and machine learning techniques to derive actionable insights, enhancing the overall strategic decision-making process.
- Exhibited excellent problem-solving skills and the ability to troubleshoot complex issues in fintech applications, ensuring continuous operation and minimal downtime.

SETTLE METAL

Bangalore, India

Strategic Business Analyst

Aug 2018 - May 2020

- Developed comprehensive Business Requirements Documents and Functional Requirements Documents, facilitating in-depth analysis of data and workflow processes.
- Generated root cause analysis reports, contributing significantly to a remarkable 32% increase in project success rates.
- Designed and executed SQL data sets for dashboards and reports, fostering efficient data visualization and analysis.
- Spearheaded functional testing, adeptly identifying defects and effectively communicating enhancements using JIRA for seamless collaboration within cross-functional teams.
- Played a pivotal role in budgeting and forecasting processes, offering valuable data-driven insights and recommendations to guide sound financial decisions.
- Collaborated with diverse stakeholders, bridging communication gaps between technical and non-technical teams, fostering effective cross-functional collaboration.
- Leveraged expertise in Agile methodologies to streamline project workflows, enhancing overall project efficiency and ensuring timely project deliverables.
- Implemented aggregation processes to create summary datasets, facilitating historical temperature analysis.
- As a Subject Matter Expert (SME), worked closely with repair technicians to understand data requirements.

ACADEMIC PROJECTS

UNI-LIFE - Centralized Management Application for University

May 2024

- Orchestrated development and design of UNI-LIFE, a project management tool for academia.
- Led cross-functional teams to create a prototype aligned with university objectives.
- Implemented key features like task assignment and real-time collaboration.
- Initiated alumni engagement strategies for networking and mentorship.
- Refined the prototype iteratively based on stakeholder feedback.

SKILLS

Data Analysis: Data Visualization, Statistical Analysis, Data Cleaning, Data Storytelling

Languages: Advanced SQL, Python, R, HTML, CSS

Python Libraries: NumPy, Pandas, Matplotlib, Seaborn, Beautiful Soup, Scikit-Learn

Tools: Microsoft Suite, Tableau, Advanced Excel, Google Studio, Power Bi

Project Management: Agile Methodology, Scrum, Kanban, Jira

Operating Systems: Windows, IOS , Linux

Certifications

- Cisco – Networking systems
- Google – Project management
