Salt Lake City, UT (Open for Relocation) | (801) 661-5974 | anapeksha07@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

University of Utah

Master of Science, Computer Science | CGPA: 3.71

Salt Lake City, UT

Aug 2023 – May 2025

Visvesvaraya Technological University

Bachelor of Engineering, Computer Science | CGPA: 8.78

Karnataka, India

Aug 2018 – July 2022

SKILLS

Programming Languages: Python, Java, JavaScript

Software Development: OOP, Agile, Algorithms, Data Structures, System Design, Version Control (Git)

Web Development: HTML, CSS, Flask, Django

Backend & API Development: Spring Boot, Restful APIs, Microservices, JWT

Frameworks and Libraries: TensorFlow, Scikit-learn, Pandas, NumPy

DevOps & Tools: Docker, CI/CD (GitHub Actions, Jenkins), Git, Linux, Bash

Databases: SQL, MongoDB, Cassandra, PySpark

Cloud Platform: Azure, AWS

Testing: Junit, Postman, Newman

Certification: Microsoft Azure Fundamental (AZ-900)

EXPERIENCE

Associate Software Engineer

Karnataka, India

Infogain India Private Limited

Aug 2022 – Jul 2023

- Designed and maintained scalable microservices and RESTful APIs using Java and Spring Boot, supporting distributed booking flows across thousands of concurrent users.
- Improved system throughput by 15% by optimizing backend service performance and asynchronous data handling.
- Crafted a responsive user management portal using HTML, CSS, and JavaScript, deployed via Docker and CI/CD pipelines cutting deployment time by 25%.
- Contributed to core features of the Costco Travel platform, enabling hotel, flight, and cruise bookings for thousands of users, increasing engagement by 20%.
- Automated unit and regression tests for API workflows using Postman, Newman, and GitHub Actions, improving coverage and debugging turnaround.
- Resolved production issues in collaboration with QA and DevOps teams, maintaining 99% system uptime.
- Streamlined Git workflows in Agile SCRUM teams, reducing merge conflicts and accelerating feature integration.
- Refactored Java backend services and fixed recurring bugs, reducing production issues by 15%.

Software Engineer Intern

Karnataka, India

Ekathva Innovations Private Limited

Jul 2021 – Sep 2021

- Built an elective subject selection system using Python Flask to streamline student and admin workflows.
- Spearheaded the integration of Cassandra with Flask for real-time data retrieval, improving responsiveness by 30%.
- Devised and customized responsive UI with HTML, CSS and JavaScript, improving cross-platform usability by 40%.
- Conducted backend and UI testing, debugging functional issues to reduce system downtime by 25% and enhance deployment stability.

PROJECTS

Weather Forecast Web App

Jan 2025

- Developed a responsive weather forecast web app using HTML, CSS, JavaScript, integrating OpenWeatherMap API to display real-time weather data for user-searched cities.
- Enhanced visual appeal and UX by dynamically fetching high-resolution city images from the Unsplash API, with smooth transitions and location-based suggestions.

Payroll Management System

May 2023

- Created a web interface using HTML, CSS, PHP, and XAMPP Server to automate payroll processes, improving payment accuracy by 25% and reducing processing time by 30%.
- Deployed a cost-effective solution for managing salaries, bonuses, deductions, and taxes, eliminating the need for professional services.

Old Bailey Decisions Prediction Project

Apr 2024

- Processed large-scale judicial datasets by applying data cleaning, transformation, and feature engineering techniques.
- Trained and fine-tuned machine learning classifiers using Scikit-learn, achieving up to 73% accuracy through cross-validation and hyperparameter tuning.
