PROFESSIONAL SUMMARY

Analytical and detail oriented Data Analyst with 3.5+ years of experience transforming complex data into clear, actionable insights across finance, healthcare. I combine strong technical expertise in SQL, Python, R, and AWS with a problem solving mindset to design dashboards, automate workflows, and identify patterns that guide strategic decisions. I value collaboration and curiosity connecting data with real world outcomes to improve customer experiences, optimize performance, and help organizations make confident, data-informed choices.

TECHNICAL SKILLS

Programming & Scripting	Python (Pandas, NumPy, scikit-learn), R, SQL, T-SQL, PL/SQL
BI & Visualization & Reporting	Power BI (DAX, Power Query, Dataflows, RLS), Tableau, QlikView, SSRS, Excel (Power Query, Pivot Tables, Power Pivot), Oracle APEX, R Shiny
ETL & Data Integration	Azure Data Factory (ADF), SSIS, Kafka, AWS Glue, Spark SQL, Dataflows
Databases & Warehousing	SQL Server (2014/2016/2019), Azure SQL Database, PostgreSQL, Snowflake, Teradata, AWS Redshift, Google Big Query
Cloud Platforms	Microsoft Azure, AWS (S3, Glue, Redshift), Google Cloud Platform (GCP)
Automation & Workflow Tools	Power Automate, Git, TFS, Visual Studio, SharePoint, Confluence
Data Analysis & Modeling	Data Cleaning, Data Profiling, Statistical Analysis, Forecasting, Clustering, A/B Testing, Predictive Modeling, Data Modeling (Star/Snowflake Schemas)
Data Governance & Quality	Data Validation, Data Lineage, Documentation, RLS Implementation, Compliance Standards
Project & Collaboration Tools	Microsoft Teams, Jira, SharePoint, GitHub, Confluence
Operating Systems	Windows, Linux

PROFESSIONAL EXPERIENCE

- Data Analyst- EXL, Jersey City, NJ(Oct 2024-Present)
- Analyzed large and complex datasets across **AWS**, **Azure**, and **on-prem SQL Server** to uncover trends, identify opportunities, and deliver insights that guided strategic decisions.
 - Designed, developed, and maintained **interactive Power BI dashboards** with real-time data connections, drill-down features, and intuitive visuals that helped business teams monitor KPIs and performance metrics.

- Created over **100 DAX measures** and calculated columns to enable advanced analytics, forecasting, and executive-level financial reporting.
- Connected **Power BI** with diverse data sources including **Azure SQL Database, Azure Data Lake, SharePoint, Snowflake, and PostgreSQL** to deliver integrated and cloud-first business intelligence solutions.
- Automated recurring reports and data refreshes using **Power Automate** and **Power BI Subscriptions**, saving 30+ hours monthly and improving reporting accuracy and timeliness.
- Built reusable **Power BI Dataflows** and implemented **Row-Level Security (RLS)** and governance best practices to ensure consistent, secure, and compliant data access.
- Conducted in-depth **data profiling** and quality checks to ensure completeness, accuracy, and reliability of datasets used for reporting and analytics.
- Wrote and optimized **SQL** and **T-SQL** queries to clean, transform, and aggregate data from multiple systems into analytics-ready datasets.
- Designed and documented **data models** (fact and dimension tables) to improve report performance and scalability across Power BI and SQL Server.
- Partnered with finance, operations, and compliance teams to translate business needs into actionable metrics, KPIs, and self-service dashboards that improved data-driven decision-making.
- Used **Python (Pandas, NumPy, scikit-learn)** for advanced data analysis, automation, and predictive modeling to support initiatives like fraud detection and supply chain optimization.
- Collaborated with data engineering teams on **ETL pipeline design** using **Azure Data Factory, SSIS, and Kafka**, ensuring data reliability and accessibility for analytics use cases.
- Supported **A/B testing** and experimental design by analyzing data to measure the impact of product and process improvements.
- Presented insights through compelling **visual storytelling**, enabling non-technical stakeholders to easily interpret complex data findings.
- Led **Power BI training sessions** and documentation efforts, increasing adoption of data tools and promoting a self-service analytics culture across teams.
- **Technical Environment: Power BI, DAX, Power Query, SQL Server, Azure, AWS, Python, SSIS, Azure Data Factory, Snowflake, Tableau, SharePoint, Power Automate, Excel, Spark SQL**

Data Analyst -Tata Consultancy Services Pvt Ltd, India

(Jan 2022– Dec 2023)

- Cleaned, transformed, and preprocessed large healthcare datasets to ensure **data accuracy and reliability** for reporting and analysis.
- Generated **daily, monthly, and ad-hoc reports** using **SQL, PL/SQL, and SSRS**, providing actionable insights on claims, patient care, and operational KPIs.
- Built and maintained **interactive dashboards** in **Tableau, Power BI, and QlikView**, tracking trends and KPIs to support **data driven decisions**.
- Conducted **statistical analysis and data mining** (clustering, decision trees) and automated recurring analysis workflows using **Python, R, and Oracle APEX/R Shiny**, improving reporting efficiency.
- Managed **Excel (Pivot Tables, Power Query), Teradata, and SAS** for data validation, aggregation, and advanced analysis.
- Performed **trend, variance, and anomaly analysis** on claims and operational data, supporting process improvement and strategic decision making.
- Collaborated with stakeholders to **translate business requirements into reports, dashboards, and KPI solutions**, ensuring alignment with healthcare compliance standards.
- Maintained **data governance, documentation, and reporting workflows**, ensuring transparency and consistency across analytical projects.

- **Technical Environment:** SQL, PL/SQL, SSRS, Tableau, Power BI, QlikView, Excel, Python, R, Oracle APEX, Teradata, SAS

SQL Analyst – Accenture, India

(Feb 2021- Dec 2021)

- Developed and optimized **complex SQL queries, joins, views, stored procedures, and user defined functions** to **extract, transform, and validate data** across multiple relational databases.
 - Designed and maintained **ETL workflows** to move and integrate data from **OLTP to OLAP** systems, ensuring high **data quality** for reporting.
 - Built and modified **interactive dashboards and reports** using **Power BI** and **Tableau**, including **drill down functionality** and **KPI tracking** to support business decision making.
 - Automated **report refreshes, database monitoring, and scheduled jobs** to improve performance and reduce downtime.
 - Documented and maintained **data models, business rules, and reporting processes** using **SharePoint, Microsoft Word, and Confluence** for team collaboration.
 - Collaborated with cross functional teams to **gather requirements, translate business needs into data models, and deliver actionable insights**.
 - Managed **version control** of SQL scripts and reports using Git and TFS.
 - **Technical Environment:** SQL Server (2014/2016/2019), **Power BI, Tableau, Excel** (Power Query, Pivot Tables), **Git, TFS, Visual Studio, SharePoint**.
-

PROJECTS

- **Airbnb Data Visualization (Tableau)-** Built an interactive Tableau dashboard to analyze Airbnb listings, focusing on pricing trends by bedroom count, neighborhood zip codes and seasonal revenue.

Technical Environment: Tableau, Excel, SQL, Python

- **Bank Loan Report Analysis (Power BI)-** Built an interactive Power BI dashboard analyzing 38k+ loan applications, using data modeling, DAX, and visualization techniques to track KPIs, uncover risk patterns, and deliver actionable insights that supported smarter financial decision-making.

Technical Environment: Power BI, DAX, SQL, Python, Excel

EDUCATION:

- MS in Information Technology Management -St. Francis College, Brooklyn, New York
- Bachelors in Computer Science- Rajiv Gandhi University, India
