Summary

Data Analyst with hands-on experience using SQL, Python, and R to extract actionable insights from large datasets. Skilled in building interactive dashboards with Tableau and Power BI to support strategic decision-making. Strong background in stakeholder communication, operational efficiency, and cross-functional collaboration. Holds an MS in Business Analytics and an Advanced Certificate in Data Science.

Skills

SQL, Python, R, Tableau, Excel, PowerPoint, SAS, Power BI, GSuite, Looker, Data Analysis, Communication, Statistical Analysis

Experience

Mar 25 - Present

Advance Pet Product – Remote

Data Analyst

- Collaborating with cross-functional teams on the development of a new company website; provided detailed UX and content feedback to ensure alignment with user expectations and brand goals.
- Conduct thorough evaluations of website structure, design, and user flow, offering actionable suggestions to improve usability and visual consistency.
- Redesigned the full product catalog into a compelling visual format, improving stakeholder understanding and product visibility.

Aug 23 – Nov 23

QL2 Software – College Park, Maryland

Business Analyst Intern

- Analyzed airline industry trends, executing SQL queries to handle over 20 million records, simplifying complex data into actionable insights.
- Designed a Python script that reduced data cleaning time by 70%, ensuring consistency.
- Developed Tableau dashboards to visualize market trends and competitive analyses for strategic decisions.

Jun 23 – Aug 23

Shea Radiance – Savage, Maryland

Business Analyst Intern

- Performed exploratory data analysis, identified complex trends and patterns for a small business.
- Developed interactive Tableau dashboards highlighting eight key areas for strategic expansion and operational optimization.
- Developed an inventory management system spreadsheet that enables accurate tracking and forecasting of inventory levels, minimizing stockouts and excesses.
- Translated client needs into qualitative technical solutions and recommended three best practices to improve operational efficiency.

Dec 20 – Nov 21

Allanasons Private Limited – Bengaluru, India

Management Trainee

- Delivered \$100K+ purchase decisions through market/competitor analysis using Excel and R.
- Streamlined quality control and planning with interdepartmental trackers, reducing processing time by 83%.

Education

Jan 24 - Dec 24

Monroe University – New Rochelle, New York

Advanced Certificate: Data Science, 3.92/4.0 GPA

Aug 22 - Dec 23

University of Maryland – College Park, Maryland

Master of Science: Business Analytics, 3.89/4.0 GPA, Terrapin Scholarship Recipient

Projects

Aug 24 – Dec 24

Beauty Product Recommender System

- Built a beauty product recommender system using a rule-based approach in Python to filter through 1 million+ records and match users with products based on inputs like skin type, ingredients, etc.
- Developed a dynamic interface on Streamlit, enabling flexible multi-brand and multi-ingredient selections.

Feb 24 – Apr 24

Maternal Health Risk Prediction

- Developed a predictive maternal health risk assessment application in R, using multinomial regression, decision trees, and K-Nearest Neighbors. Visualized data and derived insights using ggplot2.
- Implemented proactive healthcare and health management features, issuing warnings for abnormal patient vitals within the application.

Achievements

- Co-authored a paper focused on currency coupling employing Granger Causality analysis.
- Completed B2 Level in German language

Certifications

- Power BI Essential Training – LinkedIn Learning, Feb 2025
- Looker Studio for Beginners – LinkedIn Learning, Dec 2024
