PROFESSIONAL EXPERIENCE

General Motors, Austin, Texas

JULY 2022 - Present

Software Developer

- Collaborated with South American dealers to resolve bugs on Buick, Cadillac, GMC, & Chevrolet websites, reducing resolution time by 90% through the implementation of Agile methodologies.
- Resolved around 5 bugs/user stories within each sprint, showcasing strong problem-solving skills and technical acumen.
- Conducted code reviews and provided guidance on best practices for automation testing within Agile software development processes.
- Developed and implemented automated test scripts to increase testing efficiency and accuracy.
- Developed and executed performance test plans and scripts using tools such as JMeter and LoadRunner to stimulate high user loads and stress test systems.
- Conducted regular risk assessments and security audits to identify potential vulnerabilities and recommend corrective actions prior to Quantum deployments.
- Actively engaged in the rigorous JEDI Security Program as a mentor, gaining advanced training in threat analysis, incident response, and third-party risk management.
- Collaborated with cross-functional teams to identify opportunities for automation and implement solutions to improve productivity.

The Interpublic Group of Companies, Jersey City, New Jersey

MAY 2021 - MARCH 2022

Information Security Intern

- Performed deep technical analysis on 30+ open issues/vulnerabilities among 5 major networks to provide management a plan of action for reducing risks from third-party vendors.
- Audit IPG's networks and agencies to ensure adherence to IPG's Central Compliance Requirements. Remediated all non-compliance issues within the timeframe.
- Ensure all existing and developed policies such as internal audit and SOX are in compliance with IPG's standards.
- Facilitated security controls and risk analysis for incident evaluation and exceptions management.
- Collaborated with team to administer a Phishing campaign to heighten cybersecurity awareness from 53% to 94% by providing ongoing training on common security vulnerabilities, phishing attack prevention, and IT compliance adherence.
- Managed coordination of IT Compliance Testing activities and communications with internal and external auditors and accessors.
- Partnered with the Third Party Risk Managements team and screened prospective clients for security risks.

OmniSoc Elastic, Edison, New Jersey

JULY 2020 - AUGUST 2020

Cybersecurity Internship Program

- Conceptualized Kibana and navigated through pre-made dashboards to formulate strategies to efficiently filter and search through the Lucene Query System.
- Collaborated with the Security Administration team in evaluating Zeek Logs.
- Evaluated Incident Response protocols and gained knowledge on identification of malicious activity.

Frontend Developer Intern

- Collaborated with Software Engineers from Amazon and Netflix to create an application that will make the top 3 food banks in New York City more easily accessible to the public during the pandemic.
- Pioneered team of 5 to develop an iOS and Android based application - Ample - which allows food banks to track inventory count and provide general public with real-time information on stock and necessary donations.
- Utilized HTML, CSS, and JavaScript to create interactive components and troubleshoot technical issues as they arose.

EDUCATION

Bachelor of Science in Computer Science September 2018 - May 2022

Rutgers University, New Brunswick

- Dean's List, Women in Information Technology and Informatics Events Committee, Rutgers University
Programming Association Member

KEY SKILLS

- Java
- HTML, CSS
- Python
- Microsoft Excel
- Agile Methodologies
- UI/UX
- Vulnerability Locating & Remediation
- Performance Testing
