Professional Summary

Master of Public Health (MPH) graduate and current MSc Global Public Health candidate with demonstrated expertise in epidemiological methods, quantitative research, and program coordination in diverse and urban populations. Experienced in data analysis using SAS, SPSS, and STATA, and dedicated to improving health outcomes through evidence-based strategies and community-centered initiatives.

Education

University of Greenwich | London, England

MSc Global Public Health (*Expected 2025*)

Georgia State University | Atlanta, GA

MPH Epidemiology, Magna Cum Laude

Georgia State University | Atlanta, GA

BS Public Health, Magna Cum Laude

Honors: President's List, Dean's List, Global Scholar.

Achievements & Research Highlights

Graduate Research Internship. Participated in Georgia State University's MPH internship program under the supervision of Dr. Scott Weaver. Analyzed behavioral survey data on tobacco-free ENDS using SAS; identified trends and data anomalies to inform communication strategies. Presented findings in a formal presentation at GSU Public Health Research Day.

BSPH 4+1 Accelerated Program. Completed graduate-level coursework in epidemiology and health policy as an undergraduate. Collaborated with interdisciplinary teams to develop public health interventions and conduct field-based research.

U.K. Epidemiology Field School: A Study on Global Urban Cities. Participated in a study on global urban cities with University of Manchester faculty. Analyzed health disparities in Manchester and co-developed community-centered recommendations for reducing local inequities.

Experience

Gwinnett Clinic | Front Office Neurology Manager

2023-2024

- Reviewed and triaged patient cases daily, ensuring completeness and accuracy of documentation.
- Communicated with physicians regarding abnormal findings and escalated urgent cases, demonstrating skills in case management and clinical coordination.
- Assisted in data entry and tracking for neurological assessments, aligning with surveillance system data entry tasks.

Georgia State University Law Library | Librarian Assistant

2021-2023

- Streamlined circulation and study room scheduling processes, improving operational efficiency and student satisfaction.
- Collaborated with library staff on user experience enhancements, including clearer signage and accessibility efforts.
- Developed strong customer service and front-desk communication skills in a fast-paced academic setting.

Presentations

Georgia State University's Public Health Research Day

April 2024

Presented original research on the relationship between awareness and perception of tobacco-free ENDS products. Utilized SAS to identify behavioral trends among youth respondents.

Volunteering & Involvement

- Healthwatch, City of London (*June 2025 – Present*)
- Health Management Society (*June 2025 – Present*)
- Royal Society for Public Health (*June 2025 – Present*)
- Student Representative, MSc Global Public Health (*Oct 2024 – Present*)
- SPH Alumni Mentoring Program (*Aug 2023 – May 2024*)
- Global Ambassador Program (*Aug 2022 – May 2024*)
- President, Sigma Sigma Rho Sorority, Inc. (*Jan 2022 – Dec 2022*)
- Vice President, Sigma Sigma Rho Sorority, Inc. (*Jan 2021 – Dec 2021*)
- Georgia Prevention Project (*Jan 2021 – May 2023*)
- Undergraduate Public Health Club (*Aug 2021 – May 2023*)
- GhU Coordinator, GlobeMed at GSU (*Jan 2021 – Dec 2021*)

Skills & Interests

Surveillance Systems & Reporting: Familiarity with surveillance procedures; skilled in reviewing reports for completeness and following up for data clarification.

Data Management: Proficient in data entry and analysis using SAS, SPSS, and STATA; experienced in identifying and correcting data quality issues.

Public Health Communication: Comfortable educating professionals on guidelines and procedures; effective in triaging and handling health-related calls and inquiries.

Cross-functional Collaboration: Proven ability to work with interdisciplinary teams and government partners; contributed to initiatives involving multiple public health units.

Technical Tools: SAS, SPSS, STATA, and Microsoft Excel
