

Anvitha Kempegowda

(413) 275-0584 | www.linkedin.com/in/anvithagowda | anv3314@gmail.com

SKILLS

- **Programming & Data Analysis:** Python (Pandas, NumPy, Scikit-learn), SQL, R
- **Certification:** Agile Project Management, AWS Cloud Practitioner, Google Data Analytics Certification
- **Tools:** AWS, Tableau, Power BI, SAP, Excel, Azure
- **Strengths:** Data Ops- (Data Cleaning, Data Transformation, Feature Engineering) ML- (Regression, Classification, Model Evaluation)
- **Work Authorization:** F1-OPT

EDUCATION

University of Massachusetts Amherst

May 2025

Master of Science in Business Analytics (Data & AI Focus) GPA: 3.78

BMS College Of Engineering

May 2022

Bachelor of Science in Computer Science Engineering, GPA: 3.57

EXPERIENCE

Caterpillar Inc.

August 2023– January 2024

Business Intelligence Engineer

- Built automated-ETL Pipelines, replacing legacy infrastructure, improving retrieval speed by 40% (using Python & SQL)
- Developed 30+ Tableau dashboards to visualize key performance metrics, driving data-informed decisions
- Led Organization-wide initiative to standardize ETL-dashboard development, which reduced timelines by 10 days (on average)
- Partnered with cross-functional teams to analyze business operations and recommend data-driven improvements.
- Tools: Python, SQL, AWS, Tableau, Excel

SLN Contractors and Developers

July 2020- August 2023

Strategic Operations & Data Analytics Consultant

- Led a Lean Six Sigma initiative, cutting 30% of non-value steps across construction and saving \$200K.
- Deployed a data pipeline (Excel, SQL, Python, AWS, Power BI) for real-time insights, accelerating decisions by 20%.
- Implemented forecasting (ARIMA, Monte Carlo) to reduce regulatory delays by 40% and achieve a 95% on-time rate.
- Collaborated with finance and procurement on data-driven negotiations, cutting material costs by 10% and boosting profit margins by 15%.
- Tools: Python, SQL, AWS, PowerBI, Excel

EkStep Foundation

Research Analyst

November 2021 - March 2022

- Conducted large-scale data mining and predictive modelling to support strategic initiatives.
- Developed Python-based automation scripts, improving data preprocessing efficiency by 30%.
- Delivered statistical analyses and reports to inform AI-driven policy recommendations.
- Tools: Python, SQL

PROJECTS

Supply Chain Customer Response Analysis

May 2024

- Leveraged Tableau to analyse supply chain data, uncover inefficiencies, and enhance visibility into inventory levels, shipment performance, and order fulfilment
- Developed dynamic dashboards that yielded actionable insights, driving a 20% reduction in supply chain inefficiencies.
- Increased scheduling accuracy by 15% and reduced costs through advanced data visualizations and analysis.

Neurological Data Analysis for Predicting Patient Outcomes

Jan 2025

- Developed deep learning models in Python for the analysis of EEG and vital sign telemetry data to predict patient outcomes.
- Engineered datasets from Electronic Health Records (EHR) to facilitate trend analysis and predict patient recovery patterns.
- Utilized statistical modelling and predictive analytics to evaluate the impact of different treatments on patient recovery.

AI-Driven Blood Donor Matching System

Sept 2023

- Designed and implemented an AI-based web application for donor-recipient matching, improving donor identification accuracy by 17%.
- Conducted A/B testing to optimize performance and user experience, increasing donor registrations by 40%.
