

ANVESHNA SINGH

Software Engineer

• (856) 257-4229 • singha74@rowan.edu • github.com/Anveshnaaa • www.linkedin.com/in/anveshnasingh

SUMMARY

Computer Science senior at Rowan University with hands-on experience designing scalable software solutions. Successfully developed and deployed scalable projects for healthcare analytics, inventory optimization, and social media insights. Proficient in full-stack development, integrating machine learning into scalable software systems. Actively seeking entry-level software developer roles with flexibility for relocation and remote opportunities.

EDUCATION

Bachelor of Science in Computer Science, **GPA 3.97**

Rowan University

Glassboro, NJ, USA

May 2026

SKILLS

- Programming Languages: Python, Java, C++, JavaScript, SQL, R, C#
- Web Development: Django, Flask, HTML, CSS, Node.js, Express.js, REST APIs, React
- Data Tools and Cloud Platforms: AWS (Lambda, S3, Docker), Git, GitHub, Microsoft Azure, Tableau, Power BI
- Machine Learning Frameworks: TensorFlow, OpenCV, NLP, RAG pipelines
- IoT and Embedded Systems: Arduino, Raspberry Pi, Sensors (DHT22, Load Cell)
- Databases: MongoDB, MySQL, PostgreSQL
- Coursework: Data Structures & Algorithms, Operating Systems, Databases, Software Engineering, OOP, Computer Architecture
- Soft Skills: Learning new technologies, Communication, Leadership skills, Committed, Adaptable, Detail-oriented

EXPERIENCE

Rowan University

Product Owner

NJ, USA

Aug 2025 – Present

- Contributing to a team-built intelligent PDF extraction system using C#/.NET 9 and Blazor, integrating YOLOv11 via ONNX to convert engineering drawings into structured data with 0.995 IoU.
- Collaborated with engineers in an Agile Scrum team in an agile environment using scrum practices, translating requirements, managing backlog, maintaining documentation, and ensuring smooth cross-functional collaboration.

Aurora Event Executors

Software Development Intern

New Delhi, India

Oct 2023 – Jan 2024

- Redesigned automated weekly reporting with SQL and Python (Pandas/Matplotlib) to generate dashboards and KPI visualizations.
- Replaced more than 5 spreadsheets, saving approximately 6 hours per week and clarifying growth and retention.
- Performed debugging and resolved defects in multi-module systems.
- Cleaned and standardized datasets; documented KPI definitions to ensure consistent and reliable weekly metrics.

PROJECTS

- Pill Pilot - AI Medicine Inventory System: Built a system for pharmacy distributors (50+ stores, 18K records) that improved inventory accuracy and helped decrease waste and stockouts by using machine learning to optimize stock transfers and reduce stockouts/waste by ~25%. Added a responsive dashboard using HTML/CSS/JS and Plotly, and optimized DB queries with Numpy.
- AWS CI/CD Data Pipeline: Built an automated AWS data pipeline (S3, Lambda, Docker, Boto3) to processes and enrich movie datasets via external APIs. Implemented a multi-filter analytics (genre, actor pairs, country trends) and wired a CI/CD workflow so new data triggers zero-touch redeployments and live UI refreshes.
- IoT Smart Weight Prototype: Created a load cell-based prototype measuring weight ($\pm 50g$ accuracy), processed in Python and coded a compact ThingSpeak-based web UI for real-time data monitoring while outlining integration paths for gym equipment automation.
- ReAura - Sustainability Tracker App: Built a unique web application to generate personalized sustainability and reward scores by analyzing clothing images and metadata through an AI model promoting 30–40% reduced textile waste. Includes a responsive React UI, Flask-based ML microservices, Chart.js for visual insights and MongoDB for storage.

ACHIEVEMENTS

- Top 10 finalist – Coding Ninjas ML Hackathon, demonstrating competitive problem-solving and collaboration.
- Presented a paper on "Bias in Facial Recognition Algorithms" at the IEEE Student Conference 2023.
- Represented my state at 5+ national-level elocution & debate competitions, Host for All India Radio.
- Medals in National-Level Olympiads, reflecting problem-solving ability and competitive excellence.
- Qualified Visharad in Bharatnatyam Dance (equivalent to a bachelor's degree), demonstrating discipline and cultural awareness.
- Choreography Chair for 2 years, leading rehearsals and creative direction; performed in 8+ collegiate dance events across campuses.
- Volunteered 3+ years with NGOs, supporting food distribution and hunger-relief initiatives impacting underserved communities.
