

Anusha Vajha

Data Analyst

TALLAHASSEE, FL | ANUSHA.VAJHA@HOTMAIL.COM | (904) 556-7037 | LINKEDIN

Summary:

Data Analyst with **3+ years of experience** translating **complex datasets** into **insights** that **increase revenue**, **improve retention**, and **optimize operations** for **U.S. retail** and **marketing enterprises**. Proven track record of delivering **dashboards**, **predictive models**, and **automated data pipelines** that directly influence **executive decisions**. Skilled in **SQL**, **Python**, **Tableau**, **Power BI**, **Snowflake**, and **BigQuery**, with expertise in **ETL automation**, **cloud-based analytics**, and **A/B testing**. Adept at driving measurable **business value** through **data storytelling** and **advanced analytics** on **AWS**, **GCP**, and **Azure**.

Core Competencies:

Programming & Tools: Python, SQL (PostgreSQL, T-SQL, MySQL), R, Jupyter, Git, Spark, Snowflake, Databricks

Cloud Platforms: AWS, GCP, Azure

Data Visualization: Power BI, Tableau, Excel, matplotlib, seaborn

Data Engineering & Automation: ETL/ELT Pipelines, Airflow, API Integration, Data Cleaning, Data Wrangling

Analytics & E-Commerce Expertise: Funnel Analysis, Customer Segmentation, RFM Analysis, CLV Modeling, A/B Testing, Cohort Analysis, Forecasting

Statistical & Machine Learning Techniques: Linear/Logistic Regression, Classification, Random Forest, XGBoost, LASSO, K-Means Clustering, ARIMA, Prophet, Causal Inference

Professional Experience:

Data Analyst, Clairvoyant

Mar 2024 – Present

- Grew marketing conversions 28% by delivering customer-segmentation dashboards that identified high-value cohorts for targeted campaigns (Tableau, Power BI, SQL).
- Added \$180K incremental revenue and improved retention 12% by deploying churn & cross-sell models in Python (Scikit-learn) integrated with marketing workflows.
- Cut monthly reporting time 94% via automated SQL/Python pipelines feeding Power BI reports, enabling next-day decisions across sales and merchandising.
- Accelerated attribution insights by centralizing multi-channel data into Snowflake using Airflow + Fivetran, shortening analysis lead-time from days to hours.
- Lifted CTR 18% on key digital campaigns through systematic A/B test analysis and segmentation-led personalization.

Data Analyst, Avenir Technologies

Aug 2020 - Jun 2022

- Improved campaign responsiveness for 20M+ weekly records by architecting automated pipelines on GCP (BigQuery, Cloud Functions), reducing data latency and increasing campaign agility.
- Increased upsell conversion using product affinity (Market Basket) models—directly informed bundle promotions and drove incremental sales.
- Enabled executive investment decisions by delivering CAC / LTV / ROI dashboards used in quarterly C-suite reviews.
- Reduced ETL manual effort 40% with scripted batch ingestion and validation checks, improving data reliability for downstream analytics.
- Raised promotional pricing accuracy 22% through SQL-based audit reporting and anomaly detection across regional systems.

EDUCATION:

M.S. in Information Systems – Business Intelligence & Analytics, **Middle Tennessee State University**

PROJECT HIGHLIGHTS:

- **Real-Time Inventory Optimization:** Reduced out-of-stock events 10% by building Redshift-powered dashboards driving reorder decisions. (AWS Redshift, Power BI, SQL)
- **Churn & Cross-Sell Production Model:** Increased retention and ARPU by deploying a Python/Scikit-learn pipeline with A/B validated recommendations. (Python, Scikit-learn, SQL)
- **Attribution & ROI Platform:** Shortened marketing insight cycle by integrating GA4, CRM, and transactional data into Snowflake for unified ROI reporting. (Snowflake, Airflow, Tableau)
