EDUCATION

Illinois Institute of Technology | Chicago, IL, United States Aug'24 – May'26

Master of Science, Computer Science

GPA: 3.5/4.0

Coursework: *Advanced Database, Software Project Management, Information Security, Data Preparation and Analysis, Computer Networks, Big Data Technologies, Machine Learning, Software Engineering*

Bangalore Institute of Technology | Bangalore, KA, India

Dec'20 – Jun'24

B.E., Information Science and Engineering

GPA: 3.49/4

Coursework: *Object-oriented programming, Data Structures, Algorithms, Databases, Operating Systems, Networking*

SKILLS

- | | |
|--------------------|---|
| • Languages | Java, C/C++, Python, JavaScript, HTML5, CSS, Angular, Node.js, TypeScript, React |
| • Frameworks/Tools | Git, Jira, CI/CD, Micro services, Linux, Bash, Spring, Docker, Restful APIs, Kubernetes |
| • Cloud and DevOps | AWS (EC2, S3, RDS, IAM, VPC, Lambda), GCP, Azure, Docker, Kubernetes |
| • Database | SQL, MySQL, MongoDB, RDBMS, NoSQL, PostgreSQL, DyamODB |
| • Soft Skills | Collaboration, Problem Solving, Strategic Thinking, Innovation, Ownership |

EXPERIENCE

Software Engineering Intern, Alervio Inc, NJ, United States

Sept'25 – Present

- Building an AI-powered chatbot using LLMs OpenAI, LangChain, and Yelp API to deliver personalized restaurant recommendations while developing REST APIs with database integrations to support allergen detection workflows.
- Designing UI and building a full stack with React, Next.js and Python, implementing unit and integration tests to ensure accuracy, reliability and a stable user experience

Software Engineer, Desi QnA, Bangalore, India

Oct'23 – Mar'24

- Identified and addressed security vulnerabilities in the user registration system by designing and implementing a robust authentication workflow to combat fraudulent bot activity.
- Integrated Google ReCAPTCHA and back-end validation logic, resulting in a 90%+ reduction in fake registrations, significantly enhancing user trust and the platform's overall integrity.

Web Developer, Verzeo, Bangalore, India

Jun – Sep'24

- Designed and developed a responsive front-end business consultancy website using HTML, CSS, and JavaScript, focusing on mobile-first principles to enhance user experience.
- Implemented media queries and ensured cross-browser compatibility, delivering a seamless and consistent interface across devices and platforms.

PROJECTS

Kindra – Crowdfunding Platform for Verified Charities

Feb- Jul'25

- Identified gaps in transparency and security in donation platforms; developed a full-stack system to support verified charitable campaigns with **KYC**, secure payments, and efficient media handling.
- Built and deployed the platform using **Java, Spring, Oauth2, Postgres**, reduced media upload time by 50%, and enhanced donor trust with fraud-resistant verification workflows.

ModuMart: Scalable Microservices E-Commerce Backend

Aug– Dec'24

- Built a scalable microservices e-commerce back-end using **Spring Boot, Kafka** for real-time communication, and Eureka for service discovery to handle product and order management efficiently.
- Containerized **microservices** with **Docker** and implemented a centralized **API Gateway** for secure, efficient routing, resulting in improved system uptime and a 30% reduction in inter-service latency under load.

Fritter - Twitter Clone

Jul–Dec'23

- Led a team of three to develop a full-stack Twitter clone using **HTML, CSS, JavaScript, Python, PHP**, and **MySQL**, focusing on scalable architecture and secure user authentication.
- Implemented core Twitter features—tweets, comments, retweets, follows, and added voice messaging and time-limited post editing to enhance user engagement and reflect real-world platform behavior.

CERTIFICATION

- AWS Certified Cloud Practitioner (CLF-C02)- Amazon Web Services
- AWS Cloud Technical Essentials
