SUMMARY

Master's student in Information Science (GPA 4.0, graduating Dec 2025) with professional experience as a Junior Data Analyst and IT Associate. Skilled in SQL, Python, Tableau, Power BI, and Excel with expertise in building dashboards, automating data pipelines, and analyzing large datasets to drive decision-making. Proven ability to improve reporting efficiency, uncover insights, and communicate results to stakeholders. Open to Data Analyst, Business Analyst, BI Analyst, and related roles — internship or full-time — starting immediately.

EDUCATION

University of North Texas, Denton, Texas

Jan 2024 - Jan 2026

Master of Science, Information Science

Denton, Texas

- **GPA:** 4.0
- **Coursework:** Data Visualization, Data Modeling, Project Management, Cyber Security, Data Analytics

TECHNICAL SKILLS

- **Languages:** Python, SQL, R, Bash, C++
- **Data Analysis:** Statistical Analysis, Predictive Modeling, A/B Testing, KPI Reporting, Data Storytelling, ETL Processes, Data Cleansing
- **Visualization & Reporting:** Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools & Platforms:** AWS, Google BigQuery, Google Cloud Platform, Jupyter, Git
- **Big Data & ETL:** PySpark, Data Pipelines, Data Warehousing Concepts

EMPLOYMENT EXPERIENCE

New Zen Infotech

Aug 2022 - Nov 2023

Junior Data Analyst

Hyderabad, India

- Developed SQL-based data pipelines to process 2,000+ weekly user records, improving reporting efficiency by 25%.
- Built interactive Power BI dashboards to visualize product usage trends across 3 departments.
- Collaborated with stakeholders to define business KPIs, automate engagement reporting, and support data-driven decision-making.
- Created MySQL and MongoDB database schemas to support scalable analytics solutions.
- Translated complex data outputs into stakeholder-friendly visuals and narratives for decision-making.

NTT DATA Global Delivery Services Private Limited

Feb 2022 - Aug 2022

Information Technology Senior Associate

Remote

- Automated weekly program reports using SQL, reducing manual reporting workload by 30%.
- Developed a dashboard to track code quality KPIs for 50+ engineers, enabling early detection of performance issues.
- Conducted root cause analysis on 200+ data defects, leading to a 15% reduction in repeat issues.
- Collaborated using Agile methodology to deliver data reports on time in cross-functional sprints.

PROJECTS

Foodlytics Revenue Optimization Project

Feb 2024 - Apr 2024

- Analyzed restaurant sales and customer transaction datasets using SQL and Python (pandas) to uncover high-margin items, seasonal trends, and underperforming menu categories.
- Developed an interactive Power BI dashboard visualizing revenue trends, profit breakdowns, and customer segments, enabling actionable decision-making for pricing and inventory.
- Provided data-driven recommendations that improved projected revenue by **15%**, optimizing menu offerings and operational efficiency.

Ethical Data Audit Tool – Quantifying Risk & Compliance Gaps

Aug 2024 - Dec 2024

- Built a Python-based tool to classify sensitive data (PII, health, financial) using NER (spaCy) and regex detection, enabling identification of compliance risks.
- Created a quantitative risk scoring framework aligned with GDPR, HIPAA, and CCPA, highlighting gaps in data governance and storage practices.
- Designed visual dashboards and exportable audit reports to summarize risks, making insights actionable for stakeholders and improving regulatory readiness.

Consumer Sentiment & Feature Fatigue Analytics

Apr 2025 - Present

- Collected and analyzed product reviews and social media posts using NLP (NLTK, Transformers) to extract feature-level sentiment and detect early signs of “feature fatigue.”
- Developed a feature prioritization matrix mapping usage vs. sentiment to guide redesign, simplification, or removal of low-value features.

- Delivered insights via interactive dashboards, enabling product teams to improve customer experience and make data-backed redesign decisions.

CERTIFICATIONS

- Google Data Analytics Professional Certificate.
- Excel for Data Analytics and Business Intelligence.
- SQL for Data Science.
- Tableau Dashboards and Data Visualization.
