

APARNA KONDAM Healthcare Data Analyst

aparnakondam@gmail.com | (203) 556-2837 | USA | [LinkedIn](#)

Summary

Healthcare Data Analyst with 3+ years of experience leveraging clinical knowledge and analytical tools to transform complex health data into actionable insights. Skilled in SQL, Python, Power BI, and HER data extraction, with a strong foundation in nutrition and chronic disease data analysis. Proven ability to collaborate across clinical and IT teams to drive data-informed decisions, ensure compliance, and support population health initiative.

Technical Skills

- Programming Language:** SQL, Python (pandas, NumPy), Excel, R, NoSQL, MATLAB.
- Data Visualization Tools:** Power BI, Tableau, Data Bricks, MS Excel, Google Analytics, Data (Modeling, Mapping, Mining, Extraction, Transformation), Salesforce, Jira, Confluence, Big-Query, Microsoft SharePoint.
- Healthcare IT:** HER/EMR Systems (Epic, Cerner), HL7, FHIR, ICD-10, SNOMED.
- Data Management & Analysis:** Data cleaning, transformation and integration.
- Reporting & Metrics:** KPI tracking, outcomes reporting, quality dashboards.
- Regulatory Knowledge:** HIPAA, data governance, healthcare compliance.
- Health Informatics:** CPT, ICD, LOINC, SNOMED, RxNorm, FHIR, HL7, HIPAA, HER, Mirth connect, Medicare, Medicaid.

Professional Experience

Healthcare Data Analyst, Hartford Healthcare

08/2024 – Present | CT, USA

- Developed and deployed dynamic dashboards in Power BI to track clinical KPIs, improving visibility into chronic disease trends and physician adherence.
- Extracted, transformed, and analyzed structured/unstructured EHR data from Epic and Cerner using SQL and Python for clinical decision support.
- Automated recurring data reports and SQL workflows, reducing manual effort by 40% and improving reporting accuracy.
- Partnered with clinical informatics and IT teams to normalize patient-level data across systems while ensuring HL7/FHIR compliance.
- Supported HIPAA audits by documenting data workflows, access controls, and compliance logs.
- Built and maintained data pipelines for population health analytics, aiding in care gap identification and intervention targeting.
- Analyzed patient outcome metrics to support quality improvement initiatives and reduced readmission rates by 8%.
- Conducted A/B testing and data validation to assess effectiveness of provider-based interventions.
- Provided ad hoc analytics and executive summaries to stakeholders using Tableau and SQL Server.

Healthcare Data Analyst – SunCare Nutrition & Diagnostics

10/2022 – 06/2024 | Remote

- Conducted statistical analysis on patient nutrition and chronic care data using Python (Pandas, NumPy) and R.
- Designed data models and built quality dashboards in Power BI for real-time monitoring of patient engagement and dietary outcomes.
- Cleaned, transformed, and validated datasets sourced from clinical interviews and HER systems (Epic, Cerner).
- Collaborated with clinical stakeholders and product teams in Agile sprints to deliver MVPs for data-driven decision tools.
- Prepared datasets and visual summaries for publication and compliance documentation.
- Led integration of dietary intervention metrics into centralized patient data warehouse.
- Ensured data security and regulatory adherence through HIPAA-compliant data handling practices.
- Applied CPT and ICD-10 coding knowledge to validate nutrition billing data.
- Developed predictive models for patient adherence risk scoring and nutritional improvement planning.

Clinical Data Coordinator – VitaWell Healthcare Pvt, Ltd

04/2020 – 09/2022 | India

- Managed clinical nutrition data workflows, including data collection, ETL, and reporting from proprietary EMR systems.
- Conducted root cause analysis and performance metrics tracking for dietary intervention outcomes across 500+ patients.
- Created automated Excel dashboards for monthly reporting and tracked patient compliance metrics.
- Collaborated with cross-functional teams to align clinical protocols with data analysis goals.
- Documented SOPs for data governance, patient confidentiality, and reporting standards.
- Applied ICD-10 and SNOMED terms in structured data labeling for interoperability.
- Assisted in the development and implementation of digital dashboards to track dietary improvements.
- Standardized data capture protocols, increasing reporting accuracy by 30%.
- Supported initial rollout of EHR-linked nutrition intervention dashboard and trained end-users.

Education

Master's Degree, Sacred Heart University
Health Informatics

Connecticut, USA
08/2023 – 12/2024

Bachelor's Degree, Prist University
Bsc Food Science & Nutrition with dietetics

Tamil Nadu, India
06/2016 – 06/2020
